AMENDED IN ASSEMBLY JUNE 25, 2009

AMENDED IN ASSEMBLY JUNE 17, 2009

AMENDED IN SENATE MAY 14, 2009

AMENDED IN SENATE APRIL 28, 2009

SENATE BILL

No. 581

Introduced by Senator Leno

February 27, 2009

An act to amend Section 2828 of the Public Utilities Code, relating to electricity.

LEGISLATIVE COUNSEL'S DIGEST

SB 581, as amended, Leno. Hetch Hetchy Water and Power: renewable generation.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities, including electrical corporations, as defined. Existing law authorizes the City and County of San Francisco to elect to designate specific photovoltaic electricity generation facilities meeting specified conditions as Hetch Hetchy Water and Power (HHWP) at-site solar generation, as defined, and HHWP remote solar generation, as defined. Existing law requires that upon election and the filing and acceptance of an advice letter with the commission establishing rates, Pacific Gas and Electric Company (PG&E) is required on a monthly basis, to credit the City and County of San Francisco for certain electricity generated and delivered to the electric grid by HHWP at-site solar generation in accordance with specified rate criteria. Existing law additionally authorizes the City and County of San

Francisco to elect to designate specific photovoltaic electricity generation facilities as HHWP remote solar generation to supply electricity to qualifying remote load by designating those facilities to be served by HHWP remote solar generation. Existing law requires that PG&E accept any electricity exported to the grid by HHWP remote solar generation, up to the amount of electricity contemporaneously being used by the qualifying remote load, and treat the electricity accepted as behind the meter generation that offsets the electrical usage of qualifying remote load. Existing law requires that where the separate or remote sites are outside the City and County of San Francisco, they be located within 20 miles of the City and County of San Francisco or within 20 miles of an HHWP remote solar generation facility.

This bill would authorize the City and County of San Francisco to elect to designate specific renewable electricity generation facilities, as defined, as HHWP at-site renewable generation and HHWP remote renewable generation. The bill would authorize the City and County of San Francisco to elect to designate specific renewable electricity generation facilities or a portion of specific renewable electricity generation facilities as HHWP remote renewable generation to supply electricity to qualifying remote load by designating those facilities to be served by HHWP remote renewable generation. The bill would require that PG&E accept any electricity exported to the grid by HHWP remote renewable generation, up to the amount of electricity being used during the corresponding time period by the qualifying remote load, and to treat the electricity accepted as behind the meter generation that offsets the electrical usage of qualifying remote load.

The bill would declare that, due to the special circumstances applicable only to HHWP renewable generation facilities, a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution, and the enactment of a special statute is therefore necessary.

Vote: majority. Appropriation: no. Fiscal committee: no.
State-mandated local program: no.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 2828 of the Public Utilities Code is
- 2 amended to read:
- 3 2828. (a) As used in this section, the following terms have the
- 4 following meanings:

1 (1) “Appropriate TOU tariff” means the Time-of-Use tariff that
2 would be applicable to the City and County of San Francisco
3 account at the renewable electricity generation facility site if the
4 facility at the site were a Pacific Gas and Electric Company
5 bundled customer, as determined by Pacific Gas and Electric
6 Company.

7 (2) “Environmental attributes” associated with the Hetch Hetchy
8 Water and Power (HHWP) at-site renewable generation and HHWP
9 remote renewable generation include, but are not limited to, the
10 credits, benefits, emissions reductions, environmental air quality
11 credits, and emissions reduction credits, offsets, and allowances,
12 however entitled, resulting from the avoidance of the emissions
13 of any gas, chemical, or other substance attributable to the Hetch
14 Hetchy Water and Power renewable electricity generation facility
15 owned by the City and County of San Francisco.

16 (3) “HHWP at-site renewable generation” means the electricity
17 generated by renewable electricity generation facilities designated
18 by the City and County of San Francisco pursuant to subdivision
19 (b).

