

Senate Concurrent Resolution No. 10

RESOLUTION CHAPTER 25

Senate Concurrent Resolution No. 10—Relative to West Nile Virus and Mosquito and Vector Control Awareness Week.

[Filed with Secretary of State May 24, 2011.]

LEGISLATIVE COUNSEL'S DIGEST

SCR 10, Rubio. West Nile Virus and Mosquito and Vector Control Awareness Week.

This measure would declare April 24 through April 30, 2011, as West Nile Virus and Mosquito and Vector Control Awareness Week.

WHEREAS, West Nile virus is a mosquito-borne disease that can result in debilitating cases of meningitis and encephalitis and death to humans, horses, avian species, and other wildlife; and

WHEREAS, In 2010, West Nile virus resulted in five human deaths in California and 109 individuals in 17 counties tested positive for the virus, of which 71 developed neuroinvasive disease; and

WHEREAS, The State Department of Public Health and the federal Centers for Disease Control and Prevention predict West Nile virus will again pose a public health threat in California in 2011; and

WHEREAS, Adequately funded mosquito and vector control, disease surveillance, and public awareness programs, coupled with best management practices on public and private lands, are the best ways to prevent outbreaks of West Nile virus and other diseases borne by mosquitoes and other vectors; and

WHEREAS, Mosquitoes and other vectors, including, but not limited to, Africanized honeybees, rats, fleas, and flies, continue to be a source of human suffering, illness, death, and public nuisance in California and around the world; and

WHEREAS, Excess numbers of mosquitoes and other vectors spread diseases, reduce enjoyment of both public and private outdoor living spaces, reduce property values, hinder outdoor work, and reduce livestock productivity; and

WHEREAS, Professional mosquito and vector control based on scientific research has made great advances in reducing mosquito and vector populations and the diseases they transmit; and

WHEREAS, Established mosquito- and vector-borne diseases such as plague, Lyme disease, and encephalitis, and new and emerging vector-borne diseases such as hantavirus, arenavirus, babesiosis, and ehrlichiosis cause illness and sometimes death every year in California; and

WHEREAS, Mosquito and vector control districts throughout the State of California work closely with the United States Environmental Protection Agency and the State Department of Public Health to reduce pesticide risks to humans, animals, and the environment while protecting human health from mosquito- and vector-borne diseases and nuisance attacks; and

WHEREAS, The public's awareness of the health benefits associated with safe, professionally applied mosquito and vector control methods will support these efforts, as well as motivate the state and the public to eliminate mosquito and vector breeding sites on public and private property; and

WHEREAS, Educational programs have been developed to include schools, civic groups, private industry, and government agencies, in order to meet the public's need for information about West Nile virus, other diseases, and mosquito and vector biology and control; and

WHEREAS, Public awareness can result in reduced production of mosquitoes and other vectors on residential, commercial, and public lands by responsible parties, avoidance of the bites of mosquitoes and other vectors when the risk of West Nile virus and other disease transmission is high, detection of human cases of mosquito- and vector-borne diseases that may otherwise be misdiagnosed for lack of appropriate laboratory testing, and the formation of mosquito or vector control agencies where needed; and

WHEREAS, Public awareness can result in action to provide adequate funding for existing mosquito and vector control agencies or to create control agencies in areas where there are no existing controls; and

WHEREAS, West Nile Virus and Mosquito and Vector Control Awareness Week will increase the public's awareness of the threat of West Nile virus and other diseases and the activities of the various mosquito and vector research and control agencies working to minimize the health threat within California, and will highlight the educational programs currently available; and

WHEREAS, The Mosquito and Vector Control Association of California has designated the week of April 24 through April 30, 2011, as West Nile Virus and Mosquito and Vector Control Awareness Week in the State of California; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the Legislature hereby declares that the week of April 24 through April 30, 2011, be designated as West Nile Virus and Mosquito and Vector Control Awareness Week; and be it further

Resolved, That the Secretary of the Senate transmit a copy of this resolution to the Governor, State Public Health Officer, and the author for appropriate distribution.
