An act to amend Section 52052.5 of, to amend and repeal Sections 52052 and 52052.1 of, and to add Sections 52052.8, 52052.81, 52052.82, 52052.83, and 52052.84 to, the Education Code, relating to school accountability.

LEGISLATIVE COUNSEL’S DIGEST

SB 547, as amended, Steinberg. Public school performance accountability.

(1) Existing law requires the Superintendent of Public Instruction, with the approval of the State Board of Education, to develop an Academic Performance Index (API), consisting of specified indicators, to measure the performance of schools and pupils.

This bill would make these provisions inoperative on July 1, 2014, and repeal them as of January 1, 2015. The bill would require the Superintendent, in consultation with a specified advisory committee,
to develop an Education Quality Index (EQI), which would replace the API and consist of a State Assessment Index, a Graduation Rate Index, a College Preparedness Index, and a Career Readiness Index. The bill would require that these indices consist of specified criteria. The bill would require the state board to provide opportunities for public input, make changes as necessary, and adopt the EQI no later than August 1, 2014. Commencing with the 2014–15 school year, the bill would require that all schools and school districts be evaluated using an EQI value. The bill would require the Superintendent to report to the Governor and the appropriate policy and fiscal committees of the Legislature by July 1, 2015, and annually thereafter, specified information relating to the creation of additional indices. The bill also would require the Superintendent, in consultation with a specified advisory committee, to report to the Governor and the Legislature, by July 1, 2018, on the effectiveness and reliability of the EQI and any statutory changes needed for improvement and subject to an appropriation in the annual Budget Act or another statute for this purpose, to contract for an independent evaluation of the effectiveness and reliability of the EQI and any statutory changes recommended for improvement, and to submit the evaluation and recommendations in a report to the Governor and the appropriate policy and fiscal committees of the Legislature by July 1, 2018. To the extent that this bill would impose new duties on school districts in connection with the establishment of the EQI, including, but not limited to, new reporting duties, it would impose a state-mandated local program.

(2) This bill would also make conforming and clarifying changes relating to the duties of a specified advisory committee. The bill would require this advisory committee, for purposes of work relating to the EQI, to seek input through the establishment of subcommittees or other methods from persons with expertise in various areas, and, commencing January 1, 2012, through July 1, 2016, inclusive, to hold a public meeting at least once each quarter per year.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement. This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state,
reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. (a) The Legislature finds and declares all of the following:
(1) Too many pupils in California face educational challenges that could impede their ability to be productive participants in the state and national economies.
(2) Nearly 100,000 California pupils are dropping out of middle and high school annually, a number equivalent in size to the population of the City of San Mateo or the City of Compton. Gainful employment prospects for dropouts are shrinking given the changing nature of the California economy.
(3) Many of those who do graduate from high school find themselves underprepared for the demands of college and the workplace. Nearly half of all freshmen in the California Community Colleges and the California State University system require remediation in either reading or mathematics.
(4) A stronger and more integrated approach to learning that combines rigorous academics with career education can engage and motivate pupils who are at risk of dropping out and can create more options for them after high school, whether they choose postsecondary education or a career. Such an approach can better prepare pupils for entry directly into the workforce after high school, without compromising academic goals and preparation for postsecondary education.
(5) A large majority of California high school pupils surveyed say they would be more motivated to work hard and do well if they attended schools where they could take courses needed for college and at the same time have the chance to acquire skills and knowledge relevant to future careers.
(6) The Public Policy Institute of California projects that by 2025, two of every five jobs (41 percent) will require a college degree. Without an increased commitment to college readiness and access, Californians with college degrees will amount to just 35 percent of the 2025 workforce, well short of the need. Absent
improvements to college and career pathways for pupils, the growth
of our emerging economy will be hindered by a lack of highly
educated and skilled workers.

(b) The Legislature further finds and declares all of the
following:

(1) The state’s primary accountability measure for public
schools, the Academic Performance Index, has performed an
important function and has served as a compass by which schools
have directed their school improvement efforts.

(2) The Academic Performance Index has been limited, however,
by an overreliance on the Standardized Testing and Reporting
Program as the chief indicator of school performance. Statute
requires dropout and graduation rates to be included, but those
rates are not yet incorporated.

