CALIFORNIA LEGISLATURE—2003–04 REGULAR SESSION

ASSEMBLY BILL

No. 2055

Introduced by Assembly Member Wolk
(Coauthors: Senators Machado, Soto, and Torlakson)

February 17, 2004

An act to amend Sections 65302, 65560, 65561, 65562, 65564, and 65566 of, and to add Section 65565 to, the Government Code, relating to land use.

LEGISLATIVE COUNSEL'S DIGEST

AB 2055, as amended, Wolk. General plan elements.

Existing law requires every city and county to prepare, adopt, and amend a general plan stating development policies and including specified elements, including a conservation element and an open-space element. Existing law provides that no building permit may be issued, no subdivision map approved and no open-space zoning

ordinance adopted unless the proposed construction, subdivision, or ordinance is consistent with the local open-space plan.

This bill would provide that the conservation element may include the conservation of agricultural lands. The bill would provide that the open-space element, which the bill would rename as the agricultural and open-space element, is the component of a county or city general plan adopted by the legislative body, as specified, and would provide subjects that may be included in the agricultural and open-space element. The bill would make other technical, nonsubstantive changes.

Vote: majority. Appropriation: no. Fiscal committee: no. State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Section 65302 of the Government Code is
2 amended to read:

3 65302. The general plan shall consist of a statement of
4 development policies and shall include a diagram or diagrams and
5 text setting forth objectives, principles, standards, and plan
6 proposals. The plan shall include the following elements:

7 (a) A land use element that designates the proposed general
8 distribution and general location and extent of the uses of the land
9 for housing, business, industry, open space, agriculture, natural
10 resources, recreation, and enjoyment of scenic beauty, education,
11 public buildings and grounds, solid and liquid waste disposal
12 facilities, and other categories of public and private uses of land.
13 The land use element shall include a statement of the standards of
14 population density and building intensity recommended for the
15 various districts and other territory covered by the plan. The land
16 use element shall identify areas covered by the plan that are subject
17 to flooding and shall be reviewed annually with respect to those
18 areas. The land use element shall also do both of the following:

19 (1) Designate in a land use category that provides for timber
20 production those parcels of real property zoned for timberland
21 production pursuant to the California Timberland Productivity
22 Act of 1982, Chapter 6.7 (commencing with Section 51100) of
23 Part 1 of Division 1 of Title 5.

24 (2) Consider the impact of new growth on military readiness
25 activities carried out on military bases, installations, and operating
26 and training areas, when proposing zoning ordinances or

1 designating land uses covered by the general plan for land, or other
2 territory adjacent to military facilities, or underlying designated
3 military aviation routes and airspace.

4 (A) In determining the impact of new growth on military
5 readiness activities, information provided by military facilities
6 shall be considered. Cities and counties shall address military
7 impacts based on information that the military provides.

8 (B) The following definitions govern this paragraph:

9 (i) “Military readiness activities” mean all of the following:

10 (I) Training, support, and operations that prepare the men and
11 women of the military for combat.

12 (II) Operation, maintenance, and security of any military
13 installation.

14 (III) Testing of military equipment, vehicles, weapons, and
15 sensors for proper operation or suitability for combat use.

16 (ii) “Military installation” means a base, camp, post, station,
17 yard, center, homeport facility for any ship, or other activity under
18 the jurisdiction of the United States Department of Defense as
19 defined in paragraph (1) of subsection (e) of Section 2687 of Title
20 10 of the United States Code.

21 (b) A circulation element consisting of the general location and
22 extent of existing and proposed major thoroughfares,
23 transportation routes, terminals, any military airports and ports,
24 and other local public utilities and facilities, all correlated with the
25 land use element of the plan.

26 (c) A housing element as provided in Article 10.6
27 (commencing with Section 65580).