20 (4) “HHWP remote renewable generation” means the electricity
21 generated by renewable electricity generation facilities designated
22 by the City and County of San Francisco pursuant to subdivision
23 (h), to provide electricity to qualifying remote load.

24 (5) “Interconnection Agreement” means the 1987 agreement
25 between Pacific Gas and Electric Company and the City and
26 County of San Francisco, as filed with and accepted by the Federal
27 Energy Regulatory Commission (FERC), and as amended from
28 time to time with FERC approval, which provides for rates for
29 transmission, distribution, and sales of supplemental electricity to
30 the City and County of San Francisco. Nothing in this section shall
31 waive or modify the rights of parties under the Interconnection
32 Agreement or the jurisdiction of the FERC over rates set forth in
33 the Interconnection Agreement.

34 (6) “Qualifying remote load” means the electricity demand of
35 the City and County of San Francisco for load served under the
36 Interconnection Agreement, at sites that are separate from, and not
37 adjacent to, the sites where the renewable electricity generation
38 facility is located, and serviced through a meter or multiple meters
39 other than those serving the sites where the renewable electricity
40 generation facility is located. The separate or remote sites may be

1 designated by the City and County of San Francisco, both inside
2 and outside of the City and County of San Francisco. Where the
3 separate or remote sites are outside the City and County of San
4 Francisco, they shall be located ~~with~~ *within* 20 miles of the City
5 and County of San Francisco or within 20 miles of a HHWP remote
6 renewable generation facility. There is no wattage limit on
7 qualifying remote load.

8 (7) “Renewable electricity generation facility” means a facility
9 for the generation of electricity that satisfies both of the following
10 requirements:

11 ~~(A) The facility meets the requirements for an “in-state~~
12 ~~renewable electricity generation facility” specified in paragraph~~
13 ~~(1) of subdivision (b) of Section 25741 of the Public Resources~~
14 ~~Code.~~

15 *(A) The facility uses biomass, solar thermal, photovoltaic, wind,*
16 *geothermal, fuel cells using renewable fuels, small hydroelectric*
17 *generation of 30 megawatts or less, digester gas, municipal solid*
18 *waste conversion, landfill gas, ocean wave, ocean thermal, or tidal*
19 *current, and any additions or enhancements to the facility using*
20 *that technology.*

21 (B) The facility is owned, or under lease or contract to, the City
22 and County of San Francisco for at least a five-year term and for
23 the full output of electricity from the facility.

24 (b) The City and County of San Francisco may elect to designate
25 specific renewable electricity generation facilities as HHWP at-site
26 renewable generation, if all of the following conditions are met:

27 (1) Total peak generating capacity does not exceed 15
28 megawatts.

29 (2) The renewable electricity generation facility utilizes a meter,
30 or multiple meters, capable of separately measuring electricity
31 flow in both directions. All meters shall provide “time-of-use”
32 measurement information. If the existing meter at the site of the
33 facility is not capable of providing time-of-use information or is
34 not capable of separately measuring total flow of energy in both
35 directions, the City and County of San Francisco is responsible
36 for all expenses involved in purchasing and installing a meter or
37 meters that are both capable of providing time-of-use information
38 and able to separately measure total electricity flow in both
39 directions.

1 (3) The amount of all electricity delivered to the electric grid
2 by the designated HHWP at-site renewable generation is the
3 property of Pacific Gas and Electric Company.

4 (4) The City and County of San Francisco does not sell
5 electricity delivered to the electric grid from the designated HHWP
6 at-site renewable generation to a third party.