(3) California’s ongoing transition to new common core
academic content standards presents an opportunity for the state
to reexamine its system of public school accountability, the goals
the state sets for its public schools, and the most appropriate
methods for measuring progress toward those goals. The new
generation of pupil assessments that will accompany the common
core academic content standards may provide better information
about pupils’ ability to analyze and solve complex problems,
communicate clearly, synthesize information, and apply
knowledge. These skills and capacities are vital to their success
in the global economy of the 21st century.

(c) It is the intent of the Legislature that California’s system of
public school accountability evolve to encompass other valuable
metrics in addition to pupil test scores, graduation rates, and
dropout rates. It is further the intent of the Legislature that a more
comprehensive set of expectations and aspirations for California’s
public schools be reflected in the accountability system, including
measures of pupil preparedness for college and career, and pupil
engagement in school.

SEC. 2. Section 52052 of the Education Code is amended to
read:

52052. (a) (1) The Superintendent, with approval of the state
board, shall develop an Academic Performance Index (API), to
measure the performance of schools, especially the academic
performance of pupils.
(2) A school shall demonstrate comparable improvement in academic achievement as measured by the API by all numerically significant pupil subgroups at the school, including:
  (A) Ethnic subgroups.
  (B) Socioeconomically disadvantaged pupils.
  (C) English learners.
  (D) Pupils with disabilities.
(3) (A) For purposes of this section, a numerically significant pupil subgroup is one that meets both of the following criteria:
  (i) The subgroup consists of at least 50 pupils each of whom has a valid test score.
  (ii) The subgroup constitutes at least 15 percent of the total population of pupils at a school who have valid test scores.
  (B) If a subgroup does not constitute 15 percent of the total population of pupils at a school who have valid test scores, the subgroup may constitute a numerically significant pupil subgroup if it has at least 100 valid test scores.
  (C) For a school with an API score that is based on no fewer than 11 and no more than 99 pupils with valid test scores, numerically significant pupil subgroups shall be defined by the Superintendent, with approval by the state board.
(4) The API shall consist of a variety of indicators currently reported to the department, including, but not limited to, the results of the achievement test administered pursuant to Section 60640, attendance rates for pupils in elementary schools, middle schools, and secondary schools, and the graduation rates for pupils in secondary schools.
  (A) Graduation rates for pupils in secondary schools shall be calculated for the API as follows:
    (i) Four-year graduation rates shall be calculated by taking the number of pupils who graduated on time for the current school year, which is considered to be three school years after the pupils entered grade 9 for the first time, and dividing that number by the total calculated in clause (ii).
    (ii) The number of pupils entering grade 9 for the first time in the school year three school years prior to the current school year, plus the number of pupils who transferred into the class graduating at the end of the current school year between the school year that was three school years prior to the current school year and the date of graduation, less the number of pupils who transferred out of the
school between the school year that was three school years prior to the current school year and the date of graduation who were members of the class that is graduating at the end of the current school year.

(iii) Five-year graduation rates shall be calculated by taking the number of pupils who graduated on time for the current school year, which is considered to be four school years after the pupils entered grade 9 for the first time, and dividing that number by the total calculated in clause (iv).

(iv) The number of pupils entering grade 9 for the first time in the school year four years prior to the current school year, plus the number of pupils who transferred into the class graduating at the end of the current school year between the school year that was four years prior to the current school year and the date of graduation, less the number of pupils who transferred out of the school between the school year that was four years prior to the current school year and the date of graduation who were members of the class that is graduating at the end of the current school year.

(v) Six-year graduation rates shall be calculated by taking the number of pupils who graduated on time for the current school year, which is considered to be five school years after the pupils entered grade 9 for the first time, and dividing that number by the total calculated in clause (vi).

(vi) The number of pupils entering grade 9 for the first time in the school year five years prior to the current school year, plus the number of pupils who transferred into the class graduating at the end of the current school year between the school year that was five years prior to the current school year and the date of graduation, less the number of pupils who transferred out of the school between the school year that was five years prior to the current school year and the date of graduation who were members of the class that is graduating at the end of the current school year.

(B) The inclusion of five- and six-year graduation rates for pupils in secondary schools shall meet the following requirements:

(i) Schools shall be granted one-half the credit in their API scores for graduating pupils in five years that they are granted for graduating pupils in four years.

(ii) Schools shall be granted one-quarter the credit in their API scores for graduating pupils in six years that they are granted for graduating pupils in four years.
(iii) Notwithstanding clauses (i) and (ii), schools shall be granted full credit in their API scores for graduating in five or six years a pupil with disabilities who graduates in accordance with his or her individualized education program (IEP).

