

Assembly Bill No. 2466

CHAPTER 540

An act to add Chapter 7.5 (commencing with Section 2830) to Part 2 of Division 1 of the Public Utilities Code, relating to energy.

[Approved by Governor September 28, 2008. Filed with Secretary of State September 28, 2008.]

LEGISLATIVE COUNSEL'S DIGEST

AB 2466, Laird. Local government renewable energy self-generation program.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities. Existing law permits a private energy producer to generate electricity not generated from conventional sources, as defined, solely for its own use or the use of its tenants, or to or for any electrical corporation, state agency, city, county, district, or an association thereof, but not the public, without becoming a public utility subject to the general jurisdiction of the commission. Existing law requires the commission to review the charges paid by electrical corporations to private energy producers for electricity not generated from conventional power sources and to review standby and transmission charges made by electrical corporations to private energy producers and, after the review, to adjust those charges to encourage the generation of electricity from other than conventional power sources. Existing law authorizes the City of Davis to receive a bill credit, as defined, to a benefiting account, as defined, for electricity supplied to the electrical grid by a photovoltaic facility located within and partially owned by the city and requires the commission to adopt a rate tariff for the benefiting account.

This bill would authorize a local government, as defined, to receive a bill credit, as defined, to a designated benefiting account, as defined, for electricity exported to the electrical grid by an eligible renewable generating facility, as defined, and requires the commission to adopt a rate tariff for the benefiting account.

Under existing law, a violation of the Public Utilities Act or an order or direction of the commission is a crime. Because the provisions of this bill would require an order or other action of the commission to implement and a violation of that order or action would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Chapter 7.5 (commencing with Section 2830) is added to Part 2 of Division 1 of the Public Utilities Code, to read:

CHAPTER 7.5. LOCAL GOVERNMENT RENEWABLE ENERGY
SELF-GENERATION PROGRAM

2830. (a) As used in this section, the following terms have the following meanings:

(1) “Benefiting account” means an electricity account, or more than one account, located within the geographical boundaries of a local government, that is mutually agreed upon by the local government and an electrical corporation.

(2) “Bill credit” means an amount of money credited to a benefiting account that is calculated based upon the time-of-use electricity generation component of the electricity usage charge of the generating account, multiplied by the quantities of electricity generated by an eligible renewable generating facility that are exported to the grid during the corresponding time period. Electricity is exported to the grid if it is generated by an eligible renewable generating facility, is not utilized onsite by the local government, and the electricity flows through the meter site and on to the electrical corporation’s distribution or transmission infrastructure.

(3) “Eligible renewable generating facility” means a generation facility that has a generating capacity of no more than one megawatt, is an eligible renewable energy resource pursuant to the California Renewables Portfolio Standard Program, is located within the geographical boundary of, and is owned, operated, or on property under the control of, the local government, and is sized to offset all or part of the electrical load of the benefiting account. For these purposes, premises that are leased by a local government are under the control of the local government.

(4) “Generating account” means the time-of-use electric service account of the local government where the eligible renewable generating facility is located.

(5) “Local government” means a city, county, whether general law or chartered, city and county, special district, school district, political subdivision, or other local public agency, if authorized by law to generate electricity, but shall not mean the state, any agency or department of the state, or joint powers authority.

(b) Subject to the limitation in subdivision (h), a local government may elect to receive electric service pursuant to this section, if all of the following conditions are met:

(1) The local government designates one or more benefiting accounts to receive a bill credit.

(2) A benefiting account receives service under a time-of-use rate schedule.

(3) The benefiting account is the responsibility of, and serves property that is owned, operated, or on property under the control of the same local government that owns, operates, or controls the eligible renewable generating facility.

(4) The electrical output of the eligible renewable generating facility is metered for time of use to allow calculation of the bill credit based upon when the electricity is exported to the grid.

(5) All costs associated with the metering requirements of paragraphs (2) and (4) are the responsibility of the local government.