28 (d) A conservation element for the conservation, development,
29 and utilization of natural resources including water and its
30 hydraulic force, forests, soils, rivers and other waters, harbors,
31 fisheries, wildlife, minerals, and other natural resources. The
32 conservation element shall consider the effect of development
33 within the jurisdiction, as described in the land use element, on
34 natural resources located on public lands, including military
35 installations. That portion of the conservation element including
36 waters shall be developed in coordination with any countywide
37 water agency and with all district and city agencies that have
38 developed, served, controlled or conserved water for any purpose
39 for the county or city for which the plan is prepared. Coordination
40 shall include the discussion and evaluation of any water supply and

1 demand information described in Section 65352.5, if that
2 information has been submitted by the water agency to the city or
3 county. The conservation element may also cover the following:

- 4 (1) The reclamation of land and waters.
- 5 (2) Prevention and control of the pollution of streams and other
6 waters.
- 7 (3) Regulation of the use of land in stream channels and other
8 areas required for the accomplishment of the conservation plan.
- 9 (4) Prevention, control, and correction of the erosion of soils,
10 beaches, and shores.
- 11 (5) Protection of watersheds.
- 12 (6) The location, quantity and quality of the rock, sand and
13 gravel resources.
- 14 (7) Flood control.
- 15 (8) Conservation of agricultural lands.

16 The conservation element shall be prepared and adopted no later
17 than December 31, 1973.

18 (e) An agricultural and open-space element as provided in
19 Article 10.5 (commencing with Section 65560).

20 (f) A noise element which shall identify and appraise noise
21 problems in the community. The noise element shall recognize the
22 guidelines established by the Office of Noise Control in the State
23 Department of Health Services and shall analyze and quantify, to
24 the extent practicable, as determined by the legislative body,
25 current and projected noise levels for all of the following sources:

- 26 (1) Highways and freeways.
- 27 (2) Primary arterials and major local streets.
- 28 (3) Passenger and freight on-line railroad operations and
29 ground rapid transit systems.
- 30 (4) Commercial, general aviation, heliport, helistop, and
31 military airport operations, aircraft overflights, jet engine test
32 stands, and all other ground facilities and maintenance functions
33 related to airport operation.
- 34 (5) Local industrial plants, including, but not limited to,
35 railroad classification yards.
- 36 (6) Other ground stationary noise sources, including, but not
37 limited to, military installations, identified by local agencies as
38 contributing to the community noise environment.

39 Noise contours shall be shown for all of these sources and stated
40 in terms of community noise equivalent level (CNEL) or day-night

1 average level (L_{dn}). The noise contours shall be prepared on the
2 basis of noise monitoring or following generally accepted noise
3 modeling techniques for the various sources identified in
4 paragraphs (1) to (6), inclusive.

5 The noise contours shall be used as a guide for establishing a
6 pattern of land uses in the land use element that minimizes the
7 exposure of community residents to excessive noise.

8 The noise element shall include implementation measures and
9 possible solutions that address existing and foreseeable noise
10 problems, if any. The adopted noise element shall serve as a
11 guideline for compliance with the state's noise insulation
12 standards.

13 (g) A safety element for the protection of the community from
14 any unreasonable risks associated with the effects of seismically
15 induced surface rupture, ground shaking, ground failure, tsunami,
16 seiche, and dam failure; slope instability leading to mudslides and
17 landslides; subsidence, liquefaction and other seismic hazards
18 identified pursuant to Chapter 7.8 (commencing with Section
19 2690) of the Public Resources Code, and other geologic hazards
20 known to the legislative body; flooding; and wild land and urban
21 fires. The safety element shall include mapping of known seismic
22 and other geologic hazards. It shall also address evacuation routes,
23 military installations, peakload water supply requirements, and
24 minimum road widths and clearances around structures, as those
25 items relate to identified fire and geologic hazards. Prior to the
26 periodic review of its general plan and prior to preparing or
27 revising its safety element, each city and county shall consult the
28 Division of Mines and Geology of the Department of Conservation
29 and the Office of Emergency Services for the purpose of including
30 information known by and available to the department and the
31 office required by this subdivision.

32 To the extent that a county's safety element is sufficiently
33 detailed and contains appropriate policies and programs for
34 adoption by a city, a city may adopt that portion of the county's
35 safety element that pertains to the city's planning area in
36 satisfaction of the requirement imposed by this subdivision.

