December 6, 2010

An act to add Section 4576 to the Penal Code, relating to prisons.

LEGISLATIVE COUNSEL'S DIGEST

SB 26, as amended, Padilla. Prisons: wireless communication devices.

Existing law prohibits unauthorized communication with inmates in state prison. A person who violates that provision is guilty of a misdemeanor. Existing law further prohibits a person in a local correctional facility from possessing a wireless communication device, except as specified.

This bill would provide, with exceptions, that a person who possesses with the intent to deliver, or delivers, to an inmate or ward in the custody of the department any cellular telephone or other wireless communication device or any component thereof, including, but not limited to, a subscriber identity module or memory storage device, is guilty of a misdemeanor, punishable by imprisonment in the county jail not exceeding 6 months, a fine not to exceed \$5,000 for each device, or both that fine and imprisonment.

This bill would provide that if a person who is visiting an inmate or ward under the jurisdiction of the Department of Corrections and Rehabilitation is found to be in possession of a cellular telephone,

wireless communication device, or any component thereof, upon being searched or subjected to a metal detector, that device is subject to confiscation and would be returned the same day, except as specified. The bill would require that a notice to that effect be posted in each area where visitors are searched prior to visiting with an inmate or ward.

The bill would provide that a person who brings, without authorization, a wireless communication device onto the grounds of a prison or institution housing offenders under the jurisdiction of the department is deemed to have consented to the department using available technology to prevent the device from sending or receiving calls or other electronic communication, and would require notice of this provision to be posted at all public entry gates.

Existing law provides for the accumulation, denial, or loss of time credits for inmates of the department based on each inmate's behavior while under the jurisdiction of the department.

The bill would ~~also~~ provide that an inmate ~~or ward~~ who is found to be in possession of a wireless communication device would be subject to the denial of time credits, as specified. *The bill would also provide that a ward who is found to be in possession of a wireless communication device shall have his or her discharge consideration date extended, as provided.*

Because the bill would create a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: yes.

9 the Government Code, or changes the definition of a crime within
