ASSEMBLY BILL No. 6

Introduced by Assembly Member Bowler

December 2, 1996

An act to amend Section 11054 of the Health and Safety Code, relating to controlled substances, and declaring the urgency thereof, to take effect immediately.

LEGISLATIVE COUNSEL'S DIGEST

AB 6, as introduced, Bowler. Controlled substances: gamma-hydroxybutyrate.

Existing law categorizes controlled substances into 5 schedules and places the greatest restrictions on those contained in Schedule I.

This bill would include in Schedule I the sedative and hypnotic drug gamma-hydroxybutyrate. This bill would impose a state-mandated local program upon local governments by creating new crimes with respect to gamma-hydroxybutyrate.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Vote: $^{2}/_{3}$. Appropriation: no. Fiscal committee: yes. State-mandated local program: yes.

The people of the State of California do enact as follows:

SEC. 3. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

Since November of 1990, there have been increasing reports of the dangers of the drug gamma-hydroxybutyrate. There have been reports that gamma-hydroxybutyrate has caused ailments ranging from nausea and respiratory problems to seizures and comas, and according to health care practitioners, the drug is very easy to overdose on and has a potential for causing death. This act would seek to reduce these dangerous occurances by classifying the drug as a Schedule I controlled substance so that the drug would only be lawfully available for research and would have no approved medical use. In order to protect the health and well-being of the public as soon as possible, it is necessary that this act go into immediate effect.
