SENATE BILL

No. 907

Introduced by Senator Evans

(Principal coauthor: Assembly Member V. Manuel Pérez)

February 18, 2011

An act to add and repeal Title 18.2 (commencing with Section 99090) of the Government Code, relating to infrastructure financing and development.

LEGISLATIVE COUNSEL'S DIGEST

SB 907, as amended, Evans. Master Plan for Infrastructure Financing and Development Commission.

The California Constitution regulates the issuance of debt by the state and requires that debt in excess of \$300,000 for which the state will be generally obligated be submitted to, and approved by, the voters.

This bill would create the Master Plan for Infrastructure Financing and Development Commission, consisting of specified members, and would require the commission to prepare and submit a strategy and plan for infrastructure development in California that meets certain criteria to the Legislature and the Governor by December 1, 2013. This bill would provide that the commission would dissolve 30 days after submission of its final report. This bill would repeal these provisions upon the dissolution of the commission. *The bill would provide that these provisions become operative only if the funds required to support the commission are appropriated and made available in the annual Budget Act.*

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Title 18.2 (commencing with Section 99090) is
2 added to the Government Code, to read:

3

4 TITLE 18.2. MASTER PLAN FOR INFRASTRUCTURE
5 FINANCING AND DEVELOPMENT COMMISSION

6

7

CHAPTER 1. GENERAL PROVISIONS

8

9 99090. The Legislature finds and declares all of the following:

10 (a) By 2050, an estimated 60 million people will call California
11 home, twice as many people who lived here in 2003, while our
12 current infrastructure of schools, universities, roads, housing, and
13 water delivery was built to serve 25 million residents.

14 (b) The Governor’s Strategic Growth Plan estimates that the
15 state has approximately five hundred billion dollars
16 (\$500,000,000,000) in infrastructure needs over the next 20 years.
17 While the state needs five hundred billion dollars
18 (\$500,000,000,000) of infrastructure investment, experts conclude
19 that public funds, including state and local dollars, can only finance
20 up to three hundred billion dollars (\$300,000,000,000) in projects,
21 leaving approximately two hundred billion dollars
22 (\$200,000,000,000) in unfunded infrastructure needs.

23 (c) California must examine ways to close the infrastructure
24 financing gap through all types of innovative financing available.

25 (d) Our state lacks information that is both independent and
26 comprehensive to assist policymakers to analyze and prioritize the
27 myriad of California’s infrastructure needs. For this reason, it is
28 necessary to create a strategy and plan for infrastructure
29 development that enables California to address social, economic,
30 and resource needs through 2050. This strategy must be founded
31 on the principle that infrastructure provides a means to achieve
32 public, economic, and policy objectives. As such, the strategy will
33 assess infrastructure needs, establish priorities to guide future
34 decisions that relate to infrastructure projects, and assess the

1 viability of various financing mechanisms to meet the state's
2 infrastructure development needs.

3 (e) It is the mission of the Master Plan for Infrastructure
4 Financing and Development to develop and recommend a plan
5 and process to identify, finance, build, and maintain infrastructure
6 necessary to meet the needs of Californians from the present year
7 to the year 2050. The plan shall be submitted to the Governor and
8 the Legislature, and shall include, at a minimum, the type,
9 distribution, and priority for developing infrastructure projects,
10 and a measurable process to implement the plan. The plan shall
11 also include a process to periodically adjust the type, distribution,
12 and priority of infrastructure projects in coming years to meet
13 changing circumstances.

14 99091. It is the intent of the Legislature that the Master Plan
15 for Infrastructure Financing and Development Commission provide
16 a long-term plan and strategy to meet our state's infrastructure
17 needs and a prioritized plan that meets those needs by doing all of
18 the following:

19 (a) Project population, social, and economic trends through
20 2050.

21 (b) Utilizing the projections established pursuant to subdivision
22 (a), identify the type and distribution of infrastructure needed to
23 meet California's social, economic, and resource needs through
24 2050.

25 (c) Incorporate the findings of ongoing state infrastructure
26 planning and reporting requirements.

27 (d) Using the assessment of type, distribution, and priority of
28 infrastructure needed pursuant to subdivision (b), assess the state's
29 capital needs for infrastructure projects through 2050, including
30 opportunities to access private capital to augment or complement
31 public financing.

32 (e) Assess the availability of private and public funds, including
33 the status and fiscal value of dedicating future revenues to specific
34 construction and maintenance, to support jointly sponsored projects
35 throughout the period from the present year to 2050.

36 (f) Recommend a financing plan for the capital needs through
37 *the year* 2050, with a priority plan for each five-year interval,
38 including evaluation and recommendations of various financing
39 methods that are feasible and may be of benefit to state and local

1 government as well as private entities partnering with the state to
 2 implement the strategy.
 3 99092. The Master Plan for Infrastructure Financing and
 4 Development Commission is hereby created in state government.
 5 For purposes of this title, “commission” means the Master Plan
 6 for Infrastructure Financing and Development Commission.
