---

An act to amend Sections 75507 and 75595.5 of, and to add Chapter 14 (commencing with Section 6300) to Part 1 of Division 4 of, the Food and Agricultural Code, relating to apple pests.

### LEGISLATIVE COUNSEL'S DIGEST

AB 443, as amended, Galgiani. Apple pests: pest and disease prevention.

Existing law provides that there is in state government the California Apple Commission, comprised of apple handlers and producers, which may recommend to the Secretary of Food and Agriculture maturity standards, enforce laws related to apple production, and promote the sale of apples.

This bill, the California Apple Pest and Disease Prevention Act of 2009 (the act), would provide that no person may handle apples in this state to which certain adopted regulations apply, except as specified. The bill would also provide that it is a crime to handle apples ~~from certain areas~~ or to fail to meet specified reporting duties or pay required assessments in violation of these provisions. Because this bill would create new crimes, this bill would impose a state-mandated local program.

This bill would require the secretary to appoint a committee of 11 individuals from nominations received from the California Apple Commission to administer these provisions. The bill would provide that the duties of the committee, with concurrence by the secretary, include making recommendations to the secretary of designated pests and diseases not already present or identified in California as of January 1, 2007, and of the adoption of regulations establishing terms and conditions for handling apples to prevent the introduction and spread of designated pests or diseases. The bill would also require the secretary to establish a panel to advise the committee and the secretary by providing information regarding the biology and known control methods for the pests and diseases under consideration by the committee.

This bill would provide that the Department of Food and Agriculture may investigate complaints referred by the commission and levy civil penalties against persons who violate the act not exceeding \$5,000, as specified. The bill would require the secretary to use all funds received under the act for purposes of the act. The bill would make other conforming changes.

Existing law authorizes the commission to establish an annual assessment rate to defray the operating costs of the commission.

~~This bill would instead require the commission to be responsible for funding the act and authorize the commission to establish an annual assessment rate to defray the costs of the act.~~

*The bill would instead require the commission to be responsible for all costs associated with the act and require the commission to establish an annual assessment rate to defray the costs of the act if the commission's current assessment is deemed not sufficient to cover the costs of the commission or the department associated with the act.*

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes.  
State-mandated local program: yes.

*The people of the State of California do enact as follows:*

SECTION 1. Chapter 14 (commencing with Section 6300) is added to Part 1 of Division 4 of the Food and Agricultural Code, to read:

CHAPTER 14. CALIFORNIA APPLE PEST AND DISEASE  
PREVENTION ACT OF 2009

Article 1. Declarations and Legislative Intent

6300. This chapter shall be known, and may be cited, as the California Apple Pest and Disease Prevention Act of 2009.

6300.01. The production and handling of apples constitute an important industry of this state that provides substantial and necessary revenues for the state and employment for its citizens. The California apple industry has the potential to be one of the leading segments of the state's agricultural industry. To realize this potential, there is a need to ensure that the integrity and healthful properties of apples produced, either by conventional or organic practices, and handled in this state, are preserved and protected from pest infestation and disease.

6300.02. Destructive pests and diseases pose a significant and imminent threat to California agriculture, including its important apple industry, and serious damage could occur if measures are not taken to mitigate this threat. If the threat is not mitigated, progress made by the apple industry in the adoption of integrated pest management and sustainable farming practices may be adversely affected, the use of pesticides may increase, and the quality of California's apples may be harmed by these destructive pests and diseases.

6300.03. The program established pursuant to this chapter is essential to ensure that apples produced or handled in the state are pest and disease free so that consumer confidence in California's apples is maintained throughout the nation and the world.

6300.04. This chapter is declared to be enacted in the public interest and in the exercise of the police power of the state for the purpose of protecting the health, peace, safety, and general welfare of the people of this state.