7 (c) For each site of a renewable electricity generation facility
8 that comprises the HHWP at-site renewable generation, Pacific
9 Gas and Electric Company shall identify the appropriate TOU
10 tariff for that site. Any electricity exported to the Pacific Gas and
11 Electric Company grid at that site that is not generated from HHWP
12 remote renewable generation pursuant to subdivision (h) shall, for
13 each time-of-use period, result in a monetary credit to be applied
14 monthly as a credit or offset against the invoice created pursuant
15 to the Interconnection Agreement and shall be valued at the
16 generation component of the appropriate TOU tariff. The
17 commission shall determine if it is appropriate to increase the
18 credit to reflect any additional value derived from the location or
19 the environmental attributes of, the designated HHWP at-site
20 renewable generation.

21 (d) Monthly charges and credit amounts for HHWP at-site
22 renewable generation are interim and subject to an accounting
23 true-up, consistent with commission policies and practices. The
24 true-up shall be performed annually or upon the termination, for
25 any reason, of the Interconnection Agreement. The true-up shall
26 accomplish the following:

27 (1) If the total electricity delivered to the site by Pacific Gas
28 and Electric Company since the previous true-up equals or exceeds
29 the total electricity exported to the grid by the HHWP at-site
30 renewable generation facility at the site, the City and County of
31 San Francisco is a net electricity consumer at that site. For any
32 HHWP at-site renewable generation site where the City and County
33 of San Francisco is a net electricity consumer, a credit or offset
34 shall be applied to reduce the obligations of the City and County
35 of San Francisco to an invoice prepared pursuant to the
36 Interconnection Agreement. If there is no invoiced obligation to
37 be reduced, there is no applicable credit.

38 (2) If the total electricity delivered to the site by Pacific Gas
39 and Electric Company since the previous true-up is less than the
40 total electricity exported to the grid by the HHWP at-site renewable

1 generation facility at the site, the City and County of San Francisco
2 is a net electricity producer at that site. For any HHWP at-site
3 renewable generation site where the City and County of San
4 Francisco is a net electricity producer, the City and County of San
5 Francisco shall receive no credit or offset for the electricity
6 exported to the grid in excess of the electricity delivered to the site
7 from the grid. For any site where the City and County of San
8 Francisco is a net electricity producer, the City and County of San
9 Francisco shall receive a credit or offset up to the amount of
10 electricity delivered to the site from the grid. The credit or offset
11 shall be applied to reduce the obligations of the City and County
12 of San Francisco to an invoice prepared pursuant to the
13 Interconnection Agreement. If there is no invoiced obligation to
14 be reduced, there is no applicable credit or offset. Pacific Gas and
15 Electric Company shall use the last-in, first-out method to
16 determine what electricity delivered to the grid from the site will
17 not earn a credit or offset.

18 (e) Pursuant to this section, the offset to charges under the
19 Interconnection Agreement is the medium to convey credits earned
20 under this section. Nothing in this section shall be construed to
21 affect in any way the rights and obligations of the City and County
22 of San Francisco and Pacific Gas and Electric Company under the
23 Interconnection Agreement. If the Interconnection Agreement
24 terminates, the City and County of San Francisco and Pacific Gas
25 and Electric Company shall develop an alternative mechanism to
26 convey credits earned under this section for HHWP at-site
27 renewable generation and for HHWP remote renewable generation,
28 in a manner that accomplishes the same result as that accomplished
29 pursuant to the Interconnection Agreement.

30 (f) (1) Pacific Gas and Electric Company shall file an advice
31 letter with the commission, that complies with this section, not
32 later than 10 days after the City and County of San Francisco first
33 designates the specific renewable electricity generation facilities
34 that will comprise HHWP at-site renewable generation.

35 (2) The commission, within 30 days of the date of filing of the
36 advice letter, shall approve the advice letter or specify conforming
37 changes to be made by Pacific Gas and Electric Company to be
38 filed in an amended advice letter within 30 days.

39 (g) The City and County of San Francisco may terminate its
40 election pursuant to subdivisions (b), (c), (d), and (h), upon

1 providing Pacific Gas and Electric Company with a minimum of
2 60 days' written notice.

