

AMENDED IN SENATE APRIL 22, 2015

SENATE BILL

No. 402

Introduced by Senator Mitchell

February 25, 2015

An act to amend Section 49455 of the Education Code, relating to pupil health.

LEGISLATIVE COUNSEL'S DIGEST

SB 402, as amended, Mitchell. Pupil health: vision examinations.

Existing law requires a pupil's vision to be appraised by a school nurse or other authorized person in the pupil's kindergarten year or upon first enrollment in elementary school, and in grades 2, 5, and 8. Existing law requires color vision to be appraised only once, only on male pupils, and authorizes the color vision to be conducted after the male pupil has reached first grade. Existing law specifies that a pupil's vision may be appraised by using an eye chart or other scientifically validated photoscreening test, as specified. Existing law authorizes vision assessments to be 8, unless the appraisal is waived by the pupil's parents upon presentation of a certificate from a physician and surgeon, a physician assistant, or an optometrist. Existing law requires the State Department of Education to adopt guidelines to implement those provisions.

This bill would instead require a pupil's vision to be examined by a physician, optometrist, or ophthalmologist at least every 2nd year after the pupil's kindergarten year or first enrollment, and would require the examination to be consistent with the most current standard, policy, or guideline adopted by the American Academy of Pediatrics, the American Academy of Ophthalmology, or the American Optometric Association. The bill would delete the provision specifying that a pupil's vision may

~~be appraised using an eye chart or other scientifically validated photoscreening test, and instead would require a vision examination to include tests for visual acuity, binocular function, as well as refraction and eye health evaluations. The bill would delete the provision providing for a waiver of the vision appraisal, and would also delete the provision requiring color vision to be only for male pupils after the pupil has reached first grade, and would instead require color vision to be examined once at enrollment. The bill would require the department to adopt regulations to implement the above-specified requirements relating to vision examinations, as specified: require a pupil's vision to be appraised in accordance with the above specified provisions only if the pupil's parent or guardian fails to provide the results of a vision examination conducted by a physician, optometrist, or ophthalmologist in accordance with specified provisions. The bill would prohibit a school from denying admission to, or taking adverse action against, a pupil if his or her parent or guardian fails to provide the results of the vision examination. The bill would require the department to adopt regulations, rather than guidelines, to implement these provisions.~~