(6) All costs associated with interconnection are the responsibility of the local government. For purposes of this paragraph, “interconnection” has the same meaning as defined in Section 2803, except that it applies to the interconnection of an eligible renewable generating facility rather than the energy source of a private energy producer.

(7) The local government does not sell electricity exported to the electrical grid to a third party.

(8) All electricity exported to the grid by the local government that is generated by the eligible renewable generating facility becomes the property of the electrical corporation to which the facility is interconnected, but shall not be counted toward the electrical corporation’s total retail sales for purposes of Article 16 (commencing with Section 399.11) of Chapter 2.3 of Part 1. Ownership of the renewable energy credits, as defined in Section 399.12, shall be the same as the ownership of the renewable energy credits associated with electricity that is net metered pursuant to Section 2827.

(c) (1) A benefiting account shall be billed for all electricity usage, and for each bill component, at the rate schedule applicable to the benefiting account, including any cost-responsibility surcharge or other cost recovery mechanism, as determined by the commission, to reimburse the Department of Water Resources for purchases of electricity, pursuant to Division 27 (commencing with Section 80000) of the Water Code.

(2) The bill shall then subtract the bill credit applicable to the benefiting account. The generation component credited to the benefiting account may not include the cost-responsibility surcharge or other cost recovery mechanism, as determined by the commission, to reimburse the Department of Water Resources for purchases of electricity, pursuant to Division 27 (commencing with Section 80000) of the Water Code. The electrical corporation shall ensure that the local government receives the full bill credit.

(3) If, during the billing cycle, the generation component of the electricity usage charges exceeds the bill credit, the benefiting account shall be billed for the difference.

(4) If, during the billing cycle, the bill credit applied pursuant to paragraph (2) exceeds the generation component of the electricity usage charges, the difference shall be carried forward as a financial credit to the next billing cycle.

(5) After the electricity usage charge pursuant to paragraph (1) and the credit pursuant to paragraph (2) are determined for the last billing cycle of

a 12-month period, any remaining credit resulting from the application of this section shall be reset to zero.

(d) The commission shall ensure that the transfer of a bill credit to a benefiting account does not result in a shifting of costs to bundled service subscribers. The costs associated with the transfer of a bill credit shall include all billing-related expenses.

(e) Not more frequently than once per year, and upon providing the electrical corporation with a minimum of 60 days' notice, the local government may elect to change a benefiting account. Any credit resulting from the application of this section earned prior to the change in a benefiting account that has not been used as of the date of the change in the benefiting account, shall be applied, and may only be applied, to a benefiting account as changed.

(f) A local government shall provide the electrical corporation to which the eligible renewable generating facility will be interconnected with not less than 60 days' notice prior to the eligible renewable generating facility becoming operational. The electrical corporation shall file an advice letter with the commission, that complies with this section, not later than 30 days after receipt of the notice, proposing a rate tariff for a benefiting account. The commission, within 30 days of the date of filing, shall approve the proposed tariff, or specify conforming changes to be made by the electrical corporation to be filed in a new advice letter.

(g) The local government may terminate its election pursuant to subdivision (b), upon providing the electrical corporation with a minimum of 60 days' notice. Should the local government sell its interest in the eligible renewable generating facility, or sell the electricity generated by the eligible renewable generating facility, in a manner other than required by this section, upon the date of either event, and the earliest date if both events occur, no further bill credit pursuant to paragraph (3) of subdivision (b) may be earned. Only credit earned prior to that date shall be made to a benefiting account.

(h) An electrical corporation is not obligated to provide a bill credit to a benefiting account that is not designated by a local government prior to the point in time that the combined statewide cumulative rated generating capacity of all eligible renewable generating facilities within the service territories of the state's three largest electrical corporations reaches 250 megawatts. Only those eligible renewable generating facilities that are providing bill credits to benefiting accounts pursuant to this section shall count toward reaching this 250-megawatt limitation. Each electrical corporation shall only be required to offer service or contracts under this section until that electrical corporation reaches its proportionate share of the 250-megawatt limitation based on the ratio of its peak demand to the total statewide peak demand of all electrical corporations.

SEC. 2. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of

Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.