3 (h) (1) The City and County of San Francisco may elect to
4 designate specific renewable electricity generation facilities or a
5 portion of specific renewable electricity generation facilities as
6 HHWP remote renewable generation and may use HHWP remote
7 renewable generation to supply electricity to specific facilities
8 designated as qualifying remote load up to the amount of electricity
9 being used by the qualifying remote load.

10 (2) The City and County of San Francisco shall receive no credit
11 or offset for the electricity exported to the grid from HHWP remote
12 renewable generation, in excess of the electricity delivered from
13 the grid to qualifying remote load.

14 (3) Pacific Gas and Electric Company shall accept any electricity
15 exported to the grid as HHWP remote renewable generation, up
16 to the amount of electricity being used during the corresponding
17 time period by the qualifying remote load, and treat the electricity
18 accepted as behind the meter generation that offsets the electrical
19 usage of qualifying remote load. Additional rates may apply
20 pursuant to paragraph (6).

21 (4) The City and County of San Francisco shall be responsible
22 for scheduling the electricity exported to the grid from HHWP
23 remote renewable generation.

24 (5) Both HHWP remote renewable generation sites and
25 qualifying remote load sites shall have meters capable of measuring
26 exports and usage of electricity that will support determination of
27 credits or offsets pursuant to paragraph (2). The City and County
28 of San Francisco shall be responsible for the costs of the meters
29 required pursuant to this section.

30 (6) To compensate Pacific Gas and Electric Company for the
31 use of its facilities, the City and County of San Francisco shall pay
32 applicable distribution rates, transmission rates, or distribution and
33 transmission rates, at rate levels determined by the Interconnection
34 Agreement, for all energy delivered to qualifying remote load that
35 comes from HHWP remote renewable generation. When HHWP
36 remote renewable generation and the qualifying remote load it
37 serves are located within the City and County of San Francisco
38 and are interconnected at distribution voltage, the applicable rate
39 for delivery of energy from HHWP remote renewable generation

1 shall be reduced as negotiated pursuant to the Interconnection
2 Agreement.

3 (7) The appropriate regulatory agency shall ensure that the
4 delivery of electricity by HHWP remote renewable generation to
5 qualifying remote load, and the granting of offsets to the City and
6 County of San Francisco pursuant to this subdivision, do not result
7 in a shifting of costs to bundled service customers, either
8 immediately or over time.

9 (i) Hetch Hetchy Water and Power shall reimburse Pacific Gas
10 and Electric Company for its reasonable study costs associated
11 with HHWP remote and at-site renewable generation to address
12 interconnection, consistent with applicable regulatory rules, and
13 impacts upon the electric system resulting from the HHWP remote
14 and at-site renewable generation. If the studies identify
15 improvements necessary for the protection of the Pacific Gas and
16 Electric Company electric system, for the protection of its
17 employees, or to ensure reliable delivery of the electricity generated
18 by the HHWP remote and at-site renewable generation facility to
19 qualifying remote load, Hetch Hetchy Water and Power shall pay
20 the reasonable costs of the improvements if it elects to designate
21 the HHWP remote and at-site renewable generation facility to
22 provide electricity for qualifying remote load.

23 (j) The interconnection of HHWP at-site renewable generation
24 and HHWP remote renewable generation will be accomplished
25 through one or more generator interconnection agreements pursuant
26 to applicable regulatory rules and generator interconnection
27 procedures.

28 (k) The City and County of San Francisco shall own the
29 environmental attributes associated with the electricity delivered
30 to the electric grid by HHWP at-site renewable generation and
31 HHWP remote renewable generation unless it contracts otherwise.

32 SEC. 2. The Legislature finds and declares that, because of the
33 unique circumstances applicable only to Hetch Hetchy Water and
34 Power renewable generation of electricity, a statute of general
35 applicability cannot be enacted within the meaning of subdivision
36 (b) of Section 16 of Article IV of the California Constitution.
37 Therefore, this special statute is necessary.
