CALIFORNIA LEGISLATURE—2001–02 REGULAR SESSION

ASSEMBLY BILL

No. 997

Introduced by Assembly Member Dickerson

February 23, 2001

An act to amend Section 1603 of the Fish and Game Code, relating to fish and wildlife.

LEGISLATIVE COUNSEL'S DIGEST

AB 997, as amended, Dickerson. Streambed alteration.

Under existing law, it is unlawful for any person to substantially divert or obstruct the natural flow or substantially change the bed, channel, or bank of any river, stream, or lake designated by the Department of Fish and Game, or use any material from the streambeds, without first notifying the department of that activity. Under existing law, that prohibition does not apply to certain activities, including specified emergency work.

This bill also would exempt from that prohibition ~~the routine or minor~~ maintenance of existing previously permitted ~~structures used for irrigation, water supply, and drainage, and the maintenance of existing previously permitted~~ diversions and crossings.

~~The bill would require that a written application for approval of continued operation of existing previously permitted structures used for irrigation, water supply, drainage, diversions, and crossings be deemed approved if it has not been denied within 30 days of receipt by the department.~~

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Section 1603 of the Fish and Game Code is
2 amended to read:

3 1603. (a) It is unlawful for any person to substantially divert
4 or obstruct the natural flow or substantially change the bed,
5 channel, or bank of any river, stream, or lake designated by the
6 department, or use any material from the streambeds, without first
7 notifying the department of that activity, except when the
8 department has been notified pursuant to Section 1601. The
9 department, within 30 days from the date of receipt of that notice,
10 or within the time determined by mutual written agreement, when
11 an existing fish or wildlife resource may be substantially adversely
12 affected by that activity, shall notify the person of the existence of
13 that fish or wildlife resource together with a description of the fish
14 or wildlife, and shall submit to the person its proposals as to
15 measures necessary to protect fish and wildlife. Upon a
16 determination by the department of the necessity for onsite
17 investigation or upon the request for an onsite investigation by the
18 affected parties, the department shall notify the affected parties
19 that it shall make an onsite investigation of the activity and shall
20 make that investigation before it proposes any measure necessary
21 to protect the fish and wildlife. The department’s description of an
22 existing fish or wildlife resource shall be specific and detailed and
23 the department shall make available upon request the information
24 upon which its conclusion is based that the resource may be
25 substantially adversely affected.

26 (b) (1) Within 14 days from the date of receipt of the
27 department’s proposals, the affected person shall notify the
28 department in writing whether the proposals are acceptable, except
29 that the time period may be extended by mutual agreement. If the
30 department’s proposals are not acceptable to the affected person,

1 the person shall so notify the department. Upon request, the
2 department shall meet with the affected person within seven days
3 from the date of receipt of that notification or by a date that may
4 be mutually agreed upon for the purpose of developing proposals
5 that are acceptable to the department and the affected person.

6 (2) If mutual agreement is not reached at the meeting held
7 pursuant to paragraph (1), a panel of arbitrators shall be
8 established. However, appointment of the panel may be deferred
9 by mutual consent of the parties. The panel shall be established
10 within seven days from the date of that meeting and shall be
11 composed of one representative of the department, one
12 representative of the affected person, and a third person mutually
13 agreed upon or, if no agreement can be reached, the third person
14 shall be appointed in the manner provided by Section 1281.6 of the
15 Code of Civil Procedure. The third person shall act as panel chair.
16 The panel may settle disagreements and make binding decisions
17 regarding fish and wildlife modifications. The arbitration shall be
18 completed within 14 days from the date that the composition of the
19 panel is established, unless the time period is extended by mutual
20 agreement. The expenses of the department representative shall be
21 borne by the department; the expenses of the representative of the
22 person who diverts or obstructs the natural flow, or changes the
23 bed, of any river, stream, or lake, or uses any material from the
24 streambeds shall be borne by that person; and the expenses of the
25 chair of the panel shall be paid one-half by each party.