37 At least 45 days prior to adoption or amendment of the safety
38 element, each county and city shall submit to the Division of Mines
39 and Geology of the Department of Conservation one copy of a
40 draft of the safety element or amendment and any technical studies

1 used for developing the safety element. The division may review
2 drafts submitted to it to determine whether they incorporate known
3 seismic and other geologic hazard information, and report its
4 findings to the planning agency within 30 days of receipt of the
5 draft of the safety element or amendment pursuant to this
6 subdivision. The legislative body shall consider the division's
7 findings prior to final adoption of the safety element or
8 amendment unless the division's findings are not available within
9 the above prescribed time limits or unless the division has
10 indicated to the city or county that the division will not review the
11 safety element. If the division's findings are not available within
12 those prescribed time limits, the legislative body may take the
13 division's findings into consideration at the time it considers future
14 amendments to the safety element. Each county and city shall
15 provide the division with a copy of its adopted safety element or
16 amendments. The division may review adopted safety elements or
17 amendments and report its findings. All findings made by the
18 division shall be advisory to the planning agency and legislative
19 body.

20 SEC. 2. Section 65560 of the Government Code is amended
21 to read:

22 65560. (a) The agricultural and open-space element is the
23 component of a county or city general plan adopted by the
24 legislative body pursuant to Section 65563.

25 (b) "Agricultural and open-space land" is any parcel or area of
26 land or water that is essentially unimproved and devoted to a land
27 use as defined in this section, and that is designated on a local,
28 regional or state open-space plan as any of the following:

29 (1) Land used for the preservation of natural resources
30 including, but not limited to, areas required for the preservation of
31 plant and animal life, including habitat for fish and wildlife
32 species; areas required for ecologic and other scientific study
33 purposes; rivers, streams, bays and estuaries; areas adjacent to
34 military installations, military training routes, and restricted
35 airspace that can provide additional buffer zones to military
36 activities and complement the resource values of the military
37 lands; and coastal beaches, lakeshores, banks of rivers and
38 streams, and watershed lands.

39 (2) Land used for the production of food or fiber, including, but
40 not limited to, prime farmland, farmland of statewide importance,

1 unique farmland, farmland of local importance, and grazing land,
2 excluding land committed to nonagricultural uses.

3 (3) Land used for the managed production of resources,
4 including, but not limited to, forest lands; areas required for
5 recharge of groundwater basins; bays, estuaries, marshes, rivers
6 and streams which are important for the management of
7 commercial fisheries; and areas containing major mineral
8 deposits, including those in short supply.

9 (4) Land for outdoor recreation, including but not limited to,
10 areas of outstanding scenic, historic and cultural value; areas
11 particularly suited for park and recreation purposes, including
12 access to lakeshores, beaches, and rivers and streams; and areas
13 which serve as links between major recreation and open-space
14 reservations, including utility easements, banks of rivers and
15 streams, trails, and scenic highway corridors.

16 (5) Land for public health and safety, including, but not limited
17 to, areas which require special management or regulation because
18 of hazardous or special conditions such as earthquake fault zones,
19 unstable soil areas, flood plains, watersheds, areas presenting high
20 fire risks, areas required for the protection of water quality and
21 water reservoirs and areas required for the protection and
22 enhancement of air quality.

23 SEC. 3. Section 65561 of the Government Code is amended
24 to read:

25 65561. The Legislature finds and declares as follows:

26 (a) The preservation of agricultural and open-space land, as
27 defined in this article, is necessary not only for the maintenance of
28 the economy of the state, but also for the assurance of the
29 continued availability of land and water for the production of food
30 and fiber, for the enjoyment of scenic beauty, for recreation and for
31 the use of natural resources.

32 (b) Discouraging premature and unnecessary conversion of
33 agricultural and open-space land to urban uses is a matter of public
34 interest and will be of benefit to urban dwellers because it will
35 discourage noncontiguous development patterns which
36 unnecessarily increase the costs of community services to
37 community residents.

