(Coauthors: Senators Beall, Gaines, ~~and Galgiani~~ Galgiani, and

February 10, 2014

An act to amend Sections 8847 and 8847.1 of, to amend the heading of Chapter 11 (commencing with Section 8847) of Division 1 of Title 2 of, and to add Sections 8849 and 8850 to, the Government Code, relating to public works.

LEGISLATIVE COUNSEL'S DIGEST

SB 969, as amended, DeSaulnier. Public works.

Existing law generally defines "public work" as construction, alteration, demolition, installation, or repair work done under contract and paid for in whole or in part out of public funds; work done for irrigation, utility, reclamation, and improvement districts, and other districts of this type; street, sewer, or other improvement work done under the direction and supervision or by the authority of any officer or public body of the state or of any political subdivision or district thereof, and public transportation demonstration projects, as specified. Existing law, the Public Works Project Peer Review Act of 2013, authorizes a public agency principally tasked with administering, planning, developing, and operating a public works project to establish a peer review group, as defined. If a peer review group is established, existing law requires the administering agency to draft a charter, published on the agency's Internet Web site, related to the duties of the peer review group.

This bill would authorize these provisions, instead, to be known and cited as the Public Works Project Oversight Improvement Act. The bill would define a “megaproject” as a transportation project with total estimated development and construction costs exceeding \$1,000,000,000: \$2,500,000,000. The bill would require the agency administering a megaproject to establish a peer review group and to take specified actions to manage the risks associated with a megaproject including establishing a comprehensive risk management plan, and regularly reassessing its reserves for potential claims and unknown risks. Because this bill would require local agencies to perform additional duties, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:
