An act to add Sections 22334, 24203.6, 24205.5, and 87489 to the Education Code, relating to the State Teachers' Retirement System.

LEGISLATIVE COUNSEL'S DIGEST

AB 1933, as amended, Strom-Martin. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law provides that members with 30 or more years of credited service receive increases in their retirement allowance.

This bill would provide additional increases for members with 29 or more and 31 or more years of credited service who retire on and after January 1, 2001.

Under the State Teachers' Retirement Law, service retirement allowances for members, age 60 or over, are calculated based on years of credited service and specified percentages, up to 2.4%, of the member's final compensation,

as defined. Existing law prescribes reduced allowances, as specified, for members who retire prior to age 60.

This bill would provide that, if agreed to by the employer and employee representatives, the service retirement allowance of any member, age 55 or older, shall be based on 2.4% of the member's final compensation if the sum of the member's age and years of credited service equals or exceeds 85.

The bill would also require the Teachers' Retirement Board to conduct a study on the feasibility of basing pensions on years of service and final compensation with no age factor, except minimum retirement age, and to report its findings to the Legislature on or before July 1, 2001.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: no.

The people of the State of California do enact as follows:
