LEGISLATIVE COUNSEL'S DIGEST

SB 68, as amended, ~~Committee on Budget and Fiscal Review Steinberg. Community redevelopment: Supplemental Education Revenue Augmentation Fund. Water resources.~~

(1) Existing law requires various state agencies to administer programs relating to water supply, water quality, and flood management in the Sacramento-San Joaquin Delta. The Johnston-Baker-Andal-Boatwright Delta Protection Act of 1992 (Delta Protection Act) creates the Delta Protection Commission and requires the commission to prepare and adopt a comprehensive long-term resource management plan for specified lands within the Sacramento-San Joaquin Delta. Existing law requires the Secretary of the Resources Agency to convene a committee to develop and submit to the Governor and the Legislature, on or before December 31, 2008, recommendations for implementing a specified strategic plan relating to the sustainable management of the Delta.

This bill would revise and recast the provisions of the Delta Protection Act to, among other things, reduce the number of commission members to 15 members, as specified. The bill would require the commission to appoint at least one advisory committee consisting of representatives from specified entities to provide input regarding the diverse interests within the Delta. The bill would require the commission to adopt, not later than July 1, 2011, an economic sustainability plan containing specified elements and would require the commission to review and, as determined to be necessary, amend the plan every 5 years.

The bill would require the commission to prepare and submit to the Legislature, by July 1, 2010, recommendations on the potential expansion of or change to the primary zone or the Delta.

The bill would establish the Delta Investment Fund in the State Treasury. Moneys in the fund, upon appropriation by the Legislature, would be required to be expended by the commission to implement the regional economic sustainability plan.

The bill would establish in the Natural Resources Agency the Sacramento-San Joaquin Delta Conservancy. The conservancy would be required to act as a primary state agency to implement ecosystem restoration in the Delta and to support efforts that advance environmental protection and the economic well-being of Delta residents. The bill would specify the composition of the conservancy and grant certain authority to the conservancy, including the authority

to acquire real property interests from willing sellers or transferors. The conservancy would be required to use conservation easements to accomplish ecosystem restoration whenever feasible. The conservancy would be required to prepare and adopt a strategic plan to achieve the goals of the conservancy. The strategic plan would be required to be consistent with the Delta Plan and certain other plans. The bill would establish the Sacramento-San Joaquin Delta Conservancy Fund in the State Treasury. Moneys in the fund would be available, upon appropriation, to finance projects, including ecosystem restoration and economic sustainability projects.

(2) Existing law requires the Secretary of the Natural Resources Agency to convene a committee to develop and submit to the Governor and the Legislature, on or before December 31, 2008, recommendations for implementing a specified strategic plan relating to the sustainable management of the Delta.

This bill would enact the Sacramento-San Joaquin Delta Reform Act of 2009. The bill would establish the Delta Stewardship Council as an independent agency of the state. The council would be required to consist of 7 members appointed in a specified manner. The bill would specify the powers of the council. The bill would require the council, on or before January 1, 2012, to develop, adopt, and commence implementation of a comprehensive management plan for the Delta, meeting specified requirements. The bill would require a state or local public agency that proposes to undertake certain proposed actions that will occur within the boundaries of the Delta or the Suisun Marsh to prepare, and submit to the council, a specified written certification of consistency with the Delta Plan prior to taking those actions. By imposing these requirements on a local public agency, the bill would impose a state-mandated local program. The bill would establish an appeal process by which a person may claim that a proposed action is inconsistent with the Delta Plan, as prescribed.

The bill would impose requirements on the Department of Water Resources in connection with the preparation of a specified Bay Delta Conservation Plan (BDCP). The BDCP would only be permitted to be incorporated in the Delta Plan if certain requirements are met.

The bill would establish the Delta Independent Science Board, whose members would be selected by the council. The bill would require the Delta Independent Science Board to develop a scientific program relating to the management of the Delta.

The bill would require the State Water Resources Control Board to establish an effective system of Delta watershed diversion data collection and public reporting by December 31, 2010. The bill would require the board to develop new flow criteria for the Delta ecosystem, as specified. The board would be required to submit those determinations to the council. The bill would require the board, in consultation with the council, to appoint a special master for the Delta, referred to as the Delta Watermaster. The bill would grant specified authority to the Delta Watermaster.

(3) The California Bay-Delta Authority Act establishes the California Bay-Delta Authority in the Resources Agency. The act requires the authority and the implementing agencies to carry out programs, projects, and activities necessary to implement the Bay-Delta Program, defined to mean those projects, programs, commitments, and other actions that address the goals and objectives of the CALFED Bay-Delta Programmatic Record of Decision, dated August 28, 2000, or as it may be amended.

This bill would repeal that act. The bill would impose requirements on the council in connection with the repeal of that act.

(4) Existing law requires the Department of Water Resources to convene an independent technical panel to provide information to the department and the Legislature on new demand management measures, technologies, and approaches. “Demand management measures” means those water conservation measures, programs, and incentives that prevent the waste of water and promote the reasonable and efficient use and reuse of available supplies.

This bill would require the state to achieve a 20% reduction in urban per capita water use in California by December 31, 2020. The state would be required to make incremental progress towards this goal by reducing per capita water use by at least 10% on or before December 31, 2015. The bill would require each urban retail water supplier to develop urban water use targets and an interim urban water use target, in accordance with specified requirements. The bill would require agricultural water suppliers to implement efficient water management practices. The bill would require the department, in consultation with other state agencies, to develop a single standardized water use reporting form. The bill, with certain exceptions, would condition eligibility for certain water management grants or loans to urban water suppliers, beginning July 1, 2016, and agricultural water suppliers, beginning July 1, 2013, on the implementation of water conservation

requirements established by the bill. The bill would repeal on July 1, 2016, an existing requirement that conditions eligibility for certain water management grants or loans to an urban water supplier on the implementation of certain water demand management measures.

(5) Existing law, until January 1, 1993, and thereafter only as specified, requires certain agricultural water suppliers to prepare and adopt water management plans.

This bill would substantially revise existing law relating to agricultural water management planning to require agricultural water suppliers to prepare and adopt agricultural water management plans with specified components on or before December 31, 2012, and update those plans on or before December 31, 2015, and on or before December 31 every 5 years thereafter. An agricultural water supplier that becomes an agricultural water supplier after December 31, 2012, would be required to prepare and adopt an agricultural water management plan within one year after becoming an agricultural water supplier. The agricultural water supplier would be required to notify each city or county within which the supplier provides water supplies with regard to the preparation or review of the plan. The bill would require the agricultural water supplier to submit copies of the plan to the department and other specified entities. The bill would provide that an agricultural water supplier is ineligible to receive specified state funds if the supplier does not prepare, adopt, and submit the plan in accordance with the requirements established by the bill.

(6) Existing law generally prohibits the state, or a county, city, district, or other political subdivision, or any public officer or body acting in its official capacity on behalf of any of those entities, from being required to pay any fee for the performance of an official service. Existing law exempts from this provision any fee or charge for official services required pursuant to specified provisions of law relating to water use or water quality.

This bill would expand the exemption to other provisions relating to water use, including provisions that require the payment of fees to the State Water Resources Control Board for official services relating to statements of water diversion and use.

(7) The California Constitution requires the reasonable and beneficial use of water. Under the public trust doctrine, the board, among other state agencies, is required to take the public trust into account in the planning and allocation of water resources and to protect the public trust whenever feasible. The board and the California regional water

quality control boards (regional boards) are required to set forth water quality objectives in state and regional water quality control plans. Existing law establishes the Water Rights Fund, which consists of various fees and penalties. The moneys in the Water Rights Fund are available, upon appropriation by the Legislature, for the administration of the board's water rights program.

This bill would authorize the board to issue, on its own motion or upon the petition of an interested party, an interim relief order in appropriate circumstances to implement or enforce these and related provisions of law. A person or entity that violates any interim relief order issued by the board would be liable to the board for a civil penalty in an amount not to exceed \$5,000 for each day in which a violation occurs. These funds would be deposited in the Water Rights Fund.

(8) Existing law authorizes the State Water Resources Control Board to investigate all streams, stream systems, lakes, or other bodies of water, take testimony relating to the rights to water or the use of water, and ascertain whether water filed upon or attempted to be appropriated is appropriated under the laws of the state. Existing law requires the board to take appropriate actions to prevent waste or the unreasonable use of water. Under existing law, the board makes determinations with regard to the availability of recycled water.

This bill would authorize the board, in conducting an investigation or proceeding for these purposes, to order any person or entity that diverts water or uses water to submit, under penalty of perjury, any technical or monitoring report related to the diversion or use of water by that person or entity. By expanding the definition of the crime of perjury, the bill would impose a state-mandated local program. The bill would authorize the board, in connection with the investigation or proceeding, to inspect the facilities of any person or entity to determine compliance with specified water use requirements.