(C) The pupil data collected for the API that comes from the achievement test administered pursuant to Section 60640 and the high school exit examination administered pursuant to Section 60851, when fully implemented, shall be disaggregated by special education status, English learners, socioeconomic status, gender, and ethnic group. Only the test scores of pupils who were counted as part of the enrollment in the annual data collection of the California Basic Educational Data System for the current fiscal year and who were continuously enrolled during that year may be included in the test result reports in the API score of the school. Results of the achievement test and other tests specified in subdivision (b) shall constitute at least 60 percent of the value of the index.

(D) Before including high school graduation rates and attendance rates in the API, the Superintendent shall determine the extent to which the data currently are reported to the state and the accuracy of the data. Notwithstanding any other law, graduation rates for pupils in dropout recovery high schools shall not be included in the API. For purposes of this subparagraph, “dropout recovery high school” means a high school in which 50 percent or more of its pupils have been designated as dropouts pursuant to the exit/withdrawal codes developed by the department.

(E) The Superintendent shall provide an annual report to the Legislature on the graduation and dropout rates in California and shall make the same report available to the public. The report shall be accompanied by the release of publicly accessible data for each school district and school in a manner that provides for disaggregation based upon socioeconomically disadvantaged pupils and numerically significant pupil subgroups scoring below average on statewide standards-aligned assessments. In addition, the data shall be made available in a manner that provides for comparisons of a minimum of three years of data.

(b) Pupil scores from the following tests, when available and when found to be valid and reliable for this purpose, shall be incorporated into the API:
(1) The standards-based achievement tests provided for in Section 60642.5.

(2) The high school exit examination.

(c) Based on the API, the Superintendent shall develop, and the state board shall adopt, expected annual percentage growth targets for all schools based on their API baseline score from the previous year. Schools are expected to meet these growth targets through effective allocation of available resources. For schools below the statewide API performance target adopted by the state board pursuant to subdivision (d), the minimum annual percentage growth target shall be 5 percent of the difference between the actual API score of a school and the statewide API performance target, or one API point, whichever is greater. Schools at or above the statewide API performance target shall have, as their growth target, maintenance of their API score above the statewide API performance target. However, the state board may set differential growth targets based on grade level of instruction and may set higher growth targets for the lowest performing schools because they have the greatest room for improvement. To meet its growth target, a school shall demonstrate that the annual growth in its API is equal to or more than its schoolwide annual percentage growth target and that all numerically significant pupil subgroups, as defined in subdivision (a), are making comparable improvement.

(d) Upon adoption of state performance standards by the state board, the Superintendent shall recommend, and the state board shall adopt, a statewide API performance target that includes consideration of performance standards and represents the proficiency level required to meet the state performance target. When the API is fully developed, schools, at a minimum, shall meet their annual API growth targets to be eligible for the Governor’s Performance Award Program as set forth in Section 52057. The state board may establish additional criteria that schools must meet to be eligible for the Governor’s Performance Award Program.

(e) The API shall be used for both of the following:

(1) Measuring the progress of schools selected for participation in the Immediate Intervention/Underperforming Schools Program pursuant to Section 52053.
(2) Ranking all public schools in the state for the purpose of the High Achieving/Improving Schools Program pursuant to Section 52056.

(f) (1) A school with 11 to 99 pupils with valid test scores shall receive an API score with an asterisk that indicates less statistical certainty than API scores based on 100 or more test scores.

(2) A school annually shall receive an API score, unless the Superintendent determines that an API score would be an invalid measure of the performance of the school for one or more of the following reasons:

   (A) Irregularities in testing procedures occurred.
   
   (B) The data used to calculate the API score of the school are not representative of the pupil population at the school.
   
   (C) Significant demographic changes in the pupil population render year-to-year comparisons of pupil performance invalid.
   
   (D) The department discovers or receives information indicating that the integrity of the API score has been compromised.
   
   (E) Insufficient pupil participation in the assessments included in the API.

(3) If a school has fewer than 100 pupils with valid test scores, the calculation of the API or adequate yearly progress pursuant to the federal No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.) and federal regulations may be calculated over more than one annual administration of the tests administered pursuant to Section 60640 and the high school exit examination administered pursuant to Section 60851, consistent with regulations adopted by the state board.

(g) Only schools with 100 or more test scores contributing to the API may be included in the API rankings.

