LEGISLATIVE COUNSEL'S DIGEST

SB 494, as amended, Monning. ~~Health care providers: California Health Benefit Exchange. providers.~~

Existing law, the federal Patient Protection and Affordable Care Act, requires each state to, by January 1, 2014, establish an American Health Benefit Exchange that makes available qualified health plans to qualified individuals and qualified employers, as specified, and meets certain other requirements. Existing law establishes the California Health Benefit Exchange (the Exchange) within state government for that purpose. *Knox-Keene Health Care Service Plan Act of 1975*, provides for the licensure and regulation of health care service plans by the Department of Managed Health Care and makes a willful violation of the act a crime. Existing law also provides for the regulation of health insurers by the Department of Insurance.

*This bill would authorize, if the assignment of plan enrollees or insureds to a primary care physician is authorized by certain provisions of law or contract, the assignment of up to 2,000 enrollees or insureds to each full-time equivalent primary care physician and would authorize*

*the assignment of an additional 1,750 enrollees or insureds, as specified, to a primary care physician if that physician supervises one or more nonphysician medical practitioners. By imposing new requirements on health care service plans, the willful violation of which would be a crime, this bill would impose a state-mandated local program.*

*Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Care Services. Prior to a Medi-Cal managed care plan commencing operations, existing law requires the department to evaluate, among other things, the extent to which the plan has an adequate provider network, including the location, office hours, and language capabilities of the plan's primary care physicians. Existing law defines primary care provider for these purposes as an internist, general practitioner, obstetrician/gynecologist, pediatrician, family practice physician, or, as specified, types of clinics and defines primary care physician as a physician who has the responsibility, among other duties, for providing initial and primary care to patients.*

*This bill would require that the department evaluate the location, office hours, and language capabilities of a plan's primary care practitioners instead of the plan's primary care physicians. The bill would add nonphysician medical practitioners to the definition of a primary care provider. The bill would define nonphysician medical practitioner as a physician assistant performing services under physician supervision, as specified, or as a nurse practitioner performing services in collaboration with a physician, as specified. The bill would authorize, if the assignment of beneficiaries enrolled in any type of Medi-Cal managed care plan to a primary care physician is authorized by specified provisions of law or contract, the assignment of up to 2,000 beneficiaries to each full-time equivalent primary care physician. The bill would authorize the assignment of an additional 1,750 beneficiaries, as specified, to a primary care physician when that physician supervises one or more nonphysician medical practitioners. The bill would make conforming changes.*

*The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.*

*This bill would provide that no reimbursement is required by this act for a specified reason.*

~~This bill would state the intent of the Legislature to ensure that qualified health plans participating in the California Health Benefit Exchange provide an adequate network of primary care providers, including non-physician providers.~~

Vote: majority. Appropriation: no. Fiscal committee: ~~no~~-yes.  
State-mandated local program: ~~no~~-yes.
