SENATE BILL

No. 1199

Introduced by Senator Hancock

February 20, 2014

An act to amend Sections 5093.54 and 5093.545 of the Public Resources Code, relating to wild and scenic rivers.

LEGISLATIVE COUNSEL'S DIGEST

SB 1199, as amended, Hancock. Wild and scenic rivers: Mokelumne River.

The California Wild and Scenic Rivers Act includes specified rivers and segments thereof within the California Wild and Scenic River system, which are subject to various protections under the act. Existing law requires the Natural Resources Agency to coordinate the activities of state agencies whose activities affect the rivers in the system, as specified, and to study and submit to the Governor and the Legislature reports on the suitability or unsuitability of designated potential additions to the system.

This bill would include within the system specified segments of the Mokelumne River, and would designate those segments as wild, scenic, or recreational.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. The Legislature finds and declares both of the
2 following:

(a) The Mokelumne River contains extraordinary scenic, recreational, historical, cultural, and water quality values of statewide significance that deserve to be preserved in their free-flowing state for the benefit and enjoyment of the people of the state.

(b) In designating the Mokelumne River as a component of the California Wild and Scenic River System, it is the intent of the Legislature that this act will accomplish the preservation of those values.

SEC. 2. Section 5093.54 of the Public Resources Code is amended to read:

5093.54. The following rivers and segments thereof are designated as components of the system:

(a) Klamath River. The main stem from 100 yards below Iron Gate Dam to the Pacific Ocean; the Scott River from the mouth of Shackleford Creek west of Fort Jones to the river mouth near Hamburg; the Salmon River from Cecilville Bridge to the river mouth near Somes Bar; the North Fork of the Salmon River from the intersection of the river with the south boundary of the Marble Mountain Wilderness area to the river mouth; Wooley Creek from the western boundary of the Marble Mountain Wilderness area to its confluence with the Salmon River.

(b) Trinity River. The main stem from 100 yards below Lewiston Dam to the river mouth at Weitchpec; the North Fork of the Trinity from the intersection of the river with the southern boundary of the Salmon-Trinity Primitive Area downstream to the river mouth at Helena; New River from the intersection of the river with the southern boundary of the Salmon-Trinity Primitive Area downstream to the river mouth near Burnt Ranch; South Fork of the Trinity from the junction of the river with State Highway Route 36 to the river mouth near Salyer.

(c) Smith River. The main stem from the confluence of the Middle and South Forks to its mouth at the Pacific Ocean; the Middle Fork from its source about three miles south of Sanger Lake as depicted on 1956 USGS 15' "Preston Peak" topographic map to the middle of Section 7 T17N R5E; the Middle Fork from the middle of Section 7 T17N R5E to the middle of Section 6 T17N R5E; the Middle Fork from the middle of Section 6 T17N R5E to one-half mile upstream from the confluence with Knopki Creek; the Middle Fork from one-half mile upstream from the confluence

27 Fork.

28 (d) Eel River. The main stem from 100 yards below Van Arsdale
29 Dam to the Pacific Ocean; the South Fork of the Eel from the
30 mouth of Section Four Creek near Branscomb to the river mouth
31 below Weott; Middle Fork of the Eel from the intersection of the
32 river with the southern boundary of the Middle Eel-Yolla Bolly
33 Wilderness Area to the river mouth at Dos Rios; North Fork of the
34 Eel from the Old Gilman Ranch downstream to the river mouth
35 near Ramsey; Van Duzen River from Dinsmores Bridge
36 downstream to the river mouth near Fortuna.

37 (e) American River. The North Fork from its source to the Iowa
38 Hill Bridge; the Lower American from Nimbus Dam to its junction
39 with the Sacramento River.

(f) (1) West Walker River. The main stem from its source to the confluence with Rock Creek near the town of Walker; Leavitt Creek from Leavitt Falls to the confluence with the main stem of the West Walker River.

(2) Carson River. The East Fork from the Hangman's Bridge crossing of State Highway Route 89 to the California-Nevada border.

(3) The Legislature finds and declares that, because the East Fork Carson River and West Walker River are interstate streams, and a source of agricultural water and domestic water for communities within the Counties of Alpine and Mono where they originate, it is necessary that the following special provisions apply:

(A) Nothing in this subdivision shall be construed to prohibit the replacement of diversions or changes in the purpose of use, place of use, or point of diversion under existing water rights, except that (i) no replacement or change shall operate to increase the adverse effect, if any, of the preexisting diversion facility or place or purpose of use, upon the free-flowing condition and natural character of the stream, and (ii) after January 1, 1990, no new diversion shall be constructed unless and until the secretary determines that the facility is needed to supply domestic water to the residents of any county through which the river or segment flows and that the facility will not adversely affect the free-flowing condition and natural character of the stream.

(B) Nothing in this chapter shall be construed as quantifying or otherwise affecting any equitable apportionment, or as establishing any upper limit, between the State of California and the State of Nevada of the waters of these streams.

(g) (1) The South Yuba River: From Lang Crossing to its confluence with Kentucky Creek below Bridgeport.

(2) Nothing in this subdivision shall prejudice, alter, delay, interfere with, or affect in any way, the existing rights of the Placer County Water Agency; the implementation of those rights; any historic water use practices; the replacement, maintenance, repair, operation, or future expansion of existing diversions, storage, powerhouses, or conveyance facilities or other works by the Placer County Water Agency; or changes in the purpose of use, places of use, points of diversion, or ownership of those existing water rights; nor shall anything in this subdivision preclude the issuance of any governmental authorization needed for

1 utilization of those rights, except that no changes shall operate to
2 increase the adverse effect, if any, of the preexisting facilities or
3 places, or the purposes of use upon the free-flowing and natural
4 character of the river segment designated ~~herein~~ *in this subdivision*.

