## CHAPTER \_\_\_\_\_

An act relating to career technical education.

## LEGISLATIVE COUNSEL'S DIGEST

SB 560, Migden. Career technical education: school district reporting.

Existing law requires school districts to adopt a course of study for grades 7 to 12, inclusive, that includes, among other things, career technical education.

This bill would require a school district offering grades 9 to 12, inclusive, that discontinued any career technical education courses or closed any career technical education facilities during the 2002–03, 2003–04, 2004–05, or 2005–06 school years, to submit to the State Department of Education a report on those discontinued courses and closed facilities, as specified, if the school district is required to provide the data to the department or the State Allocation Board as a condition of receiving career technology facility modernization funding made available by a bond act adopted after January 1, 2007. This bill would require the department to develop and post on its Internet Web site a document that school districts may use to report the required data online. The bill would require the department, by January 1, 2009, to summarize the reports and submit a report of its summary to the Legislature.

*The people of the State of California do enact as follows:*

SECTION 1. (a) A school district offering grades 9 to 12, inclusive, that discontinued any career technical education courses or closed any career technical education facilities during the 2002–03, 2003–04, 2004–05, or 2005–06 school years, shall submit a report detailing these changes to the State Department of Education pursuant to subdivision (b), if providing the data to the department or the State Allocation Board is a condition of the receipt of career technology facility modernization funding made available by a bond act that is adopted after January 1, 2007.

(b) A school district to which subdivision (a) applies shall, by January 1, 2008, submit to the department a report that includes all of the following:

(1) A list that identifies each of the courses that were discontinued and the facilities that were closed.

(2) The number of career technical education courses offered by the school district prior to the 2002–03 school year and the number of career technical education courses offered by the school district after the 2005–06 school year.

(3) The number of career technical education facilities existing in the school district prior to the 2002–03 school year and the number of career technical education facilities existing in the school district after the 2005–06 school year.

(c) The department shall develop and post on its Internet Web site a document that school districts may use to submit the data required pursuant to subdivision (b) online.

(d) The department shall, by January 1, 2009, summarize the reports that it receives pursuant to subdivision (a) and submit a report of its summary to the Legislature.

Approved \_\_\_\_\_, 2006

---

*Governor*