(9) Existing law authorizes the State Water Resources Control Board, upon the submission of a petition signed by a claimant to water of any stream system requesting a determination of rights among the claimants to that water, to enter an order granting the petition. After granting the petition, the board is required to investigate the stream system to gather information necessary to make a determination of the water rights of that stream system.

This bill would authorize the board to initiate a determination of rights under its own motion if after a hearing it finds that the public interest and necessity will be served by a determination of rights.

(10) Existing law declares that the diversion or use of water other than as authorized by specified provisions of law is a trespass. Existing law authorizes the administrative imposition of civil liability by the board for a trespass in an amount not to exceed \$500 for each day in which the trespass occurs. Moneys generated by the imposition of civil liability under these provisions are deposited in the Water Rights Fund.

This bill would provide that a person or entity committing a trespass may be liable in an amount not to exceed the sum of \$1,000 for each day in which the trespass occurs and \$1,000 for each acre-foot of water diverted or used other than as authorized by those specified provisions of law.

(11) Existing law, with certain exceptions, requires each person who, after December 31, 1965, diverts water to file with the board a statement of diversion and use.

This bill would establish a rebuttable presumption, in any proceeding before the board in which it is alleged that an appropriative right has ceased or is subject to prescribed action, that no use required to be included in a statement of diversion and use occurred unless that use is included in a statement that is submitted to the board within a specified time period.

The bill would require a person who files a statement of diversion and use, and certain petitions involving a change in a water right, to pay an annual fee, for deposit in the Water Rights Fund. The bill would include as recoverable costs, for which the board may be reimbursed from the fund upon appropriation therefor, costs incurred in connection with carrying out requirements relating to the statements of diversion and use and the performance of duties under the public trust doctrine and provisions that require the reasonable use of water.

(12) Existing law authorizes the State Water Resources Control Board to issue a cease and desist order against a person who is violating, or threatening to violate, certain requirements, including requirements set forth in a decision or order relating to the unauthorized use of water. Any person who violates a cease and desist order may be liable in an amount not to exceed \$1,000 for each day in which the violation occurs. Revenue generated from these penalties is deposited in the Water Rights Fund.

This bill would authorize the board to issue a cease and desist order in response to a violation of certain requirements relating to the unauthorized diversion or use of water or of a reporting or monitoring requirement established under a decision, order, or regulation adopted

by the board pursuant to various provisions of law, including the public trust doctrine. The bill would increase the civil penalties that apply to a person who violates a cease and desist order by subjecting a violator to a civil penalty in an amount not to exceed the sum of \$2,500 for each day in which the violation occurs and \$2,500 for each acre-foot of water diverted or used in violation of the cease and desist order.

The bill would impose civil liability, in an amount not to exceed \$500 for each day in which a violation occurs, for a failure to comply with various reporting or monitoring requirements, including requirements imposed pursuant to the public trust doctrine. The bill would authorize the board to impose additional civil liability, in an amount not to exceed \$500 for each day in which a violation occurs, for the violation of a permit, license, certificate, or registration, or an order or regulation involving the unreasonable use of water. Funds derived from the imposition of these civil penalties would be deposited in the Water Rights Fund.

The bill would require the board to adjust for inflation, by January 1 of each year, beginning in 2011, the amounts of civil and administrative liabilities or penalties imposed by the board in water right actions, as specified.

The bill would require that, in a proceeding before the board in which it is alleged that an appropriative water right has ceased, or is subject to prescribed action, there would be a rebuttable presumption that no use occurred on or after January 1, 2009, unless that diversion or use was reported to the board within six months after it is required to be filed with the board.

(13) Existing law authorizes a local agency whose service area includes a groundwater basin that is not subject to groundwater management to adopt and implement a groundwater management plan pursuant to certain provisions of law. Existing law requires a groundwater management plan to include certain components to qualify as a plan for the purposes of those provisions, including a provision that establishes funding requirements for the construction of certain groundwater projects.

This bill would establish a groundwater monitoring program pursuant to which specified entities, in accordance with prescribed procedures, may propose to be designated by the Department of Water Resources as groundwater monitoring entities, as defined, for the purposes of monitoring and reporting with regard to groundwater elevations in all or part of a basin or subbasin, as defined. The bill would require the

department to work cooperatively with each monitoring entity to determine the manner in which groundwater elevation information should be reported to the department. The bill would authorize the department to make recommendations for improving an existing monitoring program, require additional monitoring wells under certain circumstances, and require the department, under prescribed circumstances, to perform groundwater monitoring functions for those portions of a basin or a subbasin for which no monitoring entity has agreed to perform those functions under this program.

(14) Existing law requires the department to conduct an investigation of the state's groundwater basins and to report its findings to the Governor and the Legislature not later than January 1, 1980.

This bill would repeal that provision. The department would be required to conduct an investigation of the state's groundwater basins and to report its findings to the Governor and the Legislature not later than January 1, 2012, and every 5 years thereafter.

(15) Existing law, the Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006, an initiative bond act approved by the voters at the November 7, 2006, statewide general election, authorizes the issuance of bonds in the amount of \$5,388,000,000, of which \$1,000,000,000 is made available to the Department of Water Resources, upon appropriation therefor, to meet the long term water needs of the state. Eligible projects are required to implement integrated regional water management plans and include fisheries restoration and protection projects. A portion of these funds may be expended directly or granted by the department to address multiregional needs or issues of statewide significance.

This bill would appropriate \$28,000,000 of these funds to the department for the department to expend, as specified, on the Two-Gates Fish Protection Demonstration Program managed by the United States Bureau of Reclamation.

(16) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains

costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

~~(1) The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in blighted areas in those communities known as project areas. Section 16 of Article XVI of the California Constitution authorizes a redevelopment agency to receive funding through tax increments attributable to increases in assessed property tax valuation of property in a project area due to redevelopment. Not less than 20% of tax increments generated from a project area are required to be used by a redevelopment agency to increase and improve the community's supply of low- and moderate-income housing. Redevelopment agencies are required in the 2009–10 fiscal year to remit to the county auditor an amount of revenue for deposit in the Supplemental Educational Revenue Augmentation Fund in each county for allocation to school entities. Existing law authorizes the agency, in order to make the full allocation, to borrow the amount required to be allocated to the Low and Moderate Income Housing Fund, pursuant to existing law, unless executed contracts exist that would be impaired if the agency reduced the amount allocated to the Low and Moderate Income Housing Fund.~~

~~This bill would additionally authorize an agency, in order to make the required allocation to the county Supplemental Educational Revenue Augmentation Fund, to borrow any moneys in the Low and Moderate Income Housing Fund.~~

~~(2) Under existing law, the amount of revenue a redevelopment agency is required to remit to the county auditor during the 2009–10 and 2010–11 fiscal years is determined in accordance with specified calculations made by the Director of Finance and is based, in part, on a specified report of the Controller.~~

~~This bill would make an adjustment to the calculation made by the Director of Finance with respect to a redevelopment agency that, prior to August 1, 2009, deleted territory from any project area and reported to the State Board of Equalization in accordance with existing law and that deletion is not reflected in certain described reports. The bill would also authorize the director to use equivalent amounts reported in the 2007–08 edition of the specified report of the Controller if the 2007–08 edition is available at the time the required determinations are made.~~

~~(3) This bill would declare that it is to take effect immediately as an urgency statute.~~

Vote: $\frac{2}{3}$ -majority. Appropriation: ~~no~~-yes. Fiscal committee: yes.
State-mandated local program: ~~no~~-yes.

40 harm, the necessity for relief, and any appropriate measure to

1 *minimize any adverse effects of providing interim relief. Except*
2 *where relief is limited to requirements for submission of reports,*
3 *participation in studies, or environmental documentation, the*
4 *board shall not order interim relief except upon a showing of both*
5 *reasonable probability of success on the merits and that the*
6 *hardship from denying interim relief outweighs any harm caused*
7 *by granting interim relief.*

8 *1111. (a) As part of the interim relief order, the board may*
9 *require the water diverter or user to do any of the following:*

10 *(1) Cease all harmful practices.*

11 *(2) Employ specific procedures and operations to prevent or*
12 *mitigate the harm.*

13 *(3) Complete technical and monitoring work and prepare and*
14 *submit reports on that work, including draft environmental*

17 *determines are reasonably necessary to evaluate the impact of the*
18 *diversion or use that is the subject of the proceeding.*

19 *(5) Reimburse the board's expenses for the preparation of any*
20 *necessary environmental documentation.*

21 *(6) Take other required action.*

25 *changes or other actions which are appropriate under the*

27 *or changes in the schedule.*

28 *1112. If the board orders interim relief, the board shall set a*
29 *schedule, as soon as reasonably possible, for the board's*
30 *consideration of permanent relief. The schedule shall include*
31 *actions that the water diverter or user is required to undertake to*
32 *ensure timely consideration of the permanent relief. The actions*
33 *required of the water diverter or user may include, but are not*
34 *limited to, the completion of technical and monitoring work, the*
35 *preparation and submittal of reports on that work, including draft*