(h) The Superintendent, with the approval of the state board, shall develop an alternative accountability system for schools under the jurisdiction of a county board of education or a county superintendent of schools, community day schools, nonpublic, nonsectarian schools pursuant to Section 56366, and alternative schools serving high-risk pupils, including continuation high schools and opportunity schools. Schools in the alternative accountability system may receive an API score, but shall not be included in the API rankings.

(i) This section shall become inoperative on July 1, 2014, and, as of January 1, 2015, is repealed, unless a later enacted statute,
that becomes operative on or before January 1, 2015, deletes or 
extends the dates on which it becomes inoperative and is repealed.
SEC. 3. Section 52052.1 of the Education Code is amended to 
read:
52052.1. (a) Beginning July 1, 2011, in addition to the test 
scores specified in subparagraph (B) of paragraph (4) of subdivision 
(a) of Section 52052, the Academic Performance Index (API) for 
a school or school district shall do all of the following:
1. Include the test scores and other accountability data of 
enrolled pupils who were referred by the school or school district 
of residence to an alternative education program, including 
community, community day, and continuation high schools and 
independent study, and be calculated by assigning all accountability 
data on pupils in alternative education programs, including 
community, community day, and continuation high schools and 
independent study, to the school and school district of residence 
to ensure that placement decisions are in the best interests of 
affected pupils. If a pupil is referred to an alternative education 
program by a juvenile court judge or other correctional or judicial 
oficial, or if the pupil is expelled pursuant to subdivision (a), (b), 
or (c) of Section 48915, the test scores of that pupil shall remain 
with the alternative education program and with the school district 
or county office of education serving that pupil. This section does 
not prohibit the alternative education program from counting the 
test scores of those pupils served in their alternative education 
program. It is the intent of the Legislature that these alternative 
education programs remain accountable to the pupils they serve.
2. Exclude the test scores or other data of those pupils exempt 
pursuant to federal statute or federal regulation.
3. Include school and school district dropout rates for pupils 
who drop out of school while enrolled in grade 8 or 9. If reliable 
data is not available by July 1, 2011, the Superintendent, on or 
before that date, shall report to the Legislature the reasons for the 
delay and date he or she anticipates the specified dropout rates 
will be included in the API.
(b) The advisory committee established pursuant to Section 
52052.5 shall recommend to the Superintendent and the state board 
all of the following:
1. The length of time for which the accountability data on 
pupils in alternative education programs shall be assigned to the
school and school district of residence pursuant to paragraph (1) of subdivision (a).

(2) Whether it is appropriate to assign accountability data to the school or the school district, pursuant to paragraph (1) of subdivision (a), if the pupil never attended the school of residence or has been absent for more than one year from the school district of residence due to placement in another school or school district or out of state.

(c) This section shall become inoperative on July 1, 2014, and, as of January 1, 2015, is repealed, unless a later enacted statute, that becomes operative on or before January 1, 2015, deletes or extends the dates on which it becomes inoperative and is repealed.

SEC. 4. Section 52052.5 of the Education Code is amended to read:

52052.5. (a) (1) The Superintendent shall establish a broadly representative and diverse advisory committee to advise the Superintendent and the state board on all appropriate matters relative to the creation of accountability measures developed pursuant to this article. Members of the advisory committee shall serve without compensation for terms not to exceed two years. The department shall provide staff to the advisory panel.

(2) For the purposes of its work related to the establishment of the Education Quality Index described in Section 52052.8, the advisory committee shall do both of the following:

(A) Seek input through the establishment of subcommittees or other methods from persons with expertise in the following areas:

(i) Public school accountability.

(ii) Assessment of English-proficient pupils and English learners.

(iii) School teaching and administration.

(iv) Education of English learners.

(v) High school reform and dropout prevention.

(vi) Special education.

(vii) Business and industry.

(viii) College and career preparedness.

(ix) Equal educational opportunity.

(x) Pupil engagement.

(xi) Areas of study for which academic content standards have been adopted by the state board.

(B) Commencing January 1, 2012, through July 1, 2016, inclusive, meet at least once each quarter per year, at the call of
the chairperson, at a time and location convenient to the public, as the chairperson deems appropriate. All meetings shall be open to the public in accordance with Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2 of the Government Code.

