

Introduced by Senator CorreaFebruary 19, 2010

An act to add Section 2081.2 to the Fish and Game Code, relating to endangered and threatened species.

LEGISLATIVE COUNSEL'S DIGEST

SB 1446, as introduced, Correa. Endangered and threatened species: incidental take permits.

Existing law, the California Endangered Species Act, prohibits the importation, exportation, taking, possession, purchase, or sale of any threatened or endangered species, except in certain situations. The act, with exceptions, authorizes the Department of Fish and Game to authorize the take of threatened species, endangered species, or candidate species by permit if the take is incidental to an otherwise lawful activity, the impacts of the authorized take are minimized and fully mitigated, the permit is consistent with specified regulations, and the applicant ensures adequate funding to implement the minimization and mitigation measures and monitor compliance with, and effectiveness of, those measures.

This bill, with respect to the requirement that the applicant ensure adequate funding to implement the minimization and mitigation measures and monitor compliance with those measures, would require that an applicant that is a city, county, or other public agency be deemed to meet that requirement if the city, county, or other public agency complies with specified financial and accounting requirements and certifies that it will annually appropriate sufficient moneys to fund its minimization and mitigation obligations. The bill would require that certification to include specified components.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.