11 *or prevent harm to environmental resources, and the benefits*
12 *provided or harm prevented outweighs any adverse risks that may*
13 *result from providing interim relief. If the board makes a finding*
14 *pursuant to this paragraph, the board shall also adopt the finding*
15 *or findings specified in Section 21081 of the Public Resources*
16 *Code.*

17 *(b) Any findings of the board pursuant to this section shall be*
18 *supported by substantial evidence in the record. If the board makes*
19 *the findings specified in paragraph (1) of subdivision (a) of Section*
20 *21081 of the Public Resources Code, or if the board finds that*
21 *providing interim relief will not have a significant adverse effect*
22 *on the environment because any potentially significant adverse*
23 *effect will be avoided as a result of mitigation incorporated in the*
24 *board's order, the board shall adopt a reporting and monitoring*
25 *program in accordance with Section 21081.6 of the Public*
26 *Resources Code.*

27 *(c) Sections 21167, 21167.1, 21167.4, 21167.5, 21167.6,*

33 *1114. The board may review and revise any part of an interim*
34 *relief order at any time after notice to all interested parties and*
35 *an opportunity for hearing.*

36 *1115. The issuance or denial of an interim relief order by the*
37 *board shall not be deemed to alter the burdens of proof or the*
38 *burdens of coming forward, with respect to the board's final*
39 *decision on the merits in the proceeding in which interim relief is*
40 *requested.*

1 1116. *This chapter is not a limitation on the jurisdiction of any*
2 *court or agency over any matter within that court's or agency's*
3 *jurisdiction.*

4 1117. *If any water diverter or user fails to comply with any*
5 *part of an interim relief order, the Attorney General, upon the*
6 *request of the board, shall petition the superior court for the*

23 *which the violation occurs, and any corrective action undertaken*
24 *by the violator.*

25 (c) *Funds derived from civil penalties assessed pursuant to this*
26 *section shall be deposited in the Water Rights Fund.*

6 (3) If the board provides notice to persons who file statements
7 under this part, the notice shall not be determined to be inadequate
8 on the basis that notice was not received by a person, other than a
9 party to whom the board’s action is directed, who fails to file a
10 statement required to be filed under this part.

11 (4) This subdivision does not affect the requirement in Section
12 2527 to provide notice to all persons who own land that appears
13 to be riparian to the stream system.

14 (c) In any proceeding before the board to determine whether an
15 application for a permit to appropriate water should be approved,
16 any statement submitted under this part or determination by the
17 board pursuant to Section 5105 is evidence of the facts stated
18 therein.

19 (d) (1) *In any proceeding before the board in which it is alleged*
20 *that an appropriative right has ceased or is subject to forfeiture*
21 *for nonuse because water has not been put to beneficial use, there*
22 *shall be a rebuttable presumption that no use required to be*
23 *included in a statement submitted under this part occurred unless*
24 *that use is included in a statement submitted under this part and*
25 *that the statement is submitted within six months after it is required*
26 *to be filed with the board.*

27 (2) *Paragraph (1) does not apply to any use that occurred before*
28 *January 1, 2009.*

29 SEC. 62. *Part 2.55 (commencing with Section 10608) is added*
30 *to Division 6 of the Water Code, to read:*

31

32 *PART 2.55. SUSTAINABLE WATER USE AND DEMAND*
33 *REDUCTION*

34

35 *CHAPTER 1. GENERAL DECLARATIONS AND POLICY*

36

37 *10608. The Legislature finds and declares all of the following:*

38 (a) *Water is a public resource that the California Constitution*
39 *protects against waste and unreasonable use.*

1 (b) Growing population, climate change, and the need to protect
2 and grow California's economy while protecting and restoring
3 our fish and wildlife habitats make it essential that the state
4 manage its water resources as efficiently as possible.

5 (c) Diverse regional water supply portfolios will increase water
6 supply reliability and reduce dependence on the Delta.

7 (d) Reduced water use through conservation provides significant
8 energy and environmental benefits, and can help protect water
9 quality, improve streamflows, and reduce greenhouse gas
10 emissions.

11 (e) The success of state and local water conservation programs
12 to increase efficiency of water use is best determined on the basis
13 of measurable outcomes related to water use or efficiency.

14 (f) Improvements in technology and management practices offer
15 the potential for increasing water efficiency in California over
16 time, providing an essential water management tool to meet the
17 need for water for urban, agricultural, and environmental uses.

18 (g) The Governor has called for a 20 percent per capita
19 reduction in urban water use statewide by 2020.

20 (h) The factors used to formulate water use efficiency targets
21 can vary significantly from location to location based on factors
22 including weather, patterns of urban and suburban development,
23 and past efforts to enhance water use efficiency.

24 (i) Per capita water use is a valid measure of a water provider's
25 efforts to reduce urban water use within its service area. However,
26 per capita water use is less useful for measuring relative water
27 use efficiency between different water providers. Differences in
28 weather, historical patterns of urban and suburban development,
29 and density of housing in a particular location need to be
30 considered when assessing per capita water use as a measure of
31 efficiency.

32 10608.4. It is the intent of the Legislature, by the enactment of
33 this part, to do all of the following:

34 (a) Require all water suppliers to increase the efficiency of use
35 of this essential resource.

36 (b) Establish a framework to meet the state targets for urban
37 water conservation identified in this part and called for by the
38 Governor.

39 (c) Measure increased efficiency of urban water use on a per
40 capita basis.

1 (d) Establish a method or methods for urban retail water
2 suppliers to determine targets for achieving increased water use
3 efficiency by the year 2020, in accordance with the Governor's
4 goal of a 20-percent reduction.

5 (e) Establish consistent water use efficiency planning and
6 implementation standards for urban water suppliers and
7 agricultural water suppliers.

8 (f) Promote urban water conservation standards that are
9 consistent with the California Urban Water Conservation Council's
10 adopted best management practices and the requirements for
11 demand management in Section 10631.

12 (g) Establish standards that recognize and provide credit to
13 water suppliers that made substantial capital investments in urban
14 water conservation since the drought of the early 1990s.

15 (h) Recognize and account for the investment of urban retail
16 water suppliers in providing recycled water for beneficial uses.

17 (i) Require implementation of specified efficient water
18 management practices for agricultural water suppliers.

19 (j) Support the economic productivity of California's
20 agricultural, commercial, and industrial sectors.

21 (k) Advance regional water resources management.

22 10608.8. (a) Water use efficiency measures adopted and
23 implemented pursuant to this part are water conservation measures
24 subject to the protections provided under Section 1011.

25 (b) This part does not limit or otherwise affect the application
26 of Chapter 3.5 (commencing with Section 11340), Chapter 4
27 (commencing with Section 11370), Chapter 4.5 (commencing with
28 Section 11400), and Chapter 5 (commencing with Section 11500)
29 of Part 1 of Division 3 of Title 2 of the Government Code.

30 (c) This part does not require a reduction in the total water used
31 in the agricultural or urban sectors, because other factors,
32 including, but not limited to, changes in agricultural economics
33 or population growth may have greater effects on water use. This
34 part does not limit the economic productivity of California's
35 agricultural, commercial, or industrial sectors.

36 (d) The requirements of this part do not apply to an agricultural
37 water supplier that is a party to the Quantification Settlement
38 Agreement, as defined in subdivision (a) of Section 1 of Chapter
39 617 of the Statutes of 2002, during the period within which the
40 Quantification Settlement Agreement remains in effect. After the

1 *expiration of the Quantification Settlement Agreement, to the extent*
2 *conservation water projects implemented as part of the*
3 *Quantification Settlement Agreement remain in effect, the*
4 *conserved water created as part of those projects shall be credited*
5 *against the obligations of the agricultural water supplier pursuant*
6 *to this part.*

7

CHAPTER 3. URBAN RETAIL WATER SUPPLIERS

9

10 10608.16. (a) The state shall achieve a 20-percent reduction
11 in urban per capita water use in California on or before December
12 31, 2020.

13 (b) The state shall make incremental progress towards the state
14 target specified in subdivision (a) by reducing per capita water
15 use by at least 10 percent on or before December 31, 2015.

16 10608.20. (a) (1) Each urban retail water supplier shall
17 develop urban water use targets and an interim urban water use
18 target by December 31, 2010. Urban retail water suppliers may
19 elect to determine and report progress toward achieving these
20 targets on an individual or regional basis, as provided in
21 subdivision (a) of Section 10608.28, and may determine the targets
22 on a fiscal year or calendar year basis.

23 (2) It is the intent of the Legislature that the urban water use
24 targets described in subdivision (a) cumulatively result in a
25 20-percent reduction from the baseline daily per capita water use
26 by 2020.