(b) By January 1, 2011, the Superintendent and the state board, in consultation with the advisory committee established pursuant to subdivision (a), shall make recommendations to the Legislature and the Governor on each of the following:

(1) Approaches to increasing the emphasis of science and mathematics in the calculation of the Academic Performance Index or any successor measure.

(2) Methods to incorporate into the Academic Performance Index, or into other aspects of the state’s accountability system, a measure of the degree to which pupils graduate from high school with the skills and knowledge necessary to attain entry-level employment in business or industry, as set forth in subdivision (b) of Section 51228.

(3) Methods to incorporate into the Academic Performance Index, or into other aspects of the state’s accountability system, a measure of the degree to which pupils graduate from high school with the skills and knowledge necessary to succeed in postsecondary education.

(c) By July 1, 2013, the Superintendent and the state board, in consultation with the advisory committee established pursuant to subdivision (a), shall make recommendations to the Legislature and the Governor on the establishment of a methodology for generating a measurement of group and individual academic performance growth by utilizing individual pupil results from a longitudinally valid achievement assessment system. These recommendations should also address any interactions between the Academic Performance Index, or any successor measure, and individual test scores from the state’s tests, as well as implications for the reauthorization of the state’s assessment system. This paragraph subdivision shall not be construed to supersede the provisions of Chapter 273 of the Statutes of 2009.

SEC. 5. Section 52052.8 is added to the Education Code, to read:

52052.8. (a) (1) The Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, shall
develop an Education Quality Index (EQI) for schools and school
districts, to be comprised of multiple valid and reliable indicators,
to reflect the overall performance of California’s public schools,
school districts, and pupils, for adoption by the state board. The
state board shall adopt the EQI no later than August 1, 2014. Before
adopting the EQI, the state board shall provide opportunities for
public input and make changes as necessary.

(2) Commencing with the 2014–15 school year and each school
year thereafter, all schools and school districts shall be evaluated
using an EQI value.

(b) It is the intent of the Legislature that the EQI provide a
comprehensive and transparent measurement of pupil performance
and school quality to better inform parents, pupils, teachers, school
administrators, policymakers, and the public about public school
performance using multiple indicators of pupil, school, and school
district quality and performance.

(c) An EQI shall be developed for each school type and school
district as follows:

(1) For schools and school districts maintaining any of grades
9 to 12, inclusive, the EQI shall include, but not necessarily be
limited to, the following component indices:

(A) The State Assessment Index (SAI), as described in Section
52052.81.

(B) The Graduation Rate Index (GRI), as described in Section
52052.82.

(C) The College Preparedness Index (CPI), as described in
Section 52052.83.

(D) The Career Readiness Index (CRI), as described in Section
52052.84.

(2) (A) For schools and school districts maintaining grade 8,
the EQI shall include, but shall not necessarily be limited to, the
SAI, as described in Section 52052.81, and the GRI, as described
in Section 52052.82.

(B) The Superintendent, in consultation with the advisory
committee established pursuant to Section 52052.5, shall consider
for inclusion in the EQI for schools and school districts maintaining
grade 8 a valid and reliable measure or measures of pupil access
to and performance in college and career preparatory and
exploratory experiences.
(3) (A) For schools and school districts maintaining
kindergarten or any of grades 1 to 7, inclusive, the EQI shall
include, but shall not necessarily be limited to, the SAI, as
described in Section 52052.81.
(B) It is the intent of the Legislature that the EQI for schools
and school districts maintaining kindergarten or any of grades 1
to 7, inclusive, not be limited to the SAI, as described in Section
52052.81.
(d) The Superintendent, in consultation with the advisory
committee established pursuant to Section 52052.5, shall develop
and recommend to the state board for adoption all of the following:
(1) An alternative accountability system for schools under the
jurisdiction of a county board of education or a county
superintendent of schools, community day schools, nonpublic,
nonsectarian schools operating pursuant to Section 56366, and
alternative schools serving high-risk pupils, including continuation
high schools, opportunity schools, and dropout recovery high
schools.
(A) Schools in the alternative accountability system may receive
an EQI or any of its component indices, but shall not be included
in any rankings or comparisons to other schools based on these
indices.
(B) For purposes of this section, “dropout recovery high school”
means a high school in which 50 percent or more of its pupils are
designated as dropouts pursuant to the exit/withdrawal codes
developed by the department.
(2) The relative weights of the component indices that comprise
a school and school district EQI and a total value for a school and
school district EQI.
(i) For schools and school districts maintaining kindergarten
and any of grades 1 to 8, inclusive, the SAI shall comprise no less
than 40 percent of the value of the EQI.
(ii) For schools and school districts maintaining any of grades
9 to 12, inclusive, the SAI shall comprise no more than 40 percent
of the value of the EQI.
(iii) Within the EQI, the weights assigned to the CPI and CRI
shall be equal.
(3) No less than one additional component index for schools
maintaining kindergarten or any of grades 1 to 7, inclusive.
(4) Annual school and school district scores or other evaluation system for the EQI.