38 (c) The anticipated increase in the population of the state
39 demands that cities, counties, and the state at the earliest possible
40 date make definite plans for the preservation of valuable

1 agricultural and open-space land and take positive action to carry
2 out those plans by the adoption and strict administration of laws,
3 ordinances, rules and regulations as authorized by this chapter or
4 by other appropriate methods.

5 (d) In order to assure that the interests of all its people are met
6 in the orderly growth and development of the state and the
7 preservation and conservation of its resources, it is necessary to
8 provide for the development of agricultural and open-space
9 elements for the conservation and preservation of agricultural and
10 open-space lands.

11 (e) For these reasons this article is necessary for the promotion
12 of the general welfare and for the protection of the public interest
13 in agricultural and open-space land.

14 SEC. 4. Section 65562 of the Government Code is amended
15 to read:

16 65562. It is the intent of the Legislature in enacting this article
17 to provide a mechanism for considering all of the following:

18 (a) Assure that cities and counties, local agency formation
19 commissions, and the state recognize that agricultural and
20 open-space land is a limited and valuable resource that must be
21 conserved for ecological and economic reasons wherever possible.

22 (b) Encourage long-term preservation of natural resources for
23 plant and animal life and promote sustainable ecosystems that
24 protect and enhance the quality of life within the state.

25 (c) Encourage the managed production of resources by
26 ensuring that the importance of long-term viability of agricultural
27 land and other resource-based economic development is
28 recognized in the plans and actions of state and local entities,
29 where appropriate, and that the quantity, quality, and diversity of
30 agricultural commodities produced within the state are supported
31 by conserving land resources upon which these resources rely,
32 where conservation is appropriate consistent with other goals set
33 forth in the general plan.

34 ~~(d) Goals, objectives, and policies that support agricultural and~~
35 ~~open-space uses by identifying and addressing possible conflicts~~
36 ~~between existing and planned local and regional infrastructure and~~
37 ~~adopted agricultural and open-space priorities, including, but not~~
38 ~~limited to, implementing measures that discourage the premature~~
39 ~~or unnecessary extension of urban services to agricultural and~~
40 ~~open-space lands.~~

1 ~~(c) Goals, objectives, and policies that support agricultural and~~
2 ~~open space uses by identifying and addressing possible beneficial~~
3 ~~relationships between existing and planned local and regional~~
4 ~~infrastructure and adopted agricultural and open space priorities,~~
5 ~~including, but not limited to, implementing measures that take~~
6 ~~advantage of opportunities to enhance or promote compatible~~
7 ~~agricultural or open space uses.~~

8 ~~(f)–~~

9 (d) Provide adequate opportunities for passive and active
10 outdoor recreation areas that include urban parks, to promote the
11 health and general welfare of the citizenry.

12 ~~(g)–~~

13 (e) Identify special areas that may, consistent with other
14 elements, require special management for public health and safety
15 to keep urban uses out of harm's way and minimize costs of
16 emergency response.

17 ~~(h)–~~

18 (f) Minimize or avoid the premature or unnecessary loss of
19 agricultural and open-space lands, while encouraging
20 opportunities that are compatible with or complementary to other
21 existing or planned uses or infrastructure.

22 SEC. 5. Section 65564 of the Government Code is amended
23 to read:

24 65564. Every local agricultural and open-space element shall
25 contain an action program consisting of specific programs that the
26 legislative body intends to pursue in implementing its agricultural
27 and open-space plan.

28 SEC. 6. Section 65565 is added to the Government Code, to
29 read:

30 65565. The agricultural and open-space element may include,
31 but is not limited to, any of the following:

32 (a) A land inventory identifying the type and use of the
33 following:

34 (1) Land under a natural communities conservation plan or
35 habitat conservation plan, publicly owned land that constitutes a
36 linkage or corridor between habitat areas, and land subject to a
37 conservation easement or other enforceable restriction for the
38 purposes of ecosystem protection, buffers for military
39 installations, and sensitive lands that provide clean air and water.

1 (2) Agricultural land using existing data submitted pursuant to
2 Section 65570, including Williamson Act contracted land and
3 Farmland Security Zones, as identified in Chapter 7 (commencing
4 with Section 51200) of Part 1 of Division 1 of Title 5.

