An act to amend Sections 8421 and 8423 of the Education Code, relating to after school programs.

LEGISLATIVE COUNSEL'S DIGEST

AB 547, as amended, Salas. 21st Century High School After School Safety and Enrichment for Teens program.

Existing law, the 21st Century High School After School Safety and Enrichment for Teens program, provides for the establishment of a high school after school program that consists of an academic assistance element and an enrichment element. Existing law specifies that the academic assistance element is required to include, but is not limited to, one of these specified activities: preparation for the high school exit examination, tutoring, homework assistance, or college preparation. In selecting grantees to participate in the program, existing law requires the State Department of Education to consider specified criteria, including, among others, the strength of the education element and alignment with state academic standards, and the strength of the enrichment element.

This bill would add career exploration, *as defined*, to the list of possible activities that may satisfy the academic assistance element, and would require the department to consider ~~the strength of career exploration,~~ and other criteria the department may identify as critical to the provision of high quality after school ~~programs,~~ *programs* in selecting grantees to participate in the program. The bill would make

technical changes by updating cross-references and would make other nonsubstantive changes.

Vote: majority. Appropriation: no. Fiscal committee: yes.  
State-mandated local program: no.