(5) An annual improvement or growth target for the SAI as described in Section 52052.81 and the GRI as described in Section 52052.82, including targets for numerically significant pupil subgroups, as defined in subdivision (k).

(6) Whether an improvement or growth target should be established for each additional component index, including targets for numerically significant pupil subgroups, as defined in subdivision (k).

(7) A method or methods for providing recognition, additional weight, or other measures in any of the EQI’s component indices for schools and school districts that can demonstrate that English learners are making progress toward English language acquisition, graduation, and preparedness for college and career.

(8) Whether an annual measurement of the narrowing of the achievement gap should be included for each component index, including measurements for numerically significant pupil subgroups, as defined in subdivision (k).

(9) The relevant indices and indicators necessary to meet and comply with federal law, including, but not limited to, the federal No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.).

(10) Any additional data elements, and connections between existing data systems, that are needed to develop the indices described in subdivision (c). For purposes of this paragraph, the Superintendent and the advisory committee established pursuant to Section 52052.5 shall consult with the University of California, the California State University, the California Community Colleges, the Employment Development Department, and other appropriate entities.

(e) The Superintendent annually shall release the indices described in this section, including all of the following:

(1) A composite EQI score, made up of any required component indices.

(2) An EQI score, and a score for each component index, at the school and school district level, for each numerically significant pupil subgroup as defined pursuant to subdivision (k).

(3) A transparent and understandable explanation of the score and relative weights for each individual index.
The relative weights of each individual indicator included in each index.

When additional valid and reliable pupil outcome data become available, the Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, shall develop and recommend to the state board for adoption additional indices to reflect other important elements of school quality, including, but not limited to, the following:

(A) Creativity and innovation.
(B) Pupil engagement in school.
(C) Group or individual pupil growth in academic performance.

In the development of any additional indices, the Superintendent shall take into account the appropriateness of particular indices and indicators to grade spans and school types, to ensure that the EQI and all component indices and indicators accurately reflect the state performance expectations under which the school or school district operate.

Any additional component index of the EQI adopted by the state board for inclusion in the EQI shall not be incorporated into the EQI until at least one full school year after adoption.

No later than July 1, 2015, and annually thereafter, the Superintendent shall report to the Governor and the appropriate policy and fiscal committees of the Legislature on all of the following:

(A) The status of valid and reliable data to develop and include in each index developed pursuant to this section, including additional indices as required by developed pursuant to subdivision (f).
(B) The data elements planned for inclusion in each additional index.
(C) The timeline for the development and implementation of additional indices.
(D) Potential impacts of each additional index on the EQI and on schools and school districts.
(5) Potential correlations or interaction between indices, including additional indices.

(2) A report to be submitted pursuant to paragraph (1) shall be submitted in compliance with Section 9795 of the Government Code.

(h) (1) The Superintendent shall not be limited in the development of the EQI by the scope, at the time of enactment of this section, of the California Longitudinal Pupil Achievement Data System, or any other relevant data system. No later than July 1, 2013, the Superintendent shall report to the Governor and the appropriate policy and fiscal committees of the Legislature any additional data required to be reported by local educational agencies for the purposes of the EQI.

(2) The requirement for submitting a report imposed under paragraph (1) is inoperative on July 1, 2017, pursuant to Section 10231.5 of the Government Code.

(i) (1) The Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, shall report, subject to an appropriation in the annual Budget Act or another statute for this purpose, contract for an independent evaluation of the effectiveness and reliability of the EQI and any statutory changes recommended for improvement, and shall submit the evaluation and recommendations in a report to the Governor and the appropriate policy and fiscal committees of the Legislature no later than July 1, 2018, on the effectiveness and reliability of the EQI and any statutory changes needed for improvement.

(2) The requirement for submitting a report imposed under paragraph (1) is inoperative on July 1, 2022, pursuant to Section 10231.5 of the Government Code.