27 (b) An urban retail water supplier shall adopt one of the
28 following methods for determining its urban water use target
29 pursuant to subdivision (a):

30 (1) Eighty percent of the urban retail water supplier’s baseline
31 per capita daily water use.

32 (2) The per capita daily water use that is estimated using the
33 sum of the following performance standards:

34 (A) For indoor residential water use, 55 gallons per capita daily
35 water use as a provisional standard. Upon completion of the
36 department’s 2016 report to the Legislature pursuant to Section
37 10608.42, this standard may be adjusted by the Legislature by
38 statute.

39 (B) For landscape irrigated through dedicated or residential
40 meters or connections, water efficiency equivalent to the standards

1 of the Model Water Efficient Landscape Ordinance set forth in
2 Chapter 2.7 (commencing with Section 490) of Division 2 of Title
3 23 of the California Code of Regulations, as in effect the later of
4 the year of the landscape's installation or 1992. An urban retail
5 water supplier using the approach specified in this subparagraph
6 shall use satellite imagery, site visits, or other best available
7 technology to develop an accurate estimate of landscaped areas.

8 (C) For commercial, industrial, and institutional uses, a
9 10-percent reduction in water use from the baseline commercial,
10 industrial, and institutional water use by 2020.

11 (3) Ninety-five percent of the applicable state hydrologic region
12 target, as set forth in the state's draft 20x2020 Water Conservation
13 Plan (dated April 30, 2009). If the service area of an urban water
14 supplier includes more than one hydrologic region, the supplier
15 shall apportion its service area to each region based on population
16 or area.

17 (c) An urban retail water supplier shall include in its urban
18 water management plan required pursuant to Part 2.6
19 (commencing with Section 10610) due in 2010 the baseline daily
20 per capita water use, urban water use target, interim urban water
21 use target, and compliance daily per capita water use, along with
22 the bases for determining those estimates, including references to
23 supporting data.

24 (d) When calculating per capita values for the purposes of this
25 chapter, an urban retail water supplier shall determine population
26 using federal, state, and local population reports and projections.

27 (e) An urban retail water supplier may update its 2020 urban
28 water use target in its 2015 urban water management plan required
29 pursuant to Part 2.6 (commencing with Section 10610).

30 (f) (1) The department shall, through a public process and in
31 consultation with the California Urban Water Conservation
32 Council, develop technical methodologies for the consistent
33 implementation of this part, including, but not limited to,
34 methodologies for calculating base daily per capita water use,
35 baseline commercial, industrial, and institutional water use,
36 compliance daily per capita water use, gross water use, service
37 area population, indoor residential water use, and landscaped
38 area, and criteria for adjustments pursuant to subdivisions (d) and
39 (e) of Section 10608.24. The department shall post these
40 methodologies on its Internet Web site, and make written copies

1 available, by October 1, 2010. An urban retail water supplier shall
2 use the methods developed by the department in compliance with
3 this part.

4 (2) An urban retail water supplier shall be granted an extension
5 to July 1, 2011, for adoption of an urban water management plan
6 pursuant to Part 2.6 (commencing with Section 10610) due in 2010
7 to allow use of technical methodologies developed by the
8 department under paragraph (1). An urban retail water supplier
9 that adopts an urban water management plan due in 2010 that
10 does not use the methodologies developed by the department shall
11 amend the plan by July 1, 2011, in order to be in compliance with
12 this part.

13 10608.22. Notwithstanding the method adopted by an urban
14 retail water supplier pursuant to Section 10608.20, an urban retail
15 water supplier's per capita daily water use reduction shall be no
16 less than 5 percent of base daily per capita water use as defined
17 in paragraph (3) of subdivision (b) of Section 10608.12. This
18 section does not apply to an urban retail water supplier with a
19 base daily per capita water use at or below 100 gallons per capita
20 per day.

21 10608.24. (a) Each urban retail water supplier shall meet its
22 interim urban water use target by December 31, 2015.

23 (b) Each urban retail water supplier shall meet its urban water
24 use target by December 31, 2020.

25 (c) An urban retail water supplier's compliance daily per capita
26 water use shall be the measure of progress toward achievement
27 of its urban water use target.

28 (d) (1) When determining compliance daily per capita water
29 use, an urban retail water supplier may consider the following
30 factors:

31 (A) Differences in evapotranspiration and rainfall in the baseline
32 period compared to the compliance reporting period.

33 (B) Substantial changes to commercial or industrial water use
34 resulting from increased business output and economic
35 development that have occurred during the reporting period.

36 (C) Substantial changes to institutional water use resulting from
37 fire suppression services or other extraordinary events, or from
38 new or expanded operations, that have occurred during the
39 reporting period.

1 (2) *If the urban retail water supplier elects to adjust its estimate*
2 *of compliance daily per capita water use due to one or more of*
3 *the factors described in paragraph (1), it shall provide the basis*
4 *for, and data supporting, the adjustment in the report required by*
5 *Section 10608.40.*

6 (e) *When determining gross water use, an urban retail water*
7 *supplier that has a substantial percentage of industrial water use*
8 *in its service area, may exclude process water in order to avoid a*
9 *disproportionate burden on another customer sector.*

10 (f) (1) *An urban retail water supplier that includes agricultural*
11 *water use in an urban water management plan pursuant to Part*
12 *2.6 (commencing with Section 10610) may include the agricultural*
13 *water use in determining gross water use. An urban retail water*
14 *supplier that includes agricultural water use in determining gross*
15 *water use and develops its urban water use target pursuant to*
16 *paragraph (2) of subdivision (b) of Section 10608.20 shall use a*
17 *water efficient standard for agricultural irrigation of 100 percent*
18 *of reference evapotranspiration multiplied by the crop coefficient*
19 *for irrigated acres.*

20 (2) *An urban retail water supplier, that is also an agricultural*
21 *water supplier, is not subject to the requirements of Chapter 4*
22 *(commencing with Section 10608.48), if the agricultural water use*
23 *is incorporated into its urban water use target pursuant to*
24 *paragraph (1).*

25 10608.26. (a) *In complying with this part, an urban retail*
26 *water supplier shall conduct at least one public hearing to*
27 *accomplish all of the following:*

28 (1) *Allow community input regarding the urban retail water*
29 *supplier's implementation plan for complying with this part.*

30 (2) *Consider the economic impacts of the urban retail water*
31 *supplier's implementation plan for complying with this part.*

32 (3) *Adopt a method, pursuant to subdivision (b) of Section*
33 *10608.20, for determining its urban water use target.*

34 (b) *In complying with this part, an urban retail water supplier*
35 *shall avoid placing a disproportionate burden on any customer*
36 *sector.*

37 (c) *For an urban retail water supplier that supplies water to a*
38 *Department of Defense military installation, the urban retail water*
39 *supplier's implementation plan for complying with this part shall*

1 *consider the Department of Defense military installation's*
2 *requirements under federal Executive Order 13423.*

3 *(d) (1) An urban retail water supplier shall not require*
4 *customers to undertake changes in product formulation, operations,*
5 *or equipment that would reduce process water use, but may provide*
6 *technical assistance and financial incentives to those customers*
7 *to implement efficiency measures for process water.*

8 *(2) This part shall not be construed, or enforced so as, to*
9 *interfere with the requirements of Section 110105 of the Health*
10 *and Safety Code, or any requirement or standard for the protection*
11 *of public health, public safety, or worker safety established by*
12 *federal, state, or local governments or recommended by recognized*
13 *standard setting organizations or trade associations.*

14 *10608.28. (a) An urban retail water supplier may meet its*
15 *urban water use target within its retail service area, or through*
16 *mutual agreement, by any of the following:*

17 *(1) Through an urban wholesale water supplier.*

18 *(2) Through a regional agency authorized to plan and implement*
19 *water conservation, including, but not limited to, an agency*
20 *established under the Bay Area Water Supply and Conservation*
21 *Agency Act (Division 31 (commencing with Section 81300)).*

22 *(3) Through a regional water management group.*

23 *(4) By an integrated regional water management funding area.*

24 *(5) By hydrologic region.*

25 *(6) Through other appropriate geographic scales for which*
26 *computation methods have been developed by the department.*

27 *(b) An urban retail water supplier may meet its urban water*
28 *use target entirely through efficiency gains in its residential water*
29 *use sector, entirely through efficiency gains in its landscape water*
30 *use sector, entirely through efficiency gains in its commercial,*
31 *institutional, and industrial sector, or through any combination*
32 *among these sectors.*

33 *10608.32. All costs incurred pursuant to this part by a water*
34 *utility regulated by the Public Utilities Commission may be*
35 *recoverable in rates subject to review and approval by the Public*
36 *Utilities Commission, and may be recorded in a memorandum*
37 *account and reviewed for reasonableness by the Public Utilities*
38 *Commission.*

39 *10608.36. Urban wholesale water suppliers shall include in*
40 *the urban water management plans required pursuant to Part 2.6*

1 (commencing with Section 10610) an assessment of their present
2 and proposed future measures, programs, and policies to help
3 achieve the water use reductions required by this part.

