

AMENDED IN ASSEMBLY APRIL 9, 2012

CALIFORNIA LEGISLATURE—2011–12 REGULAR SESSION

ASSEMBLY BILL

No. 2595

Introduced by Assembly Member Hall

February 24, 2012

An act to add Section 35616 to the Public Resources Code, relating to water, and making an appropriation therefor.

LEGISLATIVE COUNSEL'S DIGEST

AB 2595, as amended, Hall. Desalination.

The Cobey-Porter Saline Water Conversion Law authorizes the Department of Water Resources, either independently or in cooperation with public or private entities to conduct a program of investigation, study, and evaluation in the field of saline water conversion, to provide assistance to persons or entities seeking to construct desalination facilities, and after submission of a written report and upon appropriation from the Legislature, to finance, construct, and operate saline water conversion facilities. Existing law required the department, not later than July 1, 2004, to report to the Legislature, on potential opportunities and impediments for using seawater and brackish water desalination, and to examine what role, if any, the state should play in furthering the use of desalination technology. Existing law required the department to convene a Water Desalination Task Force, comprised of representatives from listed agencies and interest groups, to advise the department in carrying out these duties and in making recommendations to the Legislature.

The California Ocean Protection Act establishes the Ocean Protection Council in state government. Existing law requires the Ocean Protection Council to coordinate activities of state agencies that are related to the

protection and conservation of coastal waters and ocean ecosystems to improve the effectiveness of state efforts to protect ocean resources within existing fiscal limitations, to establish policies to coordinate the collection, evaluation, and sharing of scientific data related to coastal and ocean resources among agencies, and to identify and recommend to the Legislature changes in law needed to achieve these goals.

This bill would require the council to report to the Legislature, by December 31, 2013, on opportunities for streamlining the current statewide permitting processes for seawater desalination facilities, including an evaluation of impediments to desalination projects relative to the current permitting process and to recommend potential administrative and legislative actions for streamlining the permitting process while maintaining current regulatory protections. The bill would require the council to convene the Seawater Desalination Permit Streamlining Task Force to review the current permitting processes required by all state regulatory agencies for the planning, design, construction, monitoring, and operation of seawater desalination facilities, to identify opportunities for streamlining the permitting process, and to advise the council in making the report.

Existing law, the Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006, an initiative bond act approved by the voters as Proposition 84 at the November 7, 2006, statewide general election, authorizes the issuance of general obligation bonds in the amount of \$5,388,000,000, of which \$1,000,000,000 is made available to the department, upon appropriation by the Legislature, for grants for projects that assist local public agencies to meet the long-term water needs of the state, including the delivery of safe drinking water and the protection of water quality and the environment. Eligible projects are required to implement integrated regional water management plans that meet certain requirements.

This bill would appropriate \$250,000 of these funds to the department to pay the costs of convening the Seawater Desalination Permit Streamlining Task Force and preparation of the report.

Vote: majority. Appropriation: yes. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. The Legislature finds and declares all of the
2 following:

1 (a) A growing population, climate change uncertainty, and the
2 need to grow the state’s economy while protecting and restoring
3 our fish and wildlife habitats make it essential that the state manage
4 its water resources as efficiently as possible.

5 (b) Diversifying regional water supply portfolios will increase
6 water supply reliability and advance state policies for regional
7 self-sufficient water supplies. In addition to stormwater capture,
8 water recycling, and conservation, water agencies located in coastal
9 areas are considering seawater desalination to help diversify their
10 water supply portfolios. These water agencies include seawater
11 desalination as potential future supplies in their most recent urban
12 water management plans. Seawater desalination projects are also
13 elements of several integrated regional water management plans.

14 (c) In addition to providing much needed water supply reliability
15 against future uncertainties, seawater desalination projects have
16 the potential to create new jobs in the state over the next 10 years
17 and generate much needed investment in local economies. Reverse
18 osmosis and other seawater desalination technologies were
19 pioneered and developed in California, and desalination technology
20 remains an important industrial sector in San Diego County and
21 other regions.

22 (d) Proponents for seawater desalination projects must obtain
23 close to 30 local, state, and federal permits and related approvals.
24 The procedure for obtaining key state permits is not always clear,
25 and there can be significant redundancy in the requirements
26 between some of the permitting agencies. As a result, both the cost
27 and the timeframe for obtaining state permits has become a
28 potential impediment for some proposed desalination projects.

29 (e) As a result of Chapter 62 of the Statutes of 2003 (Senate
30 Bill No. 600), a Water Desalination Task Force was convened and
31 *it* delivered a report to the Legislature that included the following
32 recommendation: “To improve communication, cooperation, and
33 consistency in permitting processes, encourage review processes
34 for each desalination project to be coordinated among regulators
35 and the public.”

36 (f) Section 12947 of the Water Code states the intent of the
37 Legislature that the Department of Water Resources undertake to
38 find economic and efficient methods of desalting saline water so
39 that desalted water may be made available to help meet the growing
40 water requirements of the state.