(j) The Superintendent may develop and recommend to the state board for adoption any regulations necessary to implement this section.

(k) (1) For purposes of this chapter, a numerically significant pupil subgroup is one that meets both of the following criteria:

(A) The subgroup consists of at least 50 pupils each of whom has a valid test score.
(B) The subgroup constitutes at least 15 percent of the total population of pupils at a school who have valid test scores.

(2) If a subgroup does not constitute 15 percent of the total population of pupils at a school who have valid test scores, the subgroup may constitute a numerically significant pupil subgroup if it has at least 100 valid test scores.

(3) For a school with no fewer than 11 and no more than 99 pupils with valid test scores, numerically significant pupil subgroups shall be defined by the Superintendent, with approval by the state board.

(4) Numerically significant pupil subgroups shall include, but not be limited to, ethnic subgroups, socioeconomically disadvantaged pupils, English learners, and pupils with disabilities.

SEC. 6. Section 52052.81 is added to the Education Code, to read:

52052.81. (a) The State Assessment Index (SAI) shall be comprised of pupil scores from the standards-based achievement tests provided for in Section 60642.5, or any valid and reliable successor assessments adopted by the state board, and the high school exit examination. The pupil data collected for the SAI that comes from the achievement test administered pursuant to Section 60640 and the high school exit examination administered pursuant to Section 60851, when fully implemented, shall be disaggregated by special education status, English learners, socioeconomic status, gender, and ethnic group. The SAI for a school or school district also shall do all of the following:

(1) Include the test scores of enrolled pupils who were referred by the school or school district of residence to an alternative education program, including community, community day, and continuation high schools and independent study, and be calculated by assigning all data collected for purposes of the SAI on pupils in alternative education programs, including community, community day, and continuation high schools and independent study, to the school and school district of residence to ensure that placement decisions are in the best interests of affected pupils. If a pupil is referred to an alternative education program by a juvenile court judge or other correctional or judicial official, or if the pupil is expelled pursuant to subdivision (a), (b), or (c) of Section 48915, the test scores of that pupil shall remain with the alternative education program and with the school district or county office of
education serving that pupil. This section does not prohibit the
alternative education program from counting the test scores of
those pupils served in their alternative education program. It is the
intent of the Legislature that these alternative education programs
remain accountable to the pupils they serve.

(2) Exclude the test scores or other data of those pupils exempt
pursuant to federal statute or federal regulation.

(b) The advisory committee established pursuant to Section
52052.5 shall recommend to the Superintendent and the state board
all of the following:

(1) The length of time for which the data collected for purposes
of the SAI on pupils in alternative education programs shall be
assigned to the school and school district of residence pursuant to
paragraph (1) of subdivision (a).

(2) Whether it is appropriate to assign data collected for purposes
of the SAI to the school or the school district, pursuant to paragraph
(1) of subdivision (a), if the pupil never attended a school in the
school district of residence or is absent for more than one year
from the school district of residence due to placement in another
school or school district or out of state.

(c) All schools or school districts with at least 11 pupils with
valid test scores shall receive an annual SAI score, unless the
Superintendent determines that an SAI score would be an invalid
measure of the performance of a school or school district for one
or more of the following reasons:

(1) Irregularities in testing procedures occurred.

(2) The data used to calculate the SAI score of the school or
school district are not representative of the pupil population at the
school or school district.

(3) Significant demographic changes in the pupil population
render year-to-year comparisons of pupil performance invalid.

(4) The department discovers or receives information indicating
that the integrity of the SAI score has been compromised.

(5) There is insufficient pupil participation in the assessments
included in the SAI.

(d) The SAI for a school district shall not include test scores
from any school within that school district that had its SAI
invalidated for any of the reasons specified in paragraph (1) to (5),
inclusive, of subdivision (c).
(e) A school or school district with 10 or fewer pupils shall not receive an SAI score.

(f) If a school has fewer than 100 pupils with valid test scores, the calculation of the SAI or adequate yearly progress pursuant to the federal No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.) and federal regulations may be calculated over more than one annual administration of the tests administered pursuant to Section 60640 and the high school exit examination administered pursuant to Section 60851, consistent with regulations adopted by the state board.

SEC. 7. Section 52052.82 is added to the Education Code, to read:

52052.82. (a) The Graduation Rate Index (GRI) shall include one or both of the following, as appropriate to the grade configuration of the school or school district:

(1) Four-year, five-year, and six-year graduation rates as defined in Section 200.19(b) of Title 34 of the Code of Federal Regulations.