4 10608.40. Urban water retail suppliers shall report to the
5 department on their progress in meeting their urban water use
6 targets as part of their urban water management plans submitted
7 pursuant to Section 10631. The data shall be reported using a
8 standardized form developed pursuant to Section 10608.52.

9 10608.42. The department shall review the 2015 urban water
10 management plans and report to the Legislature by December 31,
11 2016, on progress towards achieving a 20-percent reduction in
12 urban water use by 2020. The report shall include
13 recommendations on changes to water efficiency standards or
14 urban water use targets in order to achieve the 20-percent
15 reduction and to reflect updated efficiency information and
16 technology changes.

17 10608.43. The department shall, in conjunction with the
18 California Urban Water Conservation Council, by April 1, 2010,
19 convene a representative task force consisting of academic experts,
20 urban retail water suppliers, environmental organizations,
21 commercial water users, industrial water users, and institutional
22 water users to develop alternative best management practices for
23 commercial, industrial, and institutional users and an assessment
24 of the potential statewide reduction in water use in the commercial,
25 industrial, and institutional sectors that would result from
26 implementation of these best management practices. The task force
27 shall submit a report to the Legislature by April 1, 2012, that shall
28 include a review of multiple sectors within commercial, industrial,
29 and institutional users and that shall establish water use efficiency
30 standards for commercial, industrial, and institutional users among
31 various sectors of water use. The report shall include, but not be
32 limited to, the following:

33 (a) Appropriate metrics for evaluating commercial, industrial,
34 and institutional water use.

35 (b) Evaluation of water demands for manufacturing processes,
36 goods, and cooling.

37 (c) Evaluation of public infrastructure necessary for delivery
38 of recycled water to the commercial, industrial, and institutional
39 sectors.

1 (d) Evaluation of institutional and economic barriers to
 2 increased recycled water use within the commercial, industrial,
 3 and institutional sectors.

4 (e) Identification of technically feasible best management
 5 practices to achieve more efficient water use statewide in the
 6 commercial, industrial, and institutional sectors that is consistent
 7 with the public interest and reflects past investments in water use
 8 efficiency.

9 10608.44. Each state agency shall reduce water use on facilities
 10 it operates to support urban retail water suppliers in meeting the
 11 target identified in Section 10608.16.

15 10608.48. (a) On or before July 31, 2012, an agricultural
 16 water supplier shall implement efficient water management
 17 practices pursuant to subdivisions (b) and (c).

18 (b) Agricultural water suppliers shall implement all of the
 19 following critical efficient management practices:

20 (1) Measure the volume of water delivered to customers with
 21 sufficient accuracy to comply with subdivision (a) of Section 531.10
 22 and to implement volumetric pricing pursuant to paragraph (2).

23 (2) Adopt a pricing structure for water customers based at least
 24 in part on quantity delivered.

25 (c) Agricultural water suppliers shall implement additional
 26 efficient management practices, including, but not limited to,
 27 practices to accomplish all of the following, if the measures are
 28 locally cost effective and technically feasible:

29 (1) Facilitate alternative land use for lands with exceptionally
 30 high water duties or whose irrigation contributes to significant
 31 problems, including drainage.

32 (2) Facilitate use of available recycled water that otherwise
 33 would not be used beneficially, meets all health and safety criteria,
 34 and does not harm crops or soils.

35 (3) Facilitate the financing of capital improvements for on-farm
 36 irrigation systems.

37 (4) Implement an incentive pricing structure that promotes one
 38 or more of the following goals:

39 (A) More efficient water use at the farm level.

40 (B) Conjunctive use of groundwater.

- 1 (C) *Appropriate increase of groundwater recharge.*
- 2 (D) *Reduction in problem drainage.*
- 3 (E) *Improved management of environmental resources.*
- 4 (F) *Effective management of all water sources throughout the*
- 5 *year by adjusting seasonal pricing structures based on current*
- 6 *conditions.*
- 7 (5) *Expand line or pipe distribution systems, and construct*
- 8 *regulatory reservoirs to increase distribution system flexibility*
- 9 *and capacity, decrease maintenance, and reduce seepage.*
- 10 (6) *Increase flexibility in water ordering by, and delivery to,*
- 11 *water customers within operational limits.*
- 12 (7) *Construct and operate supplier spill and tailwater recovery*
- 13 *systems.*
- 14 (8) *Increase planned conjunctive use of surface and groundwater*
- 15 *within the supplier service area.*
- 16 (9) *Automate canal control structures.*
- 17 (10) *Facilitate or promote customer pump testing and*
- 18 *evaluation.*
- 19 (11) *Designate a water conservation coordinator who will*
- 20 *develop and implement the water management plan and prepare*
- 21 *progress reports.*
- 22 (12) *Provide for the availability of water management services*
- 23 *to water users. These services may include, but are not limited to,*
- 24 *all of the following:*
- 25 (A) *On-farm irrigation and drainage system evaluations.*
- 26 (B) *Normal year and real-time irrigation scheduling and crop*
- 27 *evapotranspiration information.*
- 28 (C) *Surface water, groundwater, and drainage water quantity*
- 29 *and quality data.*
- 30 (D) *Agricultural water management educational programs and*
- 31 *materials for farmers, staff, and the public.*
- 32 (13) *Evaluate the policies of agencies that provide the supplier*
- 33 *with water to identify the potential for institutional changes to*
- 34 *allow more flexible water deliveries and storage.*
- 35 (14) *Evaluate and improve the efficiencies of the supplier's*
- 36 *pumps.*
- 37 (d) *Agricultural water suppliers shall include in the agricultural*
- 38 *water management plans required pursuant to Part 2.8*
- 39 *(commencing with Section 10800) a report on which efficient water*
- 40 *management practices have been implemented and are planned*

1 to be implemented, an estimate of the water use efficiency gains
2 that have occurred since the last report, and an estimate of the
3 water use efficiency gains estimated to occur five and 10 years in
4 the future. If an agricultural water supplier determines that an
5 efficient water management practice is not locally cost effective
6 or technically feasible, the supplier shall submit information
7 documenting that determination.

8 (e) The data shall be reported using a standardized form
9 developed pursuant to Section 10608.52.

10 (f) An agricultural water supplier may meet the requirements
11 of subdivisions (d) and (e) by submitting to the department a water
12 conservation plan submitted to the United States Bureau of
13 Reclamation that meets the requirements described in Section
14 10828.

15 (g) On or before December 31, 2013, December 31, 2016, and
16 December 31, 2021, the department, in consultation with the board,
17 shall submit to the Legislature a report on the agricultural efficient
18 water management practices that have been implemented and are
19 planned to be implemented and an assessment of the manner in
20 which the implementation of those efficient water management
21 practices has affected and will affect agricultural operations,
22 including estimated water use efficiency gains, if any.

23 (h) The department may update the efficient water management
24 practices required pursuant to subdivisions (b) and (c), in
25 consultation with the Agricultural Water Management Council,
26 the United States Bureau of Reclamation, and the board. All
27 efficient water management practices for agricultural water use
28 pursuant to this chapter shall be adopted or revised by the
29 department only after the department conducts public hearings to
30 allow participation of the diverse geographical areas and interests
31 of the state.

32

33 *CHAPTER 5. SUSTAINABLE WATER MANAGEMENT*

34

35 10608.50. (a) The department, in consultation with the board,
36 shall promote implementation of regional water resource
37 management practices through increased incentives and removal
38 of barriers consistent with state and federal law. Potential changes
39 may include, but are not limited to, all of the following:

1 (1) Revisions to the requirements for urban and agricultural
2 water management plans.

3 (2) Revisions to the requirements for integrated regional water
4 management plans.

5 (3) Revisions to the eligibility for state water management grants
6 and loans.

7 (4) Revisions to state or local permitting requirements that
8 increase water supply opportunities, but do not weaken water
9 quality protection under state and federal law.

10 (5) Increased funding for research, feasibility studies, and
11 project construction.

12 (6) Expanding technical and educational support for local land
13 use and water management agencies.

14 (b) No later than January 1, 2011, and updated as part of the
15 California Water Plan, the department, in consultation with the
16 board, and with public input, shall propose new statewide targets,
17 or review and update existing statewide targets, for regional water
18 resources management practices, including, but not limited to,
19 recycled water, brackish groundwater desalination, and infiltration
20 and direct use of urban stormwater runoff.

21
22 *CHAPTER 5.5. STANDARDIZED DATA COLLECTION*

23
24 10608.52. (a) The department, in consultation with the board,
25 the California Bay-Delta Authority or its successor agency, the
26 State Department of Public Health, and the Public Utilities
27 Commission, shall develop a single standardized water use
28 reporting form to meet the water use information needs of each
29 agency, including the needs of urban water suppliers that elect to
30 determine and report progress toward achieving targets on a
31 regional basis as provided in subdivision (a) of Section 10608.28.

