

Assembly Bill No. 1186

CHAPTER 775

An act to amend Section 13260 of the Water Code, relating to water.

[Approved by Governor October 7, 1997. Filed
with Secretary of State October 8, 1997.]

LEGISLATIVE COUNSEL'S DIGEST

AB 1186, Knox. General industrial or construction storm water permit fees: disposition.

Existing law requires each person for whom waste discharge requirements have been prescribed to submit an annual fee, for deposit in the Waste Discharge Permit Fund for expenditure by the State Water Resources Control Board, upon appropriation by the Legislature, for the purpose of carrying out Division 7 (commencing with Section 13000) of the Water Code.

This bill would require the fees collected from the storm water discharges that are subject to a general industrial or construction storm water permit under the national pollutant discharge elimination system (NPDES) to be accounted for separately in the fund. The bill would authorize not less than 50% of that money in the account to be used, upon appropriation by the Legislature, by the California regional water quality control board with jurisdiction over the permitted industry or construction site that generated the fee to carry out storm water programs in the region. The bill would require each regional board that receives money pursuant to those provisions to spend not less than 50% of that money solely on storm water inspection and regulatory compliance issues associated with industrial and construction storm water programs.

The people of the State of California do enact as follows:

SECTION 1. Section 13260 of the Water Code is amended to read:

13260. (a) All of the following persons shall file with the appropriate regional board a report of the discharge, containing the information which may be required by the regional board:

(1) Any person discharging waste, or proposing to discharge waste, within any region that could affect the quality of the waters of the state, other than into a community sewer system.

(2) Any person who is a citizen, domiciliary, or political agency or entity of this state discharging waste, or proposing to discharge waste, outside the boundaries of the state in a manner that could affect the quality of the waters of the state within any region.

(3) Any person operating, or proposing to construct, an injection well.

(b) No report of waste discharge need be filed pursuant to subdivision (a) if the requirement is waived pursuant to Section 13269.

(c) Every person subject to subdivision (a) shall file with the appropriate regional board a report of waste discharge relative to any material change or proposed change in the character, location, or volume of the discharge.

(d) (1) Each person for whom waste discharge requirements have been prescribed pursuant to Section 13263 shall submit an annual fee not to exceed ten thousand dollars (\$10,000) according to a reasonable fee schedule established by the state board. Fees shall be calculated on the basis of total flow, volume, number of animals, or area involved.

(2) (A) Subject to subparagraph (B), any fees collected pursuant to this section shall be deposited in the Waste Discharge Permit Fund which is hereby created. The money in the fund is available for expenditure by the state board, upon appropriation by the Legislature, for the purposes of carrying out this division.

(B) (i) Notwithstanding subparagraph (A), the fees collected pursuant to this section from storm water dischargers that are subject to a general industrial or construction storm water permit under the national pollutant discharge elimination system (NPDES) shall be separately accounted for in the Waste Discharge Permit Fund.

(ii) Not less than 50 percent of the money in the Waste Discharge Permit Fund that is separately accounted for pursuant to clause (i) is available, upon appropriation by the Legislature, for expenditure by the regional board with jurisdiction over the permitted industry or construction site that generated the fee to carry out storm water programs in the region.

(iii) Each regional board that receives money pursuant to clause (ii) shall spend not less than 50 percent of that money solely on storm water inspection and regulatory compliance issues associated with industrial and construction storm water programs.

(3) Any person who would be required to pay the annual fee prescribed by paragraph (1) for waste discharge requirements applicable to discharges of solid waste, as defined in Section 40191 of the Public Resources Code, at a waste management unit that is also regulated under Division 30 (commencing with Section 40000) of the Public Resources Code, and who is or will be subject to the fee imposed pursuant to Section 46801 of the Public Resources Code in the same fiscal year, shall be entitled to a waiver of the annual fee for the discharge of solid waste at the waste management unit imposed by paragraph (1) upon verification by the state board of payment of the fee imposed by Section 48000 of the Public Resources Code, and provided that the fee established pursuant to Section 48000 of the

Public Resources Code generates revenues sufficient to fund the programs specified in Section 48004 of the Public Resources Code and the amount appropriated by the Legislature for those purposes is not reduced.