5 (3) Resource-based managed lands, including areas for timber
6 production and mining and timberland production zones.

7 (4) Lands designated for passive and active outdoor recreation,
8 that include regional or urban parks where appropriate, for the
9 purpose of providing greater access to recreation and open-space
10 for all citizens.

11 (5) Land that, for reasons of public health and safety, requires
12 special management to avoid placing urban uses in areas subject
13 to natural hazards including, but not limited to, flood, fire,
14 landslide, and seismic activities that increase emergency response
15 costs.

16 (b) Goals, objectives, and policies that support the long-term
17 conservation of agricultural and other open-space lands, and
18 appropriate implementation measures including, but not limited
19 to, measures that seek to avoid or minimize conflicts with
20 authorized urban uses on neighboring or nearby lands, and
21 preserve opportunities for food security through local food
22 production that sustains family farming operations.

23 (c) Goals, objectives, and policies that support and encourage
24 continuation or initiation of agricultural and open-space use, and
25 opportunities, especially in urban and transitional areas, where
26 appropriate and compatible, and appropriate implementation
27 measures, including, but not limited to, provision of incentives,
28 removal of disincentives, design solutions, and conjunctive uses.

29 (d) *Goals, objectives, and policies that support agricultural*
30 *and open-space uses by identifying and addressing possible*
31 *conflicts between existing and planned local and regional*
32 *infrastructure and adopted agricultural and open-space priorities,*
33 *including, but not limited to, implementing measures that*
34 *discourage the premature or unnecessary extension of urban*
35 *services to agricultural and open-space lands.*

36 (e) *Goals, objectives, and policies that support agricultural*
37 *and open-space uses by identifying and addressing possible*
38 *beneficial relationships between existing and planned local and*
39 *regional infrastructure and adopted agricultural and open-space*
40 *priorities, including, but not limited to, implementing measures*

1 *that take advantage of opportunities to enhance or promote*
2 *compatible agricultural or open-space uses.*

3 (f) To implement Section 65300.7 and to accommodate the
4 diversity of circumstances within a jurisdictional boundary, the
5 element may contain different measures for different areas and for
6 different types of agricultural and open-space uses, including, but
7 not limit to, conjunctive, or transitional uses, and different
8 physical land uses.

9 ~~(e)~~

10 (g) The land categories listed in subdivision (a) are not
11 intended to be mutually exclusive with respect to lands to which
12 they apply. The land inventory is for planning purposes only and,
13 in and of itself, does not increase restrictions on the use of the land.

14 SEC. 7. Section 65566 of the Government Code is amended
15 to read:

16 65566. Any action by a county or city by which agricultural
17 and open-space land or any interest therein is acquired or disposed
18 of or its use restricted or regulated, whether or not pursuant to this
19 part, must be consistent with the local agricultural and open-space
20 element.

21 SEC. 8. (a) In enacting Sections 1 to 7, inclusive, of this act,
22 the Legislature is mindful of Section 65300.7 and subdivision (c)
23 of Section 65301 of the Government Code, which allow counties
24 and cities to implement the agricultural and open-space elements
25 of their general plans in ways that accommodate local conditions
26 and circumstances, while meeting minimum requirements.

27 (b) The amendments to Section 65562 and 65565 of the
28 Government Code made by this act are intended by the Legislature
29 to be permissive and prospective, and shall not be construed to
30 place any existing open-space element of a general plan out of
31 conformity with the statute. If a county or a city voluntarily revises
32 its general plan or the agricultural and open-space element of its
33 general plan pursuant to Sections 65562 and 65565 of the
34 Government Code, those provisions do not constitute a
35 state-mandated local program for the purposes of reimbursement
36 by the state.

37 (c) If a county or a city makes no further amendments to its
38 agricultural and open-space element of its general plan, other than
39 changes in nomenclature required by Article 10.5 (commencing

- 1 with Section 65560) of Chapter 3 of Division 1 of Title 5 of the
- 2 Government Code, those actions shall be considered ministerial.

O