32 (b) At a minimum, the form shall be developed to accommodate
33 information sufficient to assess an urban water supplier's
34 compliance with conservation targets pursuant to Section 10608.24
35 and an agricultural water supplier's compliance with
36 implementation of efficient water management practices pursuant
37 to subdivision (a) of Section 10608.48. The form shall
38 accommodate reporting by urban water suppliers on an individual
39 or regional basis as provided in subdivision (a) of Section
40 10608.28.

10608.56. (a) Beginning July 1, 2016, the terms of, and eligibility for, a water management grant or loan made to urban retail water suppliers and awarded or administered by the department, board, or California Bay-Delta Authority or its successor agency shall be conditioned on the implementation of Chapter 3 (commencing with Section 10608.16).

(b) Beginning July 1, 2013, the terms of, and eligibility for, a water management grant or loan made to agricultural water suppliers and awarded or administered by the department, board, or California Bay-Delta Authority or its successor agency shall be conditioned on the implementation of Chapter 4 (commencing with Section 10608.48).

(c) Notwithstanding subdivision (a), the department shall determine that an urban retail water supplier is eligible for a water management grant or loan even though the supplier has not met the per capita reductions required pursuant to Section 10608.24, if the urban retail water supplier has submitted to the department for approval a schedule, financing plan, and budget, to be included in the grant or loan agreement, for achieving the per capita reductions. The supplier may request grant or loan funds to achieve the per capita reductions to the extent the request is consistent with the eligibility requirements applicable to the water management funds.

(d) Notwithstanding subdivision (b), the department shall determine that an agricultural water supplier is eligible for a water management grant or loan even though the supplier is not implementing all of the efficient water management practices described in Section 10608.48, if the agricultural water supplier has submitted to the department for approval a schedule, financing plan, and budget, to be included in the grant or loan agreement, for implementation of the efficient water management practices. The supplier may request grant or loan funds to implement the efficient water management practices to the extent the request is consistent with the eligibility requirements applicable to the water management funds.

(e) Notwithstanding subdivision (a), the department shall determine that an urban retail water supplier is eligible for a water management grant or loan even though the supplier has not met

1 *the per capita reductions required pursuant to Section 10608.24,*
2 *if the urban retail water supplier has submitted to the department*
3 *for approval documentation demonstrating that their entire service*
4 *area qualifies as a disadvantaged community.*

5 *(f) The department shall not deny eligibility to an urban retail*
6 *water supplier or agricultural water supplier in compliance with*
7 *the requirements of this part and Part 2.8 (commencing with*
8 *Section 10800), that is participating in a multiagency water project,*
9 *or an integrated regional water management plan, developed*
10 *pursuant to Section 75026 of the Public Resources Code, solely*
11 *on the basis that one or more of the agencies participating in the*
12 *project or plan is not implementing all of the requirements of this*
13 *part or Part 2.8 (commencing with Section 10800).*

14 *10608.60. (a) It is the intent of the Legislature that funds made*
15 *available by Section 75026 of the Public Resources Code should*
16 *be expended, consistent with Division 43 (commencing with Section*
17 *75001) of the Public Resources Code and upon appropriation by*
18 *the Legislature, for grants to implement this part. In the allocation*
19 *of funding, it is the intent of the Legislature that the department*
20 *give consideration to disadvantaged communities to assist in*
21 *implementing the requirements of this part.*

22 *(b) It is the intent of the Legislature that funds made available*
23 *by Section 75041 of the Public Resources Code should be expended*
24 *consistent with Division 43 (commencing with Section 75001) of*
25 *the Public Resources Code and, upon appropriation by the*
26 *Legislature, for direct expenditures to implement this part.*

27

28 *CHAPTER 7. QUANTIFYING AGRICULTURAL WATER USE*
29 *EFFICIENCY*

30

31 *10608.64. The department, in consultation with the Agricultural*
32 *Water Management Council, academic experts, and other*
33 *stakeholders, shall develop a methodology for quantifying the*
34 *efficiency of agricultural water use. Alternatives to be assessed*
35 *shall include, but not be limited to, determination of efficiency*
36 *levels based on crop type or irrigation system distribution*
37 *uniformity. On or before December 31, 2011, the department shall*
38 *report to the Legislature on a proposed methodology and a plan*
39 *for implementation. The plan shall include the estimated*

1 *implementation costs and the types of data needed to support the*
2 *methodology.*

3 *SEC. 63. Section 10631.5 of the Water Code is amended to*
4 *read:*

5 10631.5. (a) (1) Beginning January 1, 2009, the terms of, and
6 eligibility for, a water management grant or loan made to an urban
7 water supplier and awarded or administered by the department,
8 state board, or California Bay-Delta Authority or its successor
9 agency shall be conditioned on the implementation of the water
10 demand management measures described in Section 10631, as
11 determined by the department pursuant to subdivision (b).

12 (2) For the purposes of this section, water management grants
13 and loans include funding for programs and projects for surface
14 water or groundwater storage, recycling, desalination, water
15 conservation, water supply reliability, and water supply
16 augmentation. This section does not apply to water management
17 projects funded by the *federal* American Recovery and
18 Reinvestment Act of 2009 (Public Law 111-5).

19 (3) Notwithstanding paragraph (1), the department shall
20 determine that an urban water supplier is eligible for a water
21 management grant or loan even though the supplier is not
22 implementing all of the water demand management measures
23 described in Section 10631, if the urban water supplier has
24 submitted to the department for approval a schedule, financing
25 plan, and budget, to be included in the grant or loan agreement,
26 for implementation of the water demand management measures.
27 The supplier may request grant or loan funds to implement the
28 water demand management measures to the extent the request is
29 consistent with the eligibility requirements applicable to the water
30 management funds.

31 (4) (A) Notwithstanding paragraph (1), the department shall
32 determine that an urban water supplier is eligible for a water
33 management grant or loan even though the supplier is not
34 implementing all of the water demand management measures
35 described in Section 10631, if an urban water supplier submits to
36 the department for approval documentation demonstrating that a
37 water demand management measure is not locally cost effective.
38 If the department determines that the documentation submitted by
39 the urban water supplier fails to demonstrate that a water demand
40 management measure is not locally cost effective, the department

1 shall notify the urban water supplier and the agency administering
2 the grant or loan program within 120 days that the documentation
3 does not satisfy the requirements for an exemption, and include
4 in that notification a detailed statement to support the
5 determination.

6 (B) For purposes of this paragraph, “not locally cost effective”
7 means that the present value of the local benefits of implementing
8 a water demand management measure is less than the present value
9 of the local costs of implementing that measure.

10 (b) (1) The department, in consultation with the state board and
11 the California Bay-Delta Authority or its successor agency, and
12 after soliciting public comment regarding eligibility requirements,
13 shall develop eligibility requirements to implement the requirement
14 of paragraph (1) of subdivision (a). In establishing these eligibility
15 requirements, the department shall do both of the following:

16 (A) Consider the conservation measures described in the
17 Memorandum of Understanding Regarding Urban Water
18 Conservation in California, and alternative conservation approaches
19 that provide equal or greater water savings.

20 (B) Recognize the different legal, technical, fiscal, and practical
21 roles and responsibilities of wholesale water suppliers and retail
22 water suppliers.

23 (2) (A) For the purposes of this section, the department shall
24 determine whether an urban water supplier is implementing all of
25 the water demand management measures described in Section
26 10631 based on either, or a combination, of the following:

27 (i) Compliance on an individual basis.

28 (ii) Compliance on a regional basis. Regional compliance shall
29 require participation in a regional conservation program consisting
30 of two or more urban water suppliers that achieves the level of
31 conservation or water efficiency savings equivalent to the amount
32 of conservation or savings achieved if each of the participating
33 urban water suppliers implemented the water demand management
34 measures. The urban water supplier administering the regional
35 program shall provide participating urban water suppliers and the
36 department with data to demonstrate that the regional program is
37 consistent with this clause. The department shall review the data
38 to determine whether the urban water suppliers in the regional
39 program are meeting the eligibility requirements.

1 (B) The department may require additional information for any
2 determination pursuant to this section.

3 (3) The department shall not deny eligibility to an urban water
4 supplier in compliance with the requirements of this section that
5 is participating in a multiagency water project, or an integrated
6 regional water management plan, developed pursuant to Section
7 75026 of the Public Resources Code, solely on the basis that one
8 or more of the agencies participating in the project or plan is not
9 implementing all of the water demand management measures
10 described in Section 10631.

11 (c) In establishing guidelines pursuant to the specific funding
12 authorization for any water management grant or loan program
13 subject to this section, the agency administering the grant or loan
14 program shall include in the guidelines the eligibility requirements
15 developed by the department pursuant to subdivision (b).