(e) Each report of waste discharge for a new discharge submitted under this section shall be accompanied by a fee equal in amount to the annual fee for the discharge. If waste discharge requirements are issued, the fee shall serve as the first annual fee. If waste discharge requirements are waived pursuant to Section 13269, all or part of the fee shall be refunded.

(f) (1) On or before January 1, 1990, the state board shall adopt, by emergency regulations, a schedule of fees authorized under subdivisions (d) and (j). The total revenue collected each year through annual and filing fees shall be set at an amount equal to the revenue levels set forth in the Budget Act for this activity. The state board shall automatically adjust the annual and filing fees each fiscal year to conform with the revenue levels set forth in the Budget Act for this activity. If the state board determines that the revenue collected during the preceding year was greater than, or less than, the revenue levels set forth in the Budget Act, the state board may further adjust the annual filing fees to compensate for the over and under collection of revenue.

(2) The emergency regulations adopted pursuant to this subdivision, or subsequent adjustments to the annual fees, shall be adopted by the state board in accordance with Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code. The adoption of these regulations is an emergency and shall be considered by the Office of Administrative Law as necessary for the immediate preservation of the public peace, health, safety, and general welfare. Notwithstanding Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code, any emergency regulations adopted by the state board, or adjustments to the annual fees made by the state board pursuant to this section, shall not be subject to review by the Office of Administrative Law and shall remain in effect until revised by the state board.

(g) The state board shall adopt regulations setting forth reasonable time limits within which the regional board shall determine the adequacy of a report of waste discharge submitted under this section.

(h) Each report submitted under this section shall be sworn to, or submitted under penalty of perjury.

(i) The regulations adopted by the state board pursuant to subdivision (f) shall include a provision that annual fees shall not be imposed on those who pay fees under the National Pollutant Discharge Elimination System until the time when those fees are again due, at which time the fees shall become due on an annual basis.

(j) Facilities for confined animal feeding or holding operations, including dairy farms, which have been issued waste discharge requirements or exempted from waste discharge requirements prior to January 1, 1989, are exempt from subdivision (d). If the facility is required to file a report under subdivision (c) after January 1, 1989, the report shall be accompanied by a filing fee, to be established by the state board in accordance with subdivision (f), not to exceed two thousand dollars (\$2,000), and the facility shall be exempt from any annual fee.

(k) Any person operating or proposing to construct an oil, gas, or geothermal injection well subject to paragraph (3) of subdivision (a), shall not be required to pay a fee pursuant to subdivision (d), if the injection well is regulated by the Division of Oil and Gas of the Department of Conservation, in lieu of the appropriate California regional water quality control board, pursuant to the memorandum of understanding, entered into between the state board and the Department of Conservation on May 19, 1988. This subdivision shall remain operative until the memorandum of understanding is revoked by the state board or the Department of Conservation.

(l) In addition to the report required by subdivision (a), before any person discharges mining waste, the person shall first submit the following to the regional board:

(1) A report on the physical and chemical characteristics of the waste that could affect its potential to cause pollution or contamination. The report shall include the results of all tests required by regulations adopted by the board, any test adopted by the Department of Toxic Substances Control pursuant to Section 25141 of the Health and Safety Code for extractable, persistent, and bioaccumulative toxic substances in a waste or other material, and any other tests that the state board or regional board may require, including, but not limited to, tests needed to determine the acid-generating potential of the mining waste or the extent to which hazardous substances may persist in the waste after disposal.

(2) A report that evaluates the potential of the discharge of the mining waste to produce, over the long term, acid mine drainage, the discharge or leaching of heavy metals, or the release of other hazardous substances.

(m) Except upon the written request of the regional board, a report of waste discharge need not be filed pursuant to subdivision (a) or (c) by a user of recycled water that is being supplied by a supplier or distributor of recycled water for whom a master recycling permit has been issued pursuant to Section 13523.1.