(2) Rates at which pupils successfully promote from one grade to the next in middle school and high school and successfully matriculate from middle school to high school.

(b) All schools and school districts shall be granted full value in their GRI for graduating in five or more years a pupil with disabilities who graduates in accordance with his or her individualized education program (IEP).

(c) The Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, shall develop and recommend to the state board for adoption all of the following:

(1) The length of time for which the following shall be assigned to the school and school district of residence, pursuant to subdivision (a):

(A) The rates at which pupils successfully promote from one grade to the next in middle school and high school.

(B) The rates at which pupils successfully matriculate from middle school to high school.

(C) Graduation rates of pupils in alternative education programs.

(2) Whether it is appropriate to assign the rates at which pupils successfully promote from one grade to the next in middle school and high school, successfully matriculate from middle school to high school, and graduation rates, to the school or the school district, pursuant to subdivision (a), if the pupil never attended a
school in the school district of residence or is absent for more than
one year from the school district of residence due to placement in
another school or school district or out of state.
(3) The value graduation rates will have in the GRI for pupils
who graduate in four, five, or six years. The recommendation may
place less value on five- and six-year graduation rates than on
four-year graduation rates.
(4) Whether a California public high school that initially enrolls
a pupil who is at risk of not graduating on time may be granted
full value in their GRI for graduating that pupil in five or six years.
(d) The GRI for a school or school district also shall do all of
the following:
(1) Include the rates at which pupils successfully promote from
one grade to the next in middle school and high school, successfully
matriculate from middle school to high school, and graduation
rates, pursuant to subdivision (a), for enrolled pupils who were
referred by the school or school district of residence to an
alternative education program, including community, community
day, and continuation high schools and independent study, and be
calculated by assigning all data collected for purposes of the GRI
on pupils in alternative education programs, including community,
community day, and continuation high schools and independent
study, to the school and school district of residence to ensure that
placement decisions are in the best interests of affected pupils. If
a pupil is referred to an alternative education program by a juvenile
court judge or other correctional or judicial official, or if the pupil
is expelled pursuant to subdivision (a), (b), or (c) of Section 48915,
the test scores of that pupil shall remain with the alternative
education program and with the school district or county office of
education serving that pupil. This section does not prohibit the
alternative education program from counting the dropout and
graduation rates of those pupils served in their alternative education
program. It is the intent of the Legislature that these alternative
education programs remain accountable to the pupils they serve.
(2) Exclude the rates at which pupils successfully promote from
one grade to the next in middle school and high school, successfully
matriculate from middle school to high school, and graduation
rates of those pupils exempt pursuant to federal statute or federal
regulation.
(e) Growth targets and a statewide performance target established for the GRI shall be consistent with those established pursuant to the federal No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.) or any successor measure adopted pursuant to the federal Elementary and Secondary Education Act.

SEC. 8. Section 52052.83 is added to the Education Code, to read:

52052.83. (a) The College Preparedness Index (CPI) shall consist of multiple valid, reliable, and stable measures of pupil preparedness for postsecondary education.

(b) In developing the CPI, the Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, may consider, but is not necessarily limited to, for pupils in any of grades 9 to 12, inclusive, local and state assessments, course enrollment and completion, academic and extracurricular programs, and advanced or additional learning opportunities, as indicators for inclusion in the CPI.

(c) In developing the CPI, the Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, shall recommend to the state board for adoption a method for providing additional weight in the index for schools and school districts that demonstrate that pupil subgroups, including economically disadvantaged pupils, pupils with disabilities, and English learners, are proportionately represented among pupils who are prepared and eligible for enrollment in four-year colleges and universities.

SEC. 9. Section 52052.84 is added to the Education Code, to read:

52052.84. The Career Readiness Index (CRI) shall consist of multiple valid, reliable, and stable measures of pupil readiness for career. In the development of the CRI, the Superintendent, in consultation with the advisory committee established pursuant to Section 52052.5, may consider, but is not necessarily limited to, for pupils in any of grades 9 to 12, inclusive, course enrollment and completion of career pathway and standards-aligned career technical education programs, industry-validated courses and certifications, intersegmental articulation with institutions of higher education, and local and state assessments, and portfolio assessments, as indicators for inclusion in the CRI.
SEC. 10. If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.