1 (g) Existing law requires the State Water Resources Control
2 Board to formulate and adopt a water quality control plan for ocean
3 waters of the state known as the California Ocean Plan. The board
4 is currently updating the California Ocean Plan with
5 environmentally protective, science-based regulations, specifically
6 for seawater desalination projects. These new regulations will be
7 implemented through existing National Pollution Discharge
8 Elimination System permits managed by regional water quality
9 control boards.

10 SEC. 2. Section 35616 is added to the Public Resources Code,
11 to read:

12 35616. (a) (1) Not later than December 31, 2013, the Ocean
13 Protection Council shall report to the Legislature on opportunities
14 for streamlining the current statewide permitting processes for
15 seawater desalination facilities in California. The report shall
16 evaluate impediments to desalination projects relative to the current
17 permitting process and investigate opportunities to improve the
18 process. The report shall also recommend potential administrative
19 and legislative actions for streamlining the permitting process
20 while maintaining current regulatory protections.

21 (2) The report submitted pursuant to this subdivision shall
22 comply with Section 9795 of the Government Code.

23 (3) This subdivision shall become inoperative on January 1,
24 2018, pursuant to Section 10231.5 of the Government Code.

25 (b) The Ocean Protection Council shall convene a task force,
26 to be known as the Seawater Desalination Permit Streamlining
27 Task Force, to review the current permitting processes required
28 by all state regulatory agencies for the planning, design,
29 construction, monitoring, and operation of seawater desalination
30 facilities, to identify opportunities for streamlining the permitting
31 process, and to advise the Ocean Protection Council in
32 implementation of subdivision (a), including making
33 recommendations to the Legislature on the following:

34 (1) Establishing a clear pathway for obtaining state permits.

35 (2) Defining the regulatory scope for each permitting agency.

36 (3) Eliminating redundant requirements between California
37 permitting agencies.

38 (4) Describing the data needed to complete each permit.

39 (5) Developing best practices for communication among
40 regulatory agencies and the regulated community.

1 (6) Ensuring that any recommended changes maintain the current
2 regulatory protections.

3 (c) (1) The recommendations developed by the Seawater
4 Desalination Permit Streamlining Task Force shall focus on how
5 state regulations are applied by permitting agencies and
6 commissions during the permitting process.

7 (2) The recommended actions should review the scope for each
8 permitting agency and commission, while maintaining current
9 regulatory protections.

10 (3) The recommended actions shall accommodate any new
11 regulations developed by the State Water Resources Control Board
12 for the California Ocean Plan.

13 (d) (1) The Seawater Desalination Permit Streamlining Task
14 Force shall include one representative from each of the following
15 state entities:

16 (A) Department of Water Resources.

17 (B) State Water Resources Control Board.

18 (C) California Coastal Commission.

19 (D) State Lands Commission.

20 (E) State Department of Public Health.

21 (F) State Energy Resources Conservation and Development
22 Commission.

23 (G) California Environmental Protection Agency.

24 (H) Natural Resources Agency.

25 (I) Department of Parks and Recreation.

26 (2) The Seawater Desalination Permit Streamlining Task Force
27 shall include one representative from each of the following, as
28 determined by the Ocean Protection Council:

29 (A) Commission for Economic Development.

30 (B) A coastal regional water quality control board in which is
31 located at least one proposed seawater desalination facility.

32 (C) A recognized environmental advocacy group.

33 (D) *Two separate and broadly recognized environmental*
34 *advocacy groups that focus on coastal protection.*

35 ~~(D)~~

36 (E) A water purveyor, as defined in Section 512 of the Water
37 Code, that is a public entity, as defined in Section 514 of the Water
38 Code, that is developing or proposing to develop a seawater
39 desalination facility.

40 ~~(E)~~

- 1 (F) An entity that supplies water at wholesale to urban water
- 2 suppliers, as defined in Section 10617 of the Water Code.
- 3 ~~(F)~~
- 4 (G) A nonprofit association created to further the use of seawater
- 5 desalination that includes both private and public members.
- 6 ~~(G)~~
- 7 (H) A recognized environmental justice advocacy group.
- 8 ~~(H)~~
- 9 (I) A recognized business advocacy group.
- 10 ~~(I) A representative of a~~
- 11 (J) A recognized organization representing public union
- 12 members.
- 13 ~~(J) A representative of a~~
- 14 (K) A recognized organization representing private union
- 15 members.
- 16 (3) A member of the Seawater Desalination Permit Streamlining
- 17 Task Force may appoint an alternate to represent the member at a
- 18 meeting of the task force.
- 19 (4) A representative of the Ocean Protection Council shall
- 20 convene the Seawater Desalination Permit Streamlining Task Force
- 21 and act as chair of the task force.
- 22 (e) Pursuant to Section 75026, the sum of two hundred fifty
- 23 thousand dollars (\$250,000) is hereby appropriated to the
- 24 Department of Water Resources for expenditure by the department
- 25 to pay the costs for convening the Seawater Desalination Permit
- 26 Streamlining Task Force and for preparation of the report pursuant
- 27 to subdivision (a).

O