16 (d) Upon receipt of a water management grant or loan
17 application by an agency administering a grant and loan program
18 subject to this section, the agency shall request an eligibility
19 determination from the department with respect to the requirements
20 of this section. The department shall respond to the request within
21 60 days of the request.

22 (e) The urban water supplier may submit to the department
23 copies of its annual reports and other relevant documents to assist
24 the department in determining whether the urban water supplier
25 is implementing or scheduling the implementation of water demand
26 management activities. In addition, for urban water suppliers that
27 are signatories to the Memorandum of Understanding Regarding
28 Urban Water Conservation in California and submit biennial reports
29 to the California Urban Water Conservation Council in accordance
30 with the memorandum, the department may use these reports to
31 assist in tracking the implementation of water demand management
32 measures.

33 (f) *This section shall remain in effect only until July 1, 2016,*
34 *and as of that date is repealed, unless a later enacted statute, that*
35 *is enacted before July 1, 2016, deletes or extends that date.*

36 *SEC. 64. Part 2.8 (commencing with Section 10800) of Division*
37 *6 of the Water Code is repealed.*

38 *SEC. 65. Part 2.8 (commencing with Section 10800) is added*
39 *to Division 6 of the Water Code, to read:*

8 CHAPTER 4. MISCELLANEOUS PROVISIONS
9

10 10850. (a) Any action or proceeding to attack, review, set
11 aside, void, or annul the acts or decisions of an agricultural water
12 supplier on the grounds of noncompliance with this part shall be
13 brought pursuant to Section 1085 of the Code of Civil Procedure,
14 and the court's review of compliance or noncompliance with this
15 part shall extend to whether the plan, or portion thereof, or revision

22 be commenced within 120 days after submitting the plan or
23 amendments to the plan to entities in accordance with Section
24 10844 or the taking of that action.

25 (d) In an action or proceeding to attack, review, set aside, void,
26 or annul the acts or decisions of an agricultural water supplier
27 made pursuant to this part at a properly noticed public hearing,
28 the issues raised shall be limited to those raised in the public
29 hearing, or in written correspondence delivered to the agricultural
30 water supplier prior to, or at, the public hearing, except if the
31 court finds either of the following:

32 (1) The issue could not have been raised at the public hearing
33 by a person exercising reasonable diligence.

34 (2) The body conducting the public hearing prevented the issue
35 from being raised at the public hearing.

36 10851. The California Environmental Quality Act (Division
37 13 (commencing with Section 21000) of the Public Resources
38 Code) does not apply to the preparation and adoption of plans
39 pursuant to this part. This part does not exempt projects for

1 *implementation of the plan or for expanded or additional water*
 2 *supplies from the California Environmental Quality Act.*

3 *10852. An agricultural water supplier that does not prepare,*
 4 *adopt, and submit its agricultural water management plan in*
 5 *accordance with this part is ineligible to receive funds made*
 6 *available pursuant to any program administered by the board, the*

21

22 *CHAPTER 1. GENERAL PROVISIONS*

23

24 *10920. (a) It is the intent of the Legislature that on or before*
 25 *January 1, 2012, groundwater elevations in all groundwater basins*
 26 *and subbasins be regularly and systematically monitored locally*
 27 *and that the resulting groundwater information be made readily*
 28 *and widely available.*

29 *(b) It is the intent of the Legislature that, if local groundwater*
 30 *interests are unable or unwilling to perform the monitoring*
 31 *functions described in this part, the department shall assume those*
 32 *monitoring functions and the department shall recover its costs*
 33 *for conducting the necessary monitoring from the local*
 34 *groundwater users.*

35 *(c) It is further the intent of the Legislature that the department*
 36 *continue to maintain its current network of monitoring wells,*
 37 *including groundwater elevation and groundwater quality*
 38 *monitoring wells, and that the department continue to coordinate*
 39 *monitoring with local entities.*

1 10921. This part does not require the monitoring of
2 groundwater elevations in an area that is not within a basin or
3 subbasin.

4 10922. This part does not expand or otherwise affect the powers
5 or duties of the department relating to groundwater beyond those
6 expressly granted by this part.

16 or (d) of Section 10927, the notification shall also include a copy
17 of the current groundwater management plan or the groundwater
18 component of the integrated regional water management plan, as
19 appropriate.

38 entity has the appropriate authority under subdivision (a) or (b)
39 of Section 10927.

1 (3) Upon the receipt of a notification pursuant to subdivision
2 (b) of Section 10928, the department shall do both of the following:
3 (A) Verify that each notification is complete.
4 (B) Assess the qualifications of the notifying party.
5 (b) If the department has questions about the completeness or

8 the department is unable to resolve the deficiencies, the department
9 shall notify the party in writing that the notification will not be
10 considered further until the deficiencies are corrected.
11 (c) If the department determines that more than one party seeks
12 to become the monitoring entity for the same portion of a basin or
13 subbasin, the department shall consult with the interested parties
14 to determine which party will perform the monitoring functions.
15 In determining which party will perform the monitoring functions
16 under this part, the department shall follow the order in which
17 entities are identified in Section 10927.
18 (d) The department shall advise each party on the status of its
19 notification within three months of receiving the notification.
20 10930. Upon completion of each review pursuant to Section

22 that a party will perform monitoring functions under this part:
23 (a) Notify the party in writing that it is a monitoring entity and
24 the specific portion of the basin or subbasin for which it shall
25 assume groundwater monitoring functions.
26 (b) Post on the department's Internet Web site information that
27 identifies the monitoring entity and the portion of the basin or
28 subbasin for which the monitoring entity will be responsible.
29 10931. (a) The department shall work cooperatively with each
30 monitoring entity to determine the manner in which groundwater
31 elevation information should be reported to the department
32 pursuant to this part. In determining what information should be
33 reported to the department, the department shall defer to existing
34 monitoring programs if those programs result in information that
35 demonstrates seasonal and long-term trends in groundwater
36 elevations. The department shall collaborate with the State
37 Department of Public Health to ensure that the information
38 reported to the department will not result in the inappropriate
39 disclosure of the physical address or geographical location of

1 *drinking water sources, storage facilities, pumping operational*
2 *data, or treatment facilities.*

3 *(b) (1) For the purposes of this part, the department may*
4 *recommend improvements to an existing monitoring program,*
5 *including recommendations for additional monitoring wells.*

6 *(2) The department may not require additional monitoring wells*
7 *unless funds are provided for that purpose.*

8 *10932. Monitoring entities shall commence monitoring and*
9 *reporting groundwater elevations pursuant to this part on or before*
10 *January 1, 2012.*

11 *10933. (a) On or before January 1, 2012, the department shall*

13 *elevations that is being undertaken within each basin and subbasin.*

14 *(b) The department shall prioritize groundwater basins and*
15 *subbasins for the purpose of implementing this section. In*
16 *prioritizing the basins and subbasins, the department shall, to the*
17 *extent data are available, consider all of the following:*

18 *(1) The population overlying the basin or subbasin.*

19 *(2) The rate of current and projected growth of the population*
20 *overlying the basin or subbasin.*

21 *(3) The number of public supply wells that draw from the basin*
22 *or subbasin.*

23 *(4) The total number of wells that draw from the basin or*
24 *subbasin.*

25 *(5) The irrigated acreage overlying the basin or subbasin.*

26 *(6) The degree to which persons overlying the basin or subbasin*
27 *rely on groundwater as their primary source of water.*

28 *(7) Any documented impacts on the groundwater within the*
29 *basin or subbasin, including overdraft, subsidence, saline intrusion,*
30 *and other water quality degradation.*

31 *(8) Any other information determined to be relevant by the*
32 *department.*

33 *(c) If the department determines that all or part of a basin or*
34 *subbasin is not being monitored pursuant to this part, the*
35 *department shall do all of the following:*

36 *(1) Attempt to contact all well owners within the area not being*
37 *monitored.*

38 *(2) Determine if there is an interest in establishing any of the*
39 *following:*

1 (A) A groundwater management plan pursuant to Part 2.75
2 (commencing with Section 10750).

3 (B) An integrated regional water management plan pursuant
4 to Part 2.2 (commencing with Section 10530) that includes a
5 groundwater management component that complies with the
6 requirements of Section 10753.7.

7 (C) A voluntary groundwater monitoring association pursuant
8 to Section 10935.

9 (d) If the department determines that there is sufficient interest
10 in establishing a plan or association described in paragraph (2)
11 of subdivision (c), or if the county agrees to perform the
12 groundwater monitoring functions in accordance with this part,
13 the department shall work cooperatively with the interested parties
14 to comply with the requirements of this part within two years.