5 (h) Albion River. The Albion River from one-fourth mile
6 upstream of its confluence with Deadman Gulch downstream to
7 its mouth at the Pacific Ocean.

8 (i) Gualala River. The main stem Gualala River from the
9 confluence of the North and South Forks to the Pacific Ocean.

10 (j) (1) Cache Creek from one-fourth mile below Cache Creek
11 Dam to Camp Haswell.

12 (2) North Fork Cache Creek from the Highway 20 bridge to the
13 confluence with the main stem.

14 (3) The designation of Cache Creek under paragraphs (1) and
15 (2) shall not prejudice, alter, delay, interfere with, or affect in any
16 way, the existing water rights of the Yolo County Flood Control
17 and Water Conservation District, or public water agencies within
18 the Cache Creek watershed lying in the County of Lake, including
19 the range of operations permitted under these existing water rights;
20 any historic water use practices within existing water rights; or the
21 replacement, maintenance, repair, or future expansion within
22 existing water rights of existing diversion, storage, powerhouse,
23 or conveyance facilities or other works by the Yolo County Flood
24 Control and Water Conservation District or public water agencies
25 within the Cache Creek watershed lying in the County of Lake.

26 (4) The designation of Cache Creek under paragraphs (1) and
27 (2) shall not prejudice, alter, delay, interfere with, or affect any
28 changes to the existing water rights of the Yolo County Flood
29 Control and Water Conservation District, including changes to the
30 purpose of use, place of use, points of diversion, quantity of water
31 diverted, or ownership, or applications by the district for new water
32 rights; provided, that the changes or applications do not involve
33 the construction of a dam, reservoir, diversion, or other water
34 impoundment facility within the segments of Cache Creek
35 designated in paragraphs (1) and (2). Any such change or
36 application shall be subject to all applicable constitutional,
37 statutory, and judicial requirements, including the public trust
38 doctrine.

39 (5) As the waters of the Cache Creek watershed are the sole
40 source of supply within that watershed for the County of Lake, the

1 designation of Cache Creek under paragraphs (1) and (2) shall not
2 prejudice, alter, delay, interfere with, or affect any changes to the
3 existing water rights of the public water agencies within the Cache
4 Creek watershed lying in the County of Lake, including changes
5 to the purpose of use, place of use, points of diversion, quantity
6 of water diverted, or ownership, or applications by these agencies
7 for new water rights; provided, that the changes or applications
8 do not involve the construction of a dam, reservoir, diversion, or
9 other water impoundment facility within the segments of Cache
10 Creek designated in paragraphs (1) and (2). Any such change or
11 application shall be subject to all applicable constitutional,
12 statutory, and judicial requirements, including the public trust
13 doctrine.

14 (6) (A) The designation of Cache Creek under paragraphs (1)
15 and (2) shall not impair or affect in any way activities to manage
16 or remove invasive or nonnative plants and animal species.

17 (B) The designation of Cache Creek under paragraphs (1) and
18 (2) shall not impair or affect in any way activities to remediate
19 mercury pollution; provided, that this activity does not involve the
20 construction of a dam, reservoir, diversion, or other water
21 impoundment facility within the segments of Cache Creek
22 designated in paragraphs (1) and (2).

23 (7) (A) Neither the Governor nor an employee of a state agency
24 or department shall apply to a secretary, department, agency, or
25 other entity of the federal government for the designation of any
26 portion of Cache Creek as a component of the national wild and
27 scenic rivers system under the federal Wild and Scenic Rivers Act
28 (16 U.S.C. Sec. 1271 et seq.).

29 (B) Neither the Governor nor an employee of a state agency or
30 department shall expend funds preparing, filing, or otherwise
31 submitting an application to a secretary, department, or other entity
32 of the federal government for the designation of any portion of
33 Cache Creek as a component of the national wild and scenic rivers
34 system under the federal Wild and Scenic Rivers Act (16 U.S.C.
35 Sec. 1271 et seq.).

36 (8) To the extent that this subdivision conflicts with other
37 provisions of this chapter, this subdivision shall control.

38 (k) (1) North Fork Mokelumne River from 0.25 miles
39 downstream of Salt Springs Dam to the ~~southern boundary of~~
40 ~~Section 12, T6N, R12E.~~ *national forest boundary.*

(2) North Fork Mokelumne River from ~~1,400 feet upstream of the South Fork Mokelumne River confluence~~. 300 feet below Tiger Creek Afterbay to 300 feet upstream of the Electra Diversion Dam and West Point Power House.

(3) North Fork Mokelumne from 300 feet downstream of the small reregulating dam at the outlet of the West Point Power House to the Middle Fork Mokelumne River confluence.

~~(3)~~

(4) The main stem of the Mokelumne River from the confluence of the North and South Middle Forks to ~~the upper extent of Pardee Reservoir downstream of Highway 49, as the reservoir exists on January 1, 2015~~. 300 feet upstream of the Electra Powerhouse.

(5) The main stem of the Mokelumne River from 300 feet downstream of the small reregulating dam downstream of the Electra Powerhouse to the upper extent of Pardee Reservoir downstream of Highway 49, as the reservoir exists on January 1, 2015.

(l) Rivers that qualify for inclusion in the system may be recommended to the Legislature by the secretary.

SEC. 3. Section 5093.545 of the Public Resources Code is amended to read:

5093.545. The classifications heretofore established by the secretary for the rivers or segments of rivers included in the system are revised and adopted as follows:

	Rivers	Classification
(a)	Klamath River: The Klamath River from the FERC Project 2082 downstream boundary in Section 17 T47N R5W as shown on Exhibit K-7 sheet 1 dated May 25, 1962, to the river mouth at the Pacific Ocean	Recreational