26 (c) It is unlawful for any person to commence any activity
27 affected by this section until the department has found that it will
28 not substantially adversely affect an existing fish or wildlife
29 resource or until the department's proposals, or the decisions of a
30 panel of arbitrators, have been incorporated into the activity. If the
31 department fails to act within 30 days from the date of the receipt
32 of the notice, the person may commence the activity. The
33 department shall not condition the streambed alteration agreement
34 on the receipt of another state or federal permit.

35 (d) It is unlawful for any person to engage in an activity
36 affected by this section, unless the activity is conducted in
37 accordance with the department's proposals or the decisions of the
38 panel of arbitrators.

39 (e) If an activity involves the routine maintenance and
40 operation of water supply, drainage, flood control, or waste

1 treatment and disposal facilities, notice to and agreement with the
2 department shall not be required subsequent to the initial
3 notification and agreement unless the work as described in the
4 agreement is substantially changed or conditions affecting fish and
5 wildlife resources substantially change and those resources are
6 adversely affected by the activity conducted under the agreement.
7 This subdivision applies in any instance where notice to, and
8 agreement with, the department was attained prior to January 1,
9 1977.

10 ~~(f) A written application for approval of continued operation of~~
11 ~~existing previously permitted structures used for irrigation, water~~
12 ~~supply, drainage, diversions, and crossings shall be deemed~~
13 ~~approved if it has not been denied within 30 days of receipt by the~~
14 ~~department.~~

15 ~~(g)~~

16 (f) (1) Except as provided in paragraph (2), this section does
17 not apply to any of the following projects:

18 (A) Immediate emergency work necessary to protect life or
19 property.

20 (B) Immediate emergency repairs to public service facilities
21 necessary to maintain service as a result of a disaster in a
22 disaster-stricken area in which a state of emergency has been
23 proclaimed by the Governor pursuant to Chapter 7 (commencing
24 with Section 8550) of Division 1 of Title 2 of the Government
25 Code.

26 (C) Emergency projects undertaken, carried out, or approved
27 by a public agency to maintain, repair, or restore an existing
28 highway, as defined in Section 360 of the Vehicle Code, except for
29 a highway designated as an official state scenic highway pursuant
30 to Section 262 of the Streets and Highways Code, within the
31 existing right-of-way of the highway, damaged as a result of fire,
32 flood, storm, earthquake, land subsidence, gradual earth
33 movement, or landslide, within one year of the damage. Work
34 needed in the vicinity above and below a highway may be
35 conducted outside of the existing right-of-way if it is needed to
36 stop ongoing or recurring mudslides, landslides, or erosion that
37 pose an immediate threat to the highway or to restore those
38 roadways damaged by mudslides, landslides, or erosion to their
39 predamage condition and functionality. This subparagraph does
40 not exempt from this section any project undertaken, carried out,

1 or approved by a public agency to expand or widen a highway
2 damaged by fire, flood, storm, earthquake, land subsidence,
3 gradual earth movement, or landslide.

4 ~~(D) Maintenance of existing previously permitted structures~~
5 ~~used for irrigation, water supply, and drainage.~~

6 ~~(E) Maintenance of existing previously permitted diversions~~
7 ~~and crossings.~~

8 *(D) Routine or minor maintenance of existing previously*
9 *permitted diversions and crossings provided that the maintenance*
10 *does not result in the impairment of the streambed or diversion of*
11 *any stream.*

12 (2) The person performing the project shall notify the
13 department within 14 days from the date of commencement of a
14 project exempted by this subdivision.

15 (3) For purposes of this subdivision, “emergency” means an
16 emergency, as defined in Section 21060.3 of the Public Resources
17 Code.

18 ~~(h)~~

19 (g) The department may enter into agreements with applicants
20 for a term of not more than five years for the performance of
21 activities subject to this section. The terms of the agreement may
22 be renegotiated at any time by mutual consent of the parties. Each
23 agreement shall be renewed automatically by the department at the
24 expiration of its term unless the department determines that there
25 has been a substantial change in conditions. If there is a
26 disagreement between the department and the applicant as to
27 whether there has been a substantial change in conditions, the
28 department and the applicant shall proceed to arbitration pursuant
29 to subdivision (b). The department may charge a fee when the
30 agreement is entered into and for each renewal, but may not charge
31 an annual fee for this purpose.