15 (e) If the department determines, with regard to a basin or
16 subbasin, that there is insufficient interest in establishing a plan
17 or association described in paragraph (2) of subdivision (c), and
18 if the county decides not to perform the groundwater monitoring
19 and reporting functions of this part, the department shall do all
20 of the following:

21 (1) Identify any existing monitoring wells that overlie the basin
22 or subbasin that are owned or operated by the department or any
23 other state or federal agency.

24 (2) Determine whether the monitoring wells identified pursuant
25 to paragraph (1) provide sufficient information to demonstrate
26 seasonal and long-term trends in groundwater elevations.

27 (3) If the department determines that the monitoring wells
28 identified pursuant to paragraph (1) provide sufficient information
29 to demonstrate seasonal and long-term trends in groundwater
30 elevations, the department shall not perform groundwater
31 monitoring functions pursuant to Section 10934.

32 (4) If the department determines that the monitoring wells
33 identified pursuant to paragraph (1) provide insufficient
34 information to demonstrate seasonal and long-term trends in
35 groundwater elevations, and the State Mining and Geology Board
36 concurs with that determination, the department shall perform
37 groundwater monitoring functions pursuant to Section 10934.

38 10934. (a) Consistent with Section 10933, the department
39 shall perform the groundwater monitoring functions for those

1 portions of a basin or subbasin for which no monitoring entity has
2 agreed to perform the groundwater monitoring functions.

3 (b) Upon determining that it is required to perform groundwater
4 monitoring functions, the department shall notify both of the
5 following entities that it is forming the groundwater monitoring
6 district:

7 (1) Each well owner within the affected area.

8 (2) Each county that contains all or a part of the affected area.

9 (c) The department shall impose a charge on each well owner
10 for its share of the costs of the department to perform the
11 groundwater monitoring required under this part.

12 (d) The department shall not assess a fee or charge to recover
13 the costs for carrying out its power and duties under this part
14 except as provided in subdivision (c).

15 (e) The department may establish regulations to implement this
16 section.

17 10935. (a) A voluntary cooperative groundwater monitoring
18 association may be formed for the purposes of monitoring
19 groundwater elevations in accordance with this part. The
20 association may be established by contract, a joint powers
21 agreement, a memorandum of agreement, or other form of
22 agreement deemed acceptable by the department.

23 (b) Upon notification to the department by one or more entities
24 that seek to form a voluntary cooperative groundwater monitoring
25 association, the department shall work cooperatively with the
26 interested parties to facilitate the formation of the association.

27 (c) The contract or agreement shall include all of the following:

28 (1) The names of the participants.

29 (2) The boundaries of the area covered by the agreement.

30 (3) The name or names of the parties responsible for meeting
31 the requirements of this part.

32 (4) The method of recovering the costs associated with meeting
33 the requirements of this part.

34 (5) Other provisions that may be required by the department.

35 10936. Costs incurred by the department pursuant to this
36 chapter may be funded from unallocated bond revenues pursuant
37 to paragraph (12) of subdivision (a) of Section 75027 of the Public
38 Resources Code, to the extent those funds are available for those
39 purposes, except as provided in subdivision (c) of Section 10934.

40 SEC. 67. Section 12924 of the Water Code is repealed.

1 12924. ~~(a) The department shall, in conjunction with other~~
 2 ~~public agencies, conduct an investigation of the state’s groundwater~~
 3 ~~basins. The department shall identify the state’s groundwater basins~~
 4 ~~on the basis of geological and hydrological conditions and~~
 5 ~~consideration of political boundary lines whenever practical. The~~
 6 ~~department shall also investigate existing general patterns of~~
 7 ~~groundwater pumping and groundwater recharge within such basins~~
 8 ~~to the extent necessary to identify basins which are subject to~~
 9 ~~critical conditions of overdraft.~~

10 ~~(b) The department shall report its findings to the Governor and~~
 11 ~~the Legislature not later than January 1, 1980.~~

12 *SEC. 68. Section 12924 is added to the Water Code, to read:*

13 *12924. (a) The department, in conjunction with other public*
 14 *agencies, shall conduct an investigation of the state’s groundwater*
 15 *basins. The department shall identify the state’s groundwater*
 16 *basins on the basis of geological and hydrological conditions and*
 17 *consideration of political boundary lines whenever practical. The*
 18 *department shall also investigate existing general patterns of*
 19 *groundwater pumping and groundwater recharge within those*
 20 *basins to the extent necessary to identify basins that are subject*
 21 *to critical conditions of overdraft.*

22 *(b) The department shall report its findings to the Governor*
 23 *and the Legislature not later than January 1, 2012, and thereafter*
 24 *in years ending in 5 and 0.*

25 *SEC. 69. Division 26.4 (commencing with Section 79400) of*
 26 *the Water Code is repealed.*

27 *SEC. 70. Division 35 (commencing with Section 85000) is*
 28 *added to the Water Code, to read:*

29
 30 *DIVISION 35. SACRAMENTO-SAN JOAQUIN DELTA*
 31 *REFORM ACT OF 2009*

32
 33 *PART 1. GENERAL PROVISIONS*

34
 35 *CHAPTER 1. SHORT TITLE AND LEGISLATIVE FINDINGS*

36
 37 *85000. This division shall be known, and may be cited, as the*
 38 *Sacramento-San Joaquin Delta Reform Act of 2009.*

39 *85001. The Legislature finds and declares all of the following:*

1 (a) *The Sacramento-San Joaquin Delta watershed and*
2 *California’s water infrastructure are in crisis and existing Delta*
3 *policies are not sustainable. Resolving the crisis requires*
4 *fundamental reorganization of the state’s management of Delta*
5 *watershed resources.*

6 (b) *In response to the Delta crisis, the Legislature and the*
7 *Governor required development of a new long-term strategic vision*
8 *for managing the Delta. The Governor appointed a Blue Ribbon*
9 *Task Force to recommend a new “Delta Vision Strategic Plan”*
10 *to his cabinet committee, which, in turn, made recommendations*
11 *for a Delta Vision to the Governor and the Legislature on January*
12 *3, 2009.*

13 (c) *By enacting this division, it is the intent of the Legislature*
14 *to provide for the sustainable management of the Sacramento-San*
15 *Joaquin Delta ecosystem, to provide for a more reliable water*
16 *supply for the state, and to establish a governance structure that*
17 *will direct efforts across state agencies to develop a legally*
18 *enforceable Delta Plan.*

19 85002. *The Legislature finds and declares that the*
20 *Sacramento-San Joaquin Delta, referred to as “the Delta” in this*
21 *division, is a critically important natural resource for California*
22 *and the nation. It serves Californians concurrently as both the hub*
23 *of the California water system and the most valuable estuary and*
24 *wetland ecosystem on the west coast of North and South America.*

25 85003. *The Legislature finds and declares all of the following:*

26 (a) *Originally, the Delta was a shallow wetland with water*
27 *covering the area for many months of the year. Natural levees,*
28 *created by deposits of sediment, allowed some islands to emerge*
29 *during the dry summer months. Salinity would fluctuate, depending*
30 *on the season and the amount of precipitation in any one year,*
31 *and the species that comprised the Delta ecosystem had evolved*
32 *and adapted to this unique, dynamic system.*

33 (b) *Delta property ownership developed pursuant to the federal*
34 *Swamp Land Act of 1850, and state legislation enacted in 1861,*
35 *and as a result of the construction of levees to keep previously*
36 *seasonal wetlands dry throughout the year. That property*
37 *ownership, and the exercise of associated rights, continue to*
38 *depend on the landowners’ maintenance of those nonproject levees*
39 *and do not include any right to state funding of levee maintenance*
40 *or repair.*

1 (c) In 1933, the Legislature approved the California Central
 2 Valley Project Act, which relied upon the transfer of Sacramento
 3 River water south through the Delta and maintenance of a more
 4 constant salinity regime by using upstream reservoir releases of
 5 freshwater to create a hydraulic salinity barrier. As a result of the
 6 operations of state and federal water projects, the natural salinity
 7 variations in the Delta have been altered. Restoring a healthy
 8 estuarine ecosystem in the Delta may require developing a more
 9 natural salinity regime in parts of the Delta.

10 85004. The Legislature finds and declares all of the following:

11 (a) The economies of major regions of the state depend on the
 12 ability to import water from the Delta watershed. More than
 13 two-thirds of the residents of the state and more than two million
 14 acres of highly productive farm land receive water exported from
 15 the Delta watershed.

16 (b) Providing a more reliable water supply for the state involves
 17 implementation of water use efficiency and conservation projects,
 18 wastewater reclamation projects, desalination, and new and
 19 improved infrastructure, including water storage and Delta
 20 conveyance facilities.

21
 22 *CHAPTER 2. DELTA POLICY*

23
 24 85020. The policy of the State of California is to achieve the
 25 following objectives that the Legislature declares are inherent in
 26 the coequal goals for management of the Delta:

27 (a) Manage the Delta's water and environmental resources and
 28 the water resources of the state over the long-term.
