LEGISLATIVE COUNSEL'S DIGEST

AB 1826, as amended, Mark Stone. Organic products.

Existing law, the California Organic Products Act of 2003 (the act), requires the Secretary of Food and Agriculture, county agricultural ~~commissioners under the supervision and direction of the secretary,~~ *commissioners*, and the Director of the State Department of Public Health to enforce ~~federal regulations~~ *state and federal laws* governing the production, labeling, and marketing of organic products, as specified. ~~The act requires certain persons engaged in the production, processing, or handling of organic products to annually register and pay a fee, as specified, and imposes penalties for specified violations of the act.~~

Existing federal law establishes the National Organic Program which requires operations that produce or handle organic agricultural products to comply with federal organic standards and be certified by a certifying agent, as specified.

~~This bill would revise and recast the California Organic Products Act of 2003 as the California Organic Food and Farming Act. The bill would specify that a person certified pursuant to the National Organic Program shall be deemed registered for purposes of the State Organic Program and that those operations do not require additional registration under the state law. The bill would require all other persons engaged in the production or handling of raw agricultural products sold as organic and retailers engaged in the production and processing of organic products to register with the county agricultural commissioner in the county of principal operation. The bill would require the secretary, in consultation with the California Organic Products Advisory Committee, to establish a registration fee for producers, handlers, retail food establishments, and certifying agencies, and would authorize the secretary to establish an annual fee for the purpose of funding activities authorized under the act based on gross annual organic sales. To the extent this bill would impose additional duties on county agricultural commissioners, the bill would impose a state-mandated local program.~~

~~The bill would require the secretary to establish a memorandum of understanding with the director to assist in administering the State Organic Program, would authorize the secretary to establish procedures for and conduct specified activities to supplement enforcement of National Organic Program standards, as specified, and to use State Organic Program funds to conduct specified activities.~~

~~Existing law requires the director to enforce regulations promulgated by the National Organic Program relating to organic products.~~

~~This bill would state that certification under the National Organic Program shall be deemed registration for purposes of the State Organic Program. The bill would, among other things, revise information that the director is required to annually compile, publish, and submit to the California Organic Products Advisory Committee.~~

*This bill would revise and recast the California Organic Products Act of 2003 as the California Organic Food and Farming Act and would set forth the purposes of the act.*

*Existing law establishes the California Organic Products Advisory Committee, comprised of 15 members, to advise the secretary on his or her responsibilities under the act.*

*The bill would revise the composition of the advisory committee and would expand the scope of the advisory committee's duties to include advising the secretary on education, outreach, and technical assistance for producers. The bill would authorize the secretary, in consultation with the advisory committee, to establish procedures for and conduct certain activities, including providing technical assistance, education, outreach, and guidance to the organic industry. The bill would specify that penalties collected by the secretary and fees collected by county agricultural commissioners pursuant to the act's provisions shall be expended to fulfill the responsibilities authorized under the act, and would exempt from the Administrative Procedure Act the adoption, amendment, or repeal of a registration fee.*

*Existing law requires every person engaged in the state in the production or handling of raw agricultural products sold as organic to register with the county agricultural commissioner and specifies the information required on the registration form.*

*This bill would require those persons to instead register with the Department of Food and Agriculture, would revise the registration fees required to be paid by certain registrants, and would revise the information required on the registration form. The bill would also revise the type of information and records that persons who produce, handle, or retail products sold as organic are required to keep or make available.*

*The bill would define certain terms for purposes of the act's provisions and would make technical and conforming changes to various code sections. To the extent the bill would impose additional duties on county agricultural commissioners, the bill would impose a state-mandated local program.*

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Vote: majority. Appropriation: no. Fiscal committee: yes.  
State-mandated local program: yes.
