Assembly Bill No. 1108

CHAPTER 672

An act to add Chapter 11 (commencing with Section 108935) to Part 3 of Division 104 of the Health and Safety Code, relating to product safety.

[Approved by Governor October 14, 2007. Filed with Secretary of State October 14, 2007.]

LEGISLATIVE COUNSEL'S DIGEST

Existing law prohibits the manufacture, processing, and distribution in commerce of products containing certain chemicals found to raise health risks, including, but not limited to, polybrominated diphenyl ether.

This bill would, commencing January 1, 2009, prohibit the manufacture, sale, or distribution in commerce of certain toys and child care articles, as defined, if those products contain types of phthalates in concentrations exceeding \( \frac{1}{10} \) of 1%.

This bill would also require manufacturers to use the least toxic alternative when replacing phthalates in their products and would prohibit manufacturers from replacing phthalates with certain carcinogens and reproductive toxicants.

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares both of the following:
(a) Phthalates are a class of chemicals used in polyvinyl chloride (PVC) plastic to improve flexibility and in cosmetics to bind fragrance to the product. Phthalates are used in many products intended for use by young children, including, but not limited to, teethers, toys, and soft plastic books.
(b) There is extensive scientific literature reporting the hormone-disrupting effects phthalates and substantial evidence that levels of the phthalates of concern are found in humans at levels associated with adverse effects. Population studies show that virtually everyone carries some level of phthalates in their body. For the general population, the oral route of exposure is considered a major route.

SEC. 2. Chapter 11 (commencing with Section 108935) is added to Part 3 of Division 104 of the Health and Safety Code, to read:
